## BEST DIRECT LAMPE24

# Starlyf Sensor Light User Manual

Model: LAMPE24 | Brand: BEST DIRECT

## INTRODUCTION

---

The BEST DIRECT Starlyf Sensor Light set provides convenient, motion-activated LED illumination for various areas of your home. Designed to be extra-flat and easy to install, these lights automatically turn on when motion is detected and turn off when no motion is present, ensuring light only when and where you need it. This manual provides comprehensive instructions for the proper setup, operation, and maintenance of your Starlyf Sensor Lights.

## PACKAGE CONTENTS

---

- 2 x Starlyf Sensor Lights
- Double-sided adhesive pads (pre-attached or included separately)

*This image displays the two Starlyf Sensor Lights included in the set. Each light is designed to be extra-flat and features a bright LED illumination with a motion sensor in the center.*

## SETUP INSTRUCTIONS

---

### 1. Battery Installation

1. Locate the battery compartment cover on the back of the Starlyf Sensor Light.
2. Gently twist or slide the cover to open it.
3. Insert **3 x AAA batteries** (not included) into the compartment, ensuring correct polarity (+/-) as indicated inside.
4. Replace the battery compartment cover securely.

### 2. Mounting the Lights

The Starlyf Sensor Lights offer two convenient mounting options:

- **Magnetic Mounting:** The lights feature a built-in magnet on the back, allowing them to be easily attached to any metal surface without additional tools.
- **Adhesive Mounting:** For non-metal or non-porous surfaces, use the included double-sided adhesive pads. Peel off the protective film from one side of the pad and firmly press it onto the back of the light. Then, peel off the other side's film and press the light firmly onto your desired clean, dry surface.

#### Recommended Installation Locations:

- Wardrobes and closets
- Staircases and hallways
- Cellars, attics, and garages
- Under kitchen sinks or in pantries
- Any dark area requiring temporary illumination

*The Starlyf Sensor Lights provide automatic illumination for dark areas like staircases, enhancing safety and visibility. They activate upon detecting movement.*

*Ideal for dark spaces such as wardrobes, the Starlyf Sensor Light ensures that you can easily see your belongings without needing to manually switch on a light.*

*These versatile lights can be placed in various compact spaces like lockers, providing instant light when needed, making it convenient to access items.*

*Perfect for utility areas, the Starlyf Sensor Light illuminates hard-to-see spaces such as under sinks, making it easier to find and organize items.*

## **OPERATING INSTRUCTIONS**

---

The Starlyf Sensor Light is designed for fully automatic operation:

- **Motion Detection:** The light will automatically turn on when it detects motion within approximately **3 meters (10 feet)** of its sensor.
- **Automatic Shut-off:** If no further motion is detected for approximately **30 seconds**, the light will automatically turn off to conserve battery life.
- **Light Sensor:** The integrated light sensor ensures that the light only activates in dark conditions, preventing unnecessary illumination during daylight hours.

*This video demonstrates the automatic activation and deactivation of the Starlyf Sensor Light, showcasing its motion detection capabilities in various settings.*

## MAINTENANCE

---

- **Cleaning:** To clean the Starlyf Sensor Light, gently wipe the surface with a soft, dry cloth. Do not use abrasive cleaners or immerse the unit in water.
- **Battery Replacement:** When the light appears dim or stops activating, it is time to replace the batteries. Follow the "Battery Installation" steps in the Setup section to replace the 3 x AAA batteries.

## TROUBLESHOOTING

---

Problem	Possible Cause	Solution
Light does not turn on.	Batteries are dead or incorrectly installed. No motion detected within range. Area is too bright (light sensor prevents activation).	Replace batteries, ensuring correct polarity. Move within 3 meters of the sensor. Test in a darker environment.
Light does not turn off.	Continuous motion detected. Sensor is obstructed or dirty.	Ensure no continuous movement in the detection zone. Clean the sensor area.
Light is dim.	Low battery power.	Replace batteries.

## SPECIFICATIONS

---

<b>Brand</b>	BEST DIRECT
