ASHATA Wired/Bluetooth Numeric Keypad User Manual

Model: ASHATAy2sqxhokwi-01

INTRODUCTION

Thank you for purchasing the ASHATA Wired/Bluetooth Numeric Keypad. This versatile device combines the functionality of a 34-key numeric keypad with a 2-port USB 3.0 hub, offering both wired and wireless (Bluetooth) connectivity. It is designed to enhance productivity for users of computers, laptops, and Android devices. Please read this manual carefully to ensure proper use and maintenance of your new keypad.

Figure 1: ASHATA Wired/Bluetooth Numeric Keypad

This image shows the ASHATA Wired/Bluetooth Numeric Keypad from a top-down perspective, highlighting its compact design and 34-key layout. The keys are dark grey on a lighter grey base.

PACKAGE CONTENTS

- ASHATA Wired/Bluetooth Numeric Keypad
- USB Cable (Type-C to Type-C)
- User Manual (this document)

Figure 2: Keypad and Included USB Cable

This image displays the ASHATA numeric keypad alongside its included USB Type-C to Type-C cable, which is used for wired connection and charging.

SETUP

Charging the Keypad

The keypad has a built-in rechargeable battery. Before first use, it is recommended to fully charge the device.

1. Connect the provided USB Type-C cable to the Type-C port on the keypad.
2. Connect the other end of the USB cable to a powered USB port on your computer or a USB wall adapter.
3. The red indicator light will illuminate during charging and turn off when fully charged.

Battery Specifications: Battery Capacity: 110 mAh, Standby Time: 2 months, Charging Time: 2 hours.

Connecting the Keypad

The keypad supports both wired and Bluetooth connections.

Wired Connection

1. Ensure the keypad is switched ON.
2. Connect the provided USB Type-C cable to the Type-C port on the keypad.
3. Connect the other end of the USB cable to an available USB port on your computer.
4. The keypad will be automatically recognized by your operating system and ready for use. Note that the wired

connection primarily enables the USB hub function and powers the device.

Bluetooth Connection

1. Locate the ON/OFF switch on the side of the keypad and slide it to the "ON" position.
2. Press and hold the "Pairing Button" (usually located near the ON/OFF switch) for a few seconds until the blue indicator light starts blinking rapidly. This indicates the keypad is in pairing mode.
3. On your computer, laptop, or Android device, enable Bluetooth and search for new devices.
4. Select "ASHATA Keypad" or a similar name from the list of available devices.
5. Follow any on-screen prompts to complete the pairing process. The blue indicator light will become solid when successfully paired.

Figure 3: Bluetooth Pairing Example

This image illustrates the ASHATA numeric keypad wirelessly connected via Bluetooth to a laptop, demonstrating its multi-system compatibility with Windows, Android, and iOS/Mac OS.

Numeric Keypad Functionality

The 34-key layout provides a full range of numeric input keys, including 0-9, decimal point, arithmetic operators (+, -, *, /), Enter, Clear, Tab, Esc, and special function keys like Home, End, Page Up, Page Down, Insert, and Delete. These keys function identically to a standard numeric keypad on a full-sized keyboard.

Figure 4: Keypad Layout and Special Functions

This image provides a detailed view of the ASHATA numeric keypad's layout, highlighting the arrangement of its 34 keys, including numeric, arithmetic, and navigation keys.

USB Hub Functionality

The keypad features two integrated USB 3.0 expansion interfaces. These ports allow you to connect other USB devices, such as flash drives, mice, keyboards, card readers, or printers, directly through the keypad to your computer.

- **Data Transfer Speed:** Each USB 3.0 port supports data transmission speeds of up to 5Gbps.
- **Compatibility:** Compatible with a wide variety of USB devices.

To use the USB hub function, ensure the keypad is connected to your computer via the provided USB Type-C cable.

Figure 5: USB Hub in Use

This image demonstrates the ASHATA numeric keypad functioning as a USB hub, with a USB flash drive and a USB mouse connected to its two USB 3.0 ports, which are then connected to a laptop via a Type-C cable.

MAINTENANCE

- Keep the keypad clean by wiping it with a soft, dry cloth.
- Avoid using abrasive cleaners or solvents.
- Do not expose the keypad to extreme temperatures, humidity, or direct sunlight.
- Avoid dropping the device or subjecting it to strong impacts.

TROUBLESHOOTING

Problem	Possible Cause	Solution
---------	----------------	----------

Problem	Possible Cause	Solution
Keypad not responding (Bluetooth)	Low battery; Not paired; Out of range; Bluetooth interference.	Charge the keypad; Re-pair the keypad with your device; Move closer to your device; Reduce other wireless interference.
Keypad not responding (Wired)	Loose cable connection; Faulty USB port; Keypad OFF.	Ensure cable is securely connected; Try a different USB port; Turn the keypad ON.
USB Hub not working	Keypad not connected via USB cable; Device incompatibility; Power issue.	Ensure keypad is connected to computer via USB cable; Check device compatibility; Ensure sufficient power for connected devices.
Keys are sticky or unresponsive	Dirt or debris under keys.	Gently clean around and under the keys with compressed air or a soft brush.
