

FURIDEN Lite LM-266

FURIDEN Lite Mini Dual Voltage Curling Iron

MODEL: LM-266

User Instruction Manual

1. INTRODUCTION

Thank you for choosing the FURIDEN Lite Mini Dual Voltage Curling Iron. This compact and versatile 2-in-1 styling tool is designed for both curling and straightening, making it an ideal companion for travel and daily use. Its dual voltage capability ensures compatibility worldwide, while ceramic tourmaline technology helps protect your hair. Please read this manual thoroughly before use to ensure safe and effective operation.

2. IMPORTANT SAFETY INFORMATION

To reduce the risk of electric shock, burns, fire, or injury to persons, please observe the following:

- **Keep away from water:** Do not use this appliance near bathtubs, showers, basins, or other vessels containing water.
- **Avoid contact with skin:** The styling plates and barrel become extremely hot during use. Avoid direct contact with skin to prevent burns.
- **Unplug after use:** Always unplug the appliance immediately after use and before cleaning.
- **Temperature awareness:** This model has a fixed pre-set temperature of 450°F (232°C). Be mindful of this high temperature, especially for fine or damaged hair. Use a heat protectant spray.
- **US Plug:** This product uses a US plug. For international travel, a suitable plug adapter is required.
- **Storage:** Allow the appliance to cool completely before storing.

3. PRODUCT FEATURES

3.1. Compact & Travel-Ready Design

The FURIDEN Lite curling iron is lightweight and compact, making it ideal for international travel. Its small size allows it to fit easily into handbags and travel bags.

Image: The curling iron next to a smartphone, illustrating its compact size for easy portability.

3.2. Dual Voltage Capability

Equipped with fully automatic dual voltage (100-240V), this tool automatically detects and adjusts to foreign voltage, eliminating the need for manual intervention. Note that it uses a US plug, so a plug adapter is necessary for international outlets.

Image: Detail of the dual voltage feature and the US plug, highlighting its global compatibility with an adapter.

3.3. 2-in-1 Curling & Straightening Functionality

This versatile tool combines a straightener and curling iron. A simple slide of a button allows you to switch effortlessly

between creating soft waves or sleek, straight styles.

Video: Demonstrates the 2-in-1 functionality, showing how to switch between curling and straightening modes and achieve different hairstyles.

3.4. Ceramic Tourmaline for Healthier Hair

The ceramic tourmaline technology ensures even heat distribution, which helps reduce frizz and prevent hair damage, resulting in a smooth, shiny finish.

3.5. Fixed Heat Setting (450°F)

This model delivers salon-quality results with a powerful 450°F (232°C) pre-set heat, ideal for thick, coarse, or curly hair. No complicated settings are required for quick heat-up and effortless styling.

4. OPERATING INSTRUCTIONS

4.1. Before First Use

- Unpack the curling iron and ensure all components are present (curling iron, heat-resistant glove, travel pouch).
- Familiarize yourself with the device, including the power switch and the 2-in-1 mode selector.
- Ensure your hair is clean, dry, and free of tangles before styling. Apply a heat protectant spray, especially if you have bleached or colored hair.

4.2. Basic Operation

1. Plug the curling iron into a suitable electrical outlet. If traveling internationally, use the appropriate plug adapter.
2. Turn on the curling iron using the power switch. The indicator light will illuminate, signaling that the device is heating up.
3. Allow the iron to heat up for approximately 30 seconds until it reaches its pre-set temperature of 450°F (232°C).

4. Wear the provided heat-resistant glove on the hand that will be holding the hair sections.

4.3. Curling Hair

- 1. Ensure the mode selector is in the curling iron position (barrel closed).
- 2. Take a section of hair (approximately 1 inch wide).
- 3. Open the clamp, place the hair section between the barrel and the clamp, and close the clamp.
- 4. Wrap the hair section around the barrel, away from your face, holding the cool tip with your gloved hand.
- 5. Hold for a few seconds (adjust time based on hair type and desired curl intensity).
- 6. Release the clamp and gently slide the iron out of the curl.

4.4. Straightening Hair

- 1. Slide the mode selector to the straightening position (plates open).
- 2. Take a section of hair (approximately 1 inch wide).
- 3. Clamp the plates down on the hair section close to the roots.
- 4. Smoothly glide the iron down the length of the hair, from roots to ends.
- 5. Repeat until the desired straightness is achieved.

5. MAINTENANCE AND CARE

- Always unplug the appliance and allow it to cool completely before cleaning.
- Wipe the plates and barrel with a soft, damp cloth. Do not use abrasive cleaners or harsh chemicals.
- Do not wrap the power cord around the appliance, as this can damage the cord.
- Store the curling iron in its travel pouch in a cool, dry place.

6. TROUBLESHOOTING

Problem	Possible Cause	Solution
Appliance does not heat up.	Not plugged in correctly; Power outlet issue.	Ensure plug is fully inserted. Test with another outlet.
Hair feels damaged/burnt.	No heat protectant used; Holding iron on hair too long.	Always use heat protectant. Reduce styling time per section.
Hair not curling/straightening effectively.	Hair section too large; Incorrect mode selected.	Use smaller hair sections. Ensure correct 2-in-1 mode is selected.

7. SPECIFICATIONS
