UPTATSUPPLY 12CM

UPTATSUPPLY Poseidon Tattoo Cartridge Needles (Model 12CM) - Instruction Manual

1. INTRODUCTION AND PRODUCT OVERVIEW

This instruction manual provides essential information for the safe and effective use of UPTATSUPPLY Poseidon Tattoo Cartridge Needles, Model 12CM. These cartridges are designed for professional tattoo artists, offering precision and hygiene for various tattooing techniques.

Key features of Poseidon Tattoo Cartridge Needles include:

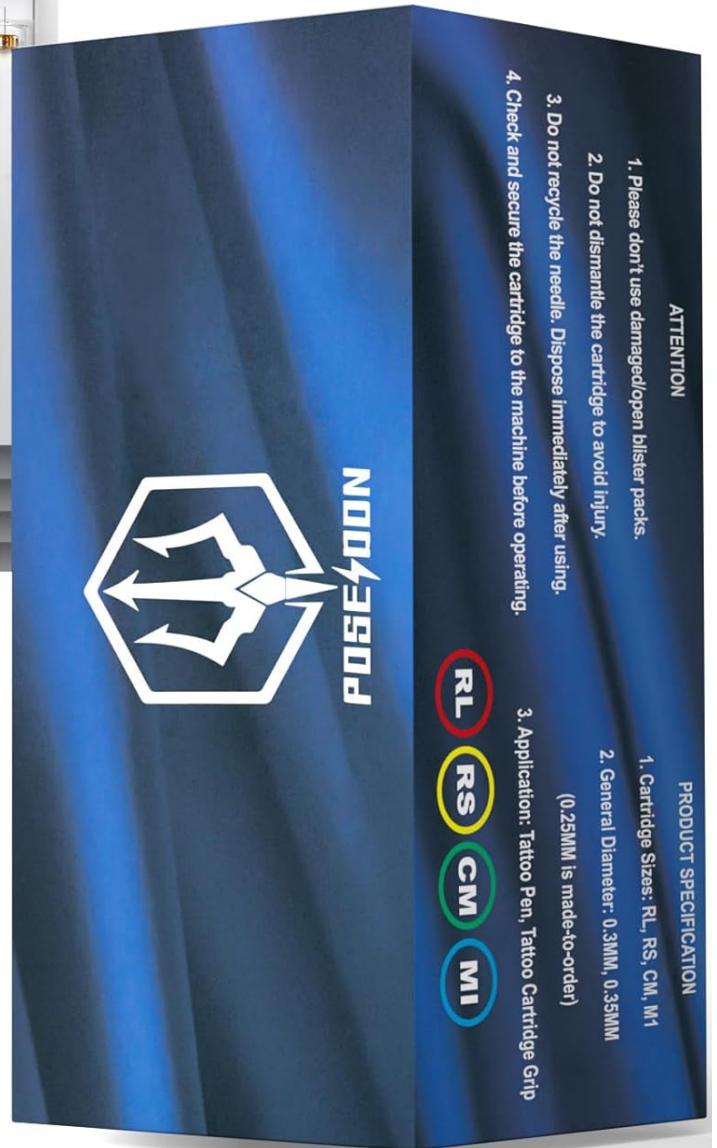

- One-time joint design for hygienic standards.
- Stainless steel material for durability and optimal ink flow.
- Special tip material for stable needle operation.
- Sterilized by EO Gas and individually blister-packed.
- Compatibility with all standard cartridge grips and machines.

2. SETUP AND PREPARATION

Before beginning any tattooing procedure, ensure all equipment is properly prepared and sterilized. The Poseidon Tattoo Cartridge Needles are designed for single-use and come pre-sterilized.

2.1 Inspecting the Packaging

50PCS

Carefully inspect the outer box and individual blister packs for any signs of damage or compromise. Do not use any cartridge if the packaging is torn, punctured, or appears to have been opened. Each blister pack includes a sterilization indicator.

**Disinfection
sign**

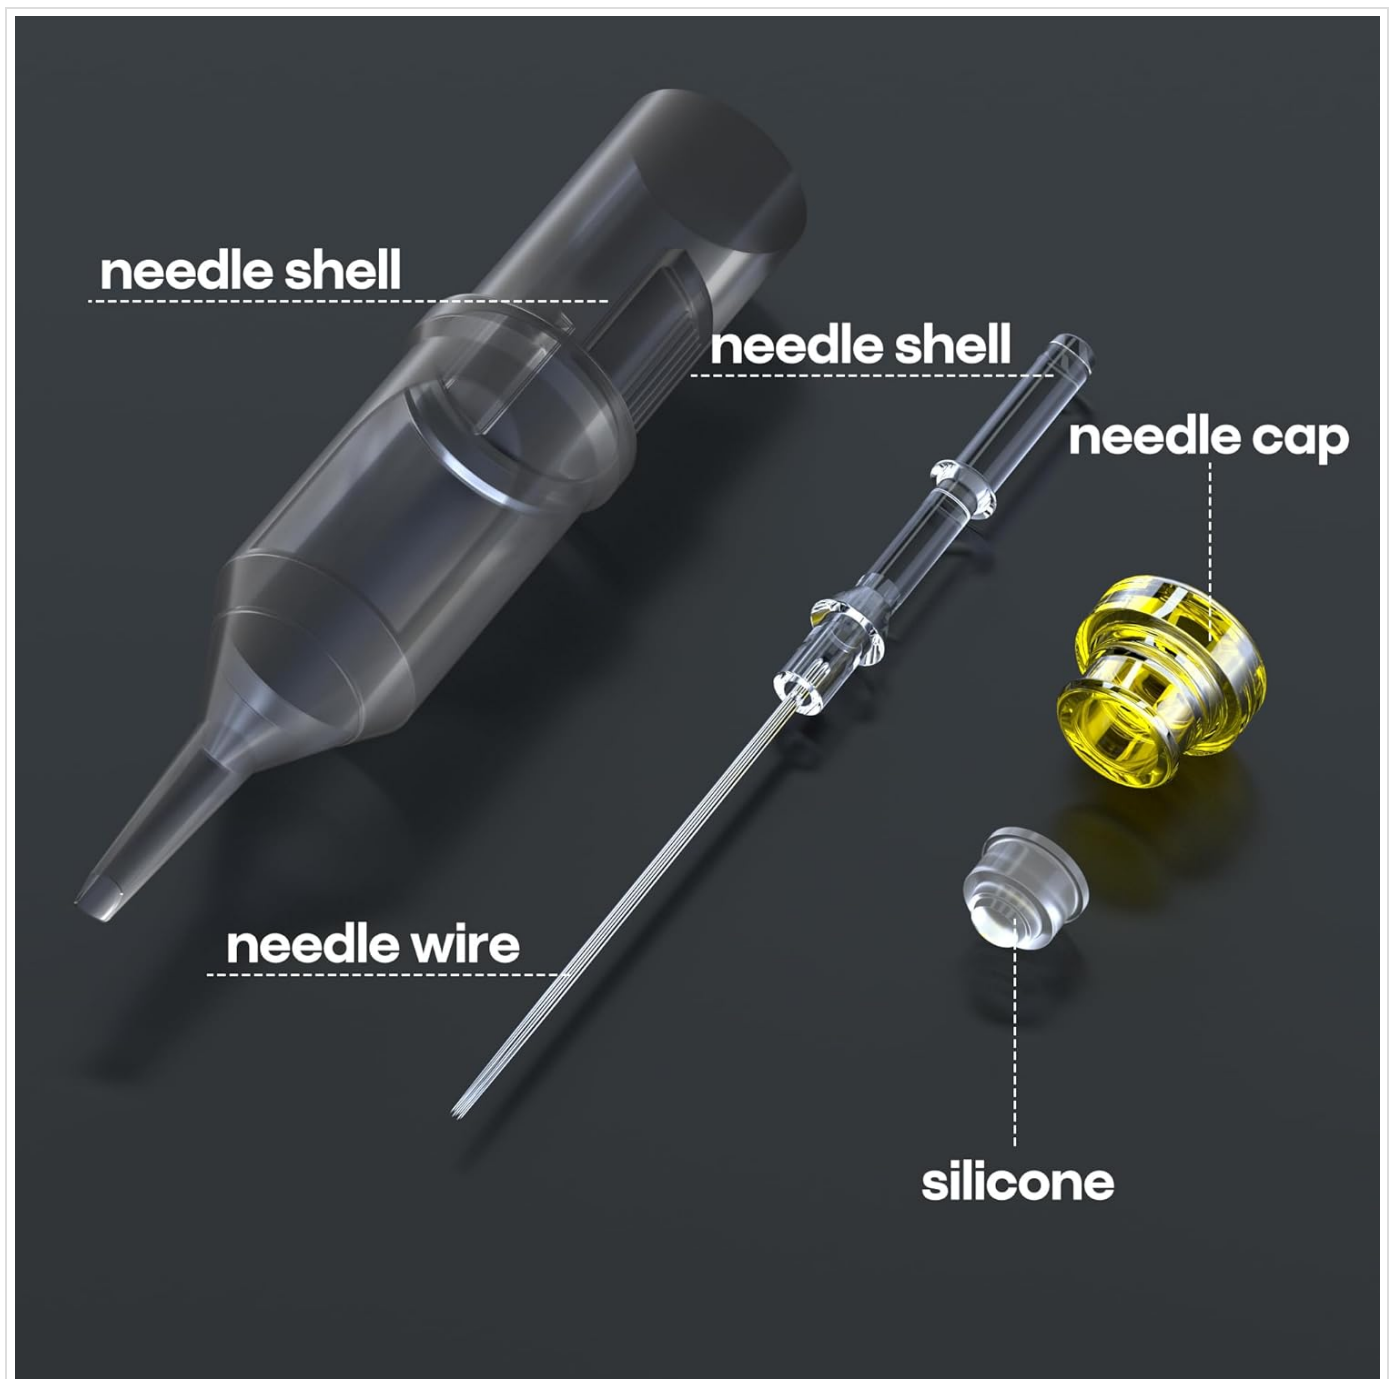

**The exact model
number of the product
is marked on the back**

**PS:1007RL in 5RL shell/1009RL in 7RL shell.
1015M1 in 13M1 shell/1021M1 in 19M1 shell.
1015RM in 13RM shell/1021RM in 19RM shell.
Cause 0.30mm is thin,suitable for small shell.**

Verify the disinfection sign on each blister pack. The exact model number of the product is also marked on the back of the packaging for easy identification.

2.2 Understanding Cartridge Components

Familiarize yourself with the cartridge components: the needle shell, needle wire, needle cap, and silicone membrane. These elements work together to ensure stable operation and prevent ink backflow.

3. OPERATING INSTRUCTIONS

Follow these steps for proper installation and use of the tattoo cartridge needles with your machine.

3.1 Attaching the Cartridge

Poseidon cartridge needles are designed for compatibility with most standard cartridge grips and tattoo machines. Gently push the cartridge into the machine's grip until it clicks securely into place. Ensure a snug fit to prevent movement during operation.

The image above illustrates the secure attachment of the cartridge to a compatible tattoo machine, highlighting the universal design.

3.2 Ink Loading and Application

Once the cartridge is securely attached, dip the needle tip into your tattoo ink. The cartridge's design facilitates optimal ink absorption and flow. Begin tattooing on practice skin or a client, ensuring proper technique and depth.

This video demonstrates the unboxing, assembly, ink loading, and basic application of Poseidon Tattoo Cartridge Needles with a tattoo machine.

The video above provides a visual guide on how to prepare and use the tattoo cartridges, including loading ink and performing test lines.

3.3 Advanced Design Features

High-Wear-Resistant Plastic Shell

Every detail is refined to achieve higher standards

The cartridges feature a high-wear-resistant plastic shell, ensuring durability and consistent performance throughout the tattooing process.

ANTI-BACKFLOW NEEDLE

© ANTI-BACKFLOW
NEEDLE

Inner membrane stops ink spit-back
Guaranteed smoother lines, fewer clogs

An inner membrane within each cartridge prevents ink spit-back, contributing to smoother lines and reducing the risk of clogs. This anti-backflow design enhances both hygiene and performance.

SAFETY

COMFORTABLE

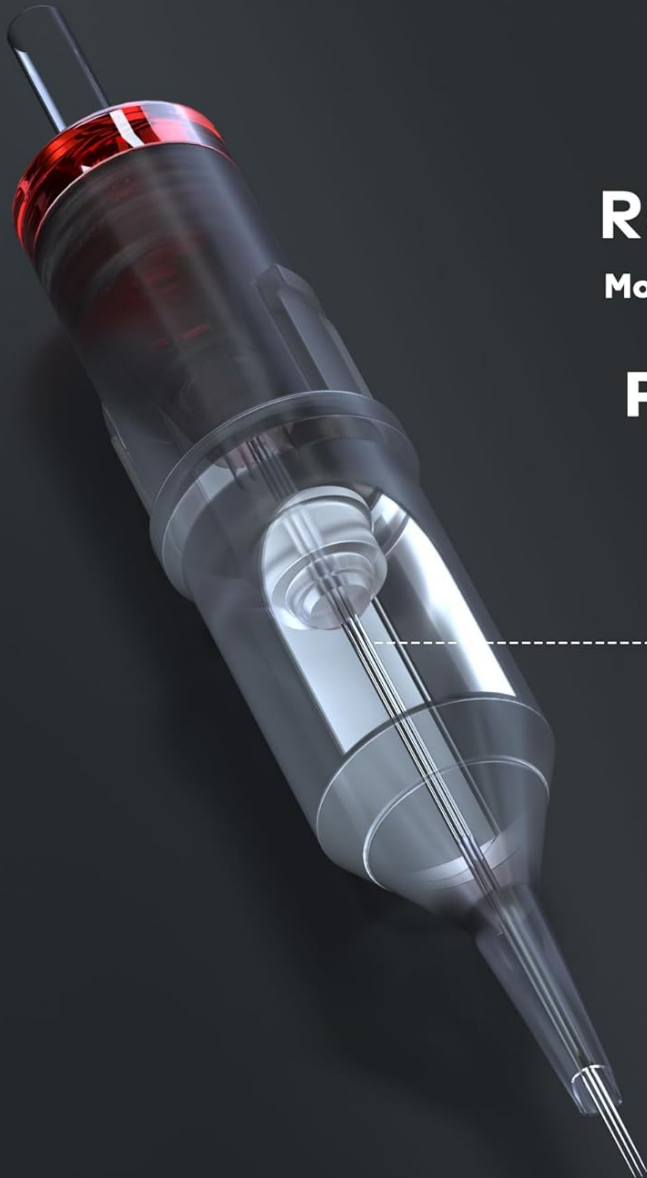

Reduce skin lesions

Monitor Rebound Frequency for Safety

Protect the machine

Precise Silicone Hardness Control

No Added Load on the Motor

The precise silicone hardness control helps reduce skin lesions and protects the tattoo machine's motor by preventing added load, ensuring a comfortable and safe tattooing experience.

4. MAINTENANCE AND DISPOSAL

Proper maintenance and disposal are crucial for hygiene and safety in tattooing.

4.1 Cleaning

As these are disposable cartridges, no cleaning of the needle itself is required. Ensure your tattoo machine and grip are cleaned and sterilized according to their respective manufacturer's instructions after each use.

4.2 Disposal

After a single use, dispose of the tattoo cartridge needle immediately in an approved sharps container. Do not attempt to reuse, dismantle, or recycle the needle cartridge to avoid injury and maintain hygienic standards. Follow all local regulations for the disposal of biohazardous waste.

5. TROUBLESHOOTING

This section addresses common issues that may arise during the use of tattoo cartridge needles.

- **Issue: Needle not seating correctly in machine.**

Solution: Ensure the cartridge is fully inserted and clicks into place. Check if your machine's grip is compatible with universal cartridge needles.

- **Issue: Poor ink flow or inconsistent lines.**

Solution: Verify that the needle is adequately dipped in ink. Check the ink consistency. Ensure the machine is operating at the correct voltage/speed for the needle type. If the cartridge is damaged, dispose of it and use a new one.

- **Issue: Ink spit-back.**

Solution: While Poseidon cartridges feature an anti-backflow membrane, excessive machine vibration or improper needle depth can still cause minor issues. Ensure your machine is well-maintained and operating smoothly. If the problem persists, replace the cartridge.

- **Issue: Needle appears bent or damaged.**

Solution: Do not use damaged needles. Immediately dispose of the faulty cartridge in a sharps container and use a new, intact one.

6. PRODUCT SPECIFICATIONS

Below are the technical specifications for the Poseidon Tattoo Cartridge Needles (Model 12CM).

Feature	Detail
Product Dimensions	9.45 x 6.69 x 4.72 inches
Weight	8.82 ounces
UPC	783710539243
ASIN	B07TP4V99M
Brand	UPTATSUPPLY
Size (Current Variant)	12CM (Curved Magnum)
Style (Current Variant)	12CM (Curved Magnum)
Water Resistance Level	Not Water Resistant
Sterilization	EO Gas, Individually Blister Packed

6.1 Needle Configuration Chart

The image above provides a detailed chart of common needle configurations, including Round Liner (RL), Round Shader (RS), Round Magnum (RM), and Magnum (M1), along with their respective taper and gauge specifications. The 50-piece assorted set includes various Curved Magnum (CM) sizes.

7. WARRANTY AND SUPPORT

For any questions regarding the UPTATSUPPLY Poseidon Tattoo Cartridge Needles, please contact your retailer or the manufacturer directly. As these are single-use, sterile products, specific warranties typically cover manufacturing defects prior to use and package integrity. Always ensure to purchase from authorized distributors to guarantee product authenticity and quality.

For further assistance, please refer to the contact information provided by your point of purchase or visit the official UPTATSUPPLY website.
