Hansprou f-111

Hansprou Dog Clippers Instruction Manual

Model: f-111

INTRODUCTION

This manual provides comprehensive instructions for the safe and effective use, maintenance, and troubleshooting of your Hansprou 12V Pet Hair Clipper. Designed for professional heavy-duty pet grooming, this corded trimmer is suitable for various pets, including dogs and cats, and is especially effective on thick coats.

SAFETY INFORMATION

Always keep the trimmer away from water sources and do not use it on infants. Use with caution to avoid skin irritation and ensure the safety of the pet by using the adjustable shift and guard combs for controlling hair length.

PRODUCT FEATURES

- **12V High-Speed Strong Power Motor:** Provides robust and stable power for fast and smooth trimming without hair sticking. Plug and play operation, no charging required.
- **High Quality Titanium Alloy Blade + Ceramic Moving Blade:** Offers excellent cutting performance. The special 35-tooth cutter heads are designed to be sharper, more durable, and more efficient, preventing hair pulling. Detachable blades allow for easy changing and cleaning.

- **Low Vibration + Ultra Quiet Design:** Operates at approximately 50 dB, helping pets feel at ease and reducing fear during grooming.
- **10 Guard Combs + 5 Levels Shift:** Two adjusting modes are available for various hair lengths. The 5-level adjustable shift (0.8-2mm) and guard combs (1-18mm) allow for precise length control.
- **Aluminum Alloy Fuselage:** The body is constructed from aluminum alloy, providing a comfortable feel, enhanced durability, and an anti-skid pattern for a secure grip.

PACKAGE CONTENTS

Your Hansprou Dog Clipper package typically includes:

- Hansprou 12V Pet Hair Clipper (Rose Gold)
- Power Cord
- Guard Combs (various sizes, e.g., 3mm, 6mm, 9mm, 12mm)
- Cleaning Brush
- Lubricating Oil

SETUP

1. **Unpack:** Carefully remove all components from the packaging.
2. **Inspect:** Check the clipper and accessories for any signs of damage.

3. **Connect Power:** As a corded electric device, plug the clipper directly into a suitable power outlet. Ensure the voltage matches your region's standard.
4. **Attach Guard Comb (Optional):** Select the desired guard comb (e.g., 3mm, 6mm, 9mm, 12mm) and securely attach it to the clipper head. For shorter cuts, the clipper can be used without a guard comb, adjusting the 5-level shift.

OPERATING INSTRUCTIONS

General Grooming Steps:

Image: A visual guide to preparing your pet for grooming, including bathing, trimming knots, and combing before using the clipper.

1. Prepare Your Pet:

- **Bathe and Dry:** Ensure your pet is clean and completely dry before grooming. Dirt and tangles can dull blades and hinder performance.
- **Trim Knotted Hair:** Use scissors to carefully trim any large, stubborn knots or mats that the clipper might struggle with.
- **Comb Hair:** Thoroughly comb your pet's hair to remove loose fur and minor tangles, ensuring a smooth surface for clipping.

2. Power On:

Press the power button located on the clipper body to turn it on.

3. Adjust Length:

- For longer cuts, attach one of the provided guard combs (3mm, 6mm, 9mm, 12mm).
- For shorter cuts or blending, use the 5-level adjustable shift ring on the clipper body to select a length between 0.8mm and 2mm. Rotate the ring to adjust the cutter head position.

4. Begin Grooming:

- Hold the clipper firmly and move it smoothly against the direction of hair growth for an even cut.
- Work in small sections, ensuring the blades do not overheat. Take breaks if necessary.
- Pay attention to sensitive areas and use appropriate guard combs to prevent accidental nicks.

5. Power Off:

Once grooming is complete, press the power button to turn off the clipper and unplug it from the power outlet.

MAINTENANCE

1. Cleaning Blades:

- After each use, detach the blades by gently pushing them off the clipper body.
- Use the provided cleaning brush to remove any trapped hair from the blades and the clipper head.
- Wipe the blades and clipper body with a clean, dry cloth. Do not rinse the clipper body under water.

2. **Lubricating Blades:**

- Apply a few drops of the included lubricating oil to the blades before and after each use.
- Turn on the clipper for a few seconds to allow the oil to distribute evenly across the blades. This helps maintain sharpness and smooth operation.

3. **Storage:** Store the clipper and its accessories in a clean, dry place, away from direct sunlight and extreme temperatures.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Clipper not turning on.	Not properly plugged in; power outlet issue.	Ensure the power cord is securely plugged into both the clipper and a working electrical outlet. Test the outlet with another device.
Hair sticking or pulling.	Blades are dull or clogged with hair; pet's hair is matted or dirty.	Clean blades thoroughly. Ensure pet's hair is clean, dry, and free of mats before grooming. Apply lubricating oil to blades.
Clipper is noisy or vibrating excessively.	Blades need lubrication; foreign object in blades.	Apply lubricating oil to the blades. Check for and remove any debris caught between the blades. If the issue persists, contact customer support.
Uneven cutting.	Guard comb not properly attached; inconsistent grooming technique.	Ensure the guard comb is securely attached. Maintain a consistent angle and pressure while grooming. Comb hair frequently.
