- **Avoid Harsh Chemicals:** Do not use abrasive cleaners, scouring pads, or harsh chemical detergents, as these can damage the finish.
- **Regular Inspection:** Periodically check the connections and screws to ensure they remain tight and secure.

7. Troubleshooting

Problem	Possible Cause	Solution
Unit feels wobbly or unstable.	Screws are not fully tightened; uneven surface; baskets not properly seated.	Ensure all screws connecting the side frames are tightened. Check that the unit is on a flat, level surface. Verify that each basket is fully inserted and resting securely in its designated slot. Distribute items evenly within the baskets.
Baskets do not fit into slots.	Incorrect orientation of baskets or side frames; debris in slots.	Ensure the baskets are oriented correctly (front opening facing outwards). Check for any obstructions in the slots and clear them. Re-align side frames if necessary.
Scratches or damage to finish.	Rough handling during assembly or use; abrasive cleaning.	Handle with care. Use a soft cloth for cleaning. Minor scratches may be touched up with a suitable black metal paint (test in an inconspicuous area first).
