

Versa G096-BLACK

Versa Quad Watch Winder with Light (Model G096-BLACK) - Instruction Manual

Your guide to setting up and operating your Versa automatic watch winder.

INTRODUCTION

Thank you for choosing the Versa Quad Watch Winder with Light. This automatic watch winder is designed to keep your automatic watches wound and ready to wear. It features independent settings for each watch, a built-in smart timer, and an interior LED light. Please read this manual carefully before operating the device to ensure proper use and longevity.

SAFETY INFORMATION

- Ensure the power adapter is compatible with your local voltage (110-240V).
- Do not expose the watch winder to water or excessive humidity.
- Keep the device away from direct sunlight and extreme temperatures.
- Do not attempt to disassemble or repair the unit yourself. Contact customer support for assistance.
- Place the watch winder on a stable, flat surface to prevent tipping.

PACKAGE CONTENTS

- Versa Quad Watch Winder with Light
- Power Adapter (110-240V)
- Adjustable Watch Pillows (4 units)
- User Manual

PRODUCT OVERVIEW

The Versa Quad Watch Winder is designed for optimal care of up to four automatic watches. Each winder operates independently, allowing for customized settings tailored to individual watch requirements. The unit features a sleek design with a clear viewing window and an optional blue LED interior light.

Key Features:

- **Independent Control:** Each of the four watch holders can be set individually for rotation direction and Turns Per Day (TPD).
- **Adjustable Watch Pillows:** Spring-action pillows accommodate various watch sizes, with additional adapters for larger watches.
- **Blue LED Interior Light:** Can be switched on or off independently.
- **Japanese Mabuchi Motor:** Ensures quiet operation and no magnetization to protect your watches.

- **Smart Timer:** Winds, rests, and repeats the cycle in selected directions (clockwise, counter-clockwise, or bi-directional).

SETUP

1. **Unpack:** Carefully remove the watch winder and all accessories from the packaging.
2. **Power Connection:** Connect the provided power adapter to the DC-IN port on the back of the winder and then plug it into a power outlet.
3. **Watch Placement:**
 - Adjust the watch pillow to fit your watch securely. For smaller watches, remove the outer layer of the pillow. For larger watches, ensure the pillow is fully expanded.
 - Place your automatic watch onto the adjusted pillow.
 - Insert the watch and pillow assembly into one of the four rotating slots. Ensure it clicks securely into place.

OPERATING INSTRUCTIONS

The Versa Quad Watch Winder offers independent control for each of its four winding stations. This allows you to customize the winding program for each watch based on its specific requirements.

Figure 5: Rear control panel with individual settings for each winder.

Setting Winding Programs:

Each winder has dedicated switches on the back panel for setting its operation:

1. **Rotation Direction:** Use the toggle switch to select the desired rotation direction: Clockwise (CW), Counter-Clockwise (CCW), or Bi-directional (BD).
2. **Turns Per Day (TPD):** Use the rotary switch to select the appropriate TPD setting for your watch. Common settings include 650, 850, 1050, and 1250 TPD. Refer to your watch manufacturer's recommendations for optimal TPD.
3. **LED Light Control:** A separate button on the back panel controls the blue LED interior light, allowing you to turn it on or off as desired.

Smart Timer Function:

The winder operates on a smart timer cycle: it will wind for a set period, then rest, and repeat the cycle. This prevents over-winding and ensures optimal watch performance.

Important Note:

Watch winders are designed to maintain the charge of an already running automatic watch. If your watch has stopped, manually wind it first to get it running before placing it in the winder. The winder will then keep it wound.

MAINTENANCE

- **Cleaning:** Use a soft, dry cloth to wipe the exterior of the watch winder. Avoid abrasive cleaners or solvents.
- **Watch Pillows:** Periodically check the watch pillows for wear and tear. Replace if necessary to ensure proper watch support.
- **Placement:** Keep the winder in a dust-free environment to prevent particles from entering the mechanism.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Winder is not operating.	No power, or power switch is off.	Ensure the power adapter is securely plugged in and the power switch on the back is turned on.
Watch is not winding.	Incorrect TPD/direction setting, or watch is completely stopped.	Verify TPD and direction settings match your watch's requirements. Manually wind the watch first if it has completely stopped.
Winder makes unusual noise.	Improper watch placement, or internal issue.	Ensure watches are securely seated in the pillows and slots. If noise persists, contact customer support.
LED light is not working.	LED light switch is off.	Press the LED light button on the back panel to turn it on.

SPECIFICATIONS

Model Name	Quad Watch Winder with Light
