## Philips SPC3064BD/37

# Philips 6-Outlet Surge Protector Power Strip User Manual

Model: SPC3064BD/37

## INTRODUCTION

The Philips 6-Outlet Surge Protector Power Strip is designed to power and protect your electronic devices from unexpected power surges. Featuring six grounded AC outlets and 720 Joules of surge protection, this power strip ensures the safety of your equipment. Its automatic shutdown technology provides an additional layer of protection by cutting power to connected devices if surge protection capacity is exceeded. The 4-foot braided power cord with a flat plug offers flexibility and integrates seamlessly into various home or office environments. Convenient keyhole slots allow for secure wall mounting or discreet placement.

## PRODUCT FEATURES

- **6 Grounded AC Outlets:** Provides power for multiple devices simultaneously.
- **720 Joules Surge Protection:** Safeguards electronics from damaging power spikes.
- **Automatic Shutdown Technology:** Disconnects power when surge protection expires, preventing damage.
- **Integrated Circuit Breaker:** Protects AC outlets from overload.
- **4-Foot Braided Power Cord:** Durable, tangle-free, and designed for aesthetic integration.
- **Flat Plug:** Space-saving design allows furniture to be placed closer to the wall.
- **Keyhole Slots:** Enables easy and secure wall mounting.

## SETUP AND INSTALLATION

1. **Unpack the Device:** Carefully remove the Philips 6-Outlet Surge Protector from its packaging.
2. **Choose a Location:** Select a dry indoor location away from heat sources and direct sunlight. Ensure the 4-foot power cord can reach a wall outlet without being stretched or obstructed.
3. **Plug into Wall Outlet:** Insert the flat plug of the surge protector into a standard grounded 3-prong wall outlet. The flat design allows for placement behind furniture without obstruction.

4. **Connect Devices:** Plug your electronic devices into the six available AC outlets on the surge protector.
5. **Power On:** Press the integrated power switch to the "ON" position. A light indicator (if present) will illuminate to confirm power is supplied.
6. **Optional Wall Mounting:** If desired, use the keyhole slots on the back of the surge protector to mount it securely to a wall or under a desk. Ensure appropriate screws and anchors are used for the mounting surface (not included).

## OPERATING INSTRUCTIONS

Operating the Philips 6-Outlet Surge Protector is straightforward:

- Ensure the surge protector is properly plugged into a grounded wall outlet.
- Plug your electronic devices into any of the six available AC outlets.
- Use the integrated power switch to turn the power strip ON or OFF. When the switch is in the "ON" position, power is supplied to all connected devices.
- The surge protector will automatically shut down power to connected devices if its surge protection capacity is exceeded, indicated by the surge protection indicator light (if present) turning off.

## SAFETY INFORMATION

**WARNING: To reduce the risk of electric shock, fire, or injury:**

- Do not use in wet environments or near water.
- Do not exceed the electrical ratings of the surge protector.
- Do not use with extension cords or adapters that are not grounded.
- This device is for indoor use only.
- Do not open the housing or attempt to modify the unit. There are no user-serviceable parts inside.
- Keep children away from the surge protector and connected devices.
- If the surge protection indicator light turns off, the surge protection has expired, and the unit should be replaced.

## MAINTENANCE

- **Cleaning:** Disconnect the surge protector from the wall outlet and all connected devices before cleaning. Use a soft, dry cloth to wipe the exterior. Do not use liquid cleaners or aerosol sprays.
- **Inspection:** Periodically inspect the power cord and the surge protector for any signs of damage, such as frayed wires, cracks, or discoloration. If any damage is found, discontinue use and replace the unit.
- **Surge Protection Indicator:** Monitor the surge protection indicator light. If it is no longer illuminated, the surge protection components have absorbed a surge and the unit no longer provides surge protection. Replace the unit to ensure continued protection for your devices.

## TROUBLESHOOTING

Problem	Possible Cause	Solution
No power to devices.	Power switch is OFF.	Press the power switch to the "ON" position.
No power to devices.	Wall outlet is not functioning.	Test the wall outlet with another device or plug the surge protector into a different outlet.
No power to devices.	Circuit breaker tripped due to overload.	Unplug some devices, then reset the circuit breaker (usually a button on the side or back of the unit).
No power to devices.	Surge protection has expired.	If the surge protection indicator light is off, the unit no longer provides surge protection and should be replaced.

## SPECIFICATIONS

**Model Number:** SPC3064BD/37

**Brand:** Philips

**Total Power Outlets:** 6 AC Grounded Outlets

**Surge Protection:** 720 Joules

**Cord Length:** 4 feet (braided)

**Plug Type:** Flat Plug

**Voltage:** 240 Volts *(Note: Standard US outlets are typically 120V. Please verify local voltage compatibility.)*

**Special Feature:** Surge Protection, Integrated Circuit Breaker, Automatic Shutdown Technology

**Color:** Black

**Product Dimensions:** 1.75 x 4.45 x 11.6 inches

**Item Weight:** 15.1 ounces

**Certifications:** ETL Listed

## WARRANTY AND SUPPORT

---

This Philips 6-Outlet Surge Protector comes with a **\$75,000 Connected Equipment Warranty**. This warranty provides financial protection for equipment properly connected to the surge protector that is damaged by a power surge while the surge protector is functioning correctly.

For detailed warranty information, claims, or technical support, please refer to the official Philips product documentation included with your purchase or visit the Philips support website. You may also contact the manufacturer, Jasco Products Company, LLC, for assistance.
