# Stariver Electric Kettle User Manual

Model: S620 | Brand: Stariver

## 1. INTRODUCTION

Thank you for choosing the Stariver Electric Kettle. This manual provides important information regarding the safe operation, maintenance, and troubleshooting of your new appliance. Please read it thoroughly before first use and keep it for future reference.

The Stariver Electric Kettle is designed for rapid boiling of water, featuring a durable borosilicate glass body, stainless steel components, and advanced safety features for a convenient and healthy experience.

## 2. PRODUCT OVERVIEW & COMPONENTS

Figure 2.1: Stariver Electric Kettle in operation, showing the blue LED illumination during boiling.

Figure 2.2: Key components and materials of the kettle, including stainless steel and borosilicate glass.

## ADVANCED SAFETY TECHNOLOGY

Figure 2.3: Advanced safety technologies integrated into the kettle design.

### Components:

- **Glass Body:** Made of high-quality borosilicate glass, resistant to thermal shock and allowing clear visibility of water level.
- **Handle:** Ergonomically designed with a cool-touch feature to prevent scalding.
- **Lid:** Features a 304 stainless steel inner lid for healthy boiling.
- **Power Base:** 360° rotational base for easy placement and cord-free serving.
- **On/Off Switch:** Located on the handle for easy operation.
- **LED Indicator:** Illuminates during the boiling process.
- **Water Level Markings:** Clearly indicates MIN (600ml), 1200ml, and MAX (2000ml) levels.

## 3. SETUP

1. **Unpack:** Carefully remove the kettle and its power base from the packaging. Retain packaging for future storage or transport.
2. **Initial Cleaning:** Before first use, fill the kettle with water to the MAX line. Boil the water, then discard it. Repeat this process 2-3 times to remove any manufacturing residues.
3. **Placement:** Place the power base on a dry, flat, stable, and heat-resistant surface. Ensure the power cord is not dangling where it can be pulled or tripped over.
4. **Power Connection:** Plug the 3-prong plug into a grounded electrical outlet.

## 4. OPERATING INSTRUCTIONS

Figure 4.1: The kettle's 2-liter capacity is suitable for various hot beverages and instant meals.

Figure 4.2: The kettle features 1000W rapid boiling for quick heating and is BPA-free.

- 1. Fill the Kettle:** Open the lid and fill the kettle with the desired amount of water. Ensure the water level is between the MIN (600ml) and MAX (2000ml) markings. Do not overfill or underfill.
- 2. Place on Base:** Position the kettle securely onto the power base.
- 3. Turn On:** Press the On/Off switch located on the handle downwards. The blue LED indicator will illuminate, signifying that the kettle is heating.
- 4. Boiling Process:** The kettle will rapidly heat the water. Once the water reaches a rolling boil, the kettle will automatically shut off, and the LED indicator will turn off.
- 5. Pouring:** Carefully lift the kettle from the power base using the cool-touch handle. Pour the hot water slowly and steadily using the stable flow spout to avoid spills.
- 6. Re-boiling:** If you need to re-boil water, wait a few moments for the internal thermostat to reset, then press the On/Off switch again.

**Safety Note:** The automatic shut-off and boil-dry protection features are designed for your safety. Do not attempt to override them.

## 5. MAINTENANCE & CLEANING

Figure 5.1: Features designed for ease of use and maintenance, including a wide opening for cleaning.

Regular cleaning will extend the life of your kettle and ensure optimal performance.

- Before Cleaning:** Always unplug the kettle from the power outlet and allow it to cool completely before cleaning.
- Exterior Cleaning:** Wipe the exterior of the kettle and the power base with a soft, damp cloth. Do not use abrasive cleaners or scouring pads.
- Interior Cleaning:** The wide opening design makes the interior easy to clean. Hand wash the interior with warm, soapy water and a soft sponge. Rinse thoroughly.
- Descaling:** Mineral deposits (limescale) may build up inside the kettle over time, especially in hard water areas. To descale:
  - Fill the kettle with a solution of equal parts water and white vinegar, or use a commercial descaling solution according to its instructions.

- Let the solution soak for at least 30 minutes, or boil it if the buildup is severe.
- Discard the solution and rinse the kettle thoroughly several times with fresh water to remove any vinegar odor or residue.

5. **Storage:** When not in use, store the kettle in a dry place. You can wrap the power cord around the base for neat storage.

**Warning: Never immerse the kettle body or the power base in water or any other liquid.**

## 6. TROUBLESHOOTING

If you encounter any issues with your Stariver Electric Kettle, please refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Kettle does not turn on or heat up.	1. Kettle not properly placed on the base. 2. Power cord not securely plugged in. 3. No power from the outlet. 4. On/Off switch not fully engaged. 5. Boil-dry protection activated (if kettle was turned on without water).	1. Ensure the kettle is seated correctly on the power base. 2. Check that the power cord is firmly plugged into a working outlet. 3. Test the outlet with another appliance or check your circuit breaker. 4. Press the On/Off switch firmly until it clicks into place. 5. Allow the kettle to cool down for 10-15 minutes, then refill with water and try again.
Water not boiling or taking too long.	1. Limescale buildup. 2. Kettle overfilled.	1. Descale the kettle as described in the Maintenance section. 2. Do not fill past the MAX line.
Kettle leaks when pouring.	Pouring too quickly or at an awkward angle.	Pour water slowly and steadily. Ensure the lid is properly closed.
Automatic shut-off not working.	Internal sensor malfunction or severe limescale buildup affecting steam detection.	Descaling may resolve the issue. If the problem persists, discontinue use and contact customer support.

If the problem persists after trying these solutions, please contact Stariver customer service for assistance.

## 7. SPECIFICATIONS

Feature	Detail
Brand	Stariver
Model Name	S620
Capacity	2 Liters

Feature	Detail
Color	Black
Material	Borosilicate Glass, 304 Stainless Steel
Product Dimensions	8.1"L x 6.1"W x 8.8"H
Item Weight	2.6 Pounds
Cable Length	21 Inches
Special Features	LED Illumination, Auto Shut-Off, Boil-Dry Protection, 360° Swivel Base, BPA-Free
UPC	787446937724
Country of Origin	China

## 8. WARRANTY & SUPPORT

Stariver is committed to providing high-quality products and excellent customer service. While specific warranty details are not provided in this manual, please retain your proof of purchase for any warranty claims.

For any questions, concerns, or support needs regarding your Stariver Electric Kettle, please contact our customer service team. Contact information can typically be found on the product packaging or on the official Stariver website.
