## 4. OPERATING INSTRUCTIONS

Always ensure your hair is clean and towel-dried before styling. Plug the appliance into a suitable power outlet.

### 4.1 General Operation

1. After attaching the desired accessory, plug the appliance into a power socket.
2. Use the power switch (usually located on the handle) to turn the appliance ON.
3. Select the desired heat/speed setting. Start with a lower setting and increase if needed.
4. After styling, turn the appliance OFF and unplug it from the power socket.
5. Allow the appliance and attachments to cool down completely before storing.

## 4.2 Using Specific Attachments

- **Concentrator Nozzle:** Directs airflow for precise drying and styling. Use with a brush for smooth, straight styles.
- **Round Brush Attachments (Large/Small):** Ideal for adding volume, waves, or curls. Wrap sections of hair around the brush and dry.
- **Half-Brush Attachment:** Suitable for smoothing and straightening hair, or for creating soft waves.
- **Curling Iron Attachment:** For creating defined curls. Wrap a section of hair around the barrel, hold for a few seconds, then release.
- **Crimper Attachment:** For creating textured, crimped hair. Place a section of hair between the plates, press firmly, hold briefly, then release.

**Note:** Always use caution when handling heated attachments to avoid burns.

## 5. MAINTENANCE AND CLEANING

Regular cleaning ensures optimal performance and extends the lifespan of your appliance.

1. Always unplug the appliance and allow it to cool completely before cleaning.
2. Wipe the main unit with a soft, damp cloth. Do not use abrasive cleaners or immerse the unit in water.
3. Remove any hair or debris from the brush attachments using a comb or brush cleaner.
4. Clean the air intake filter regularly to prevent overheating and maintain airflow. Gently remove any dust or lint.
5. Store the appliance and its attachments in a dry, safe place when not in use.

## 6. TROUBLESHOOTING

Problem	Possible Cause	Solution
Appliance does not turn on.	Not plugged in; power outlet faulty; appliance switch off.	Ensure appliance is securely plugged in. Test the outlet with another device. Turn the power switch to ON.
Low airflow or heat.	Air intake filter blocked; incorrect heat setting.	Clean the air intake filter. Select a higher heat/speed setting.
Attachments are difficult to connect/disconnect.	Incorrect alignment; debris in connection point.	Ensure proper alignment. Clean any debris from the connection points. Do not force attachments.

If the problem persists after attempting these solutions, please contact customer support.
