2. SETUP GUIDE

Setting up your Nixplay Smart Digital Picture Frame is a straightforward process designed for ease of use. Follow these simple steps to get your frame up and running quickly:

1. **Download the Nixplay App:** Begin by downloading the Nixplay app on your iOS or Android smartphone. The app provides full control over your frame.

2. **Plug In the Frame:** Connect the power adapter to your frame and plug it into a power outlet. The frame will power on automatically.

3. **Follow On-Screen Instructions:** The frame's display will guide you through connecting to your WiFi network and linking it to your Nixplay account created via the app.

4. **Invite Family and Friends:** Once connected, you can invite multiple users to upload photos and videos to your frame, fostering a shared family experience.

Effortless Setup & Sharing

1 Download our app

2 Add frame to Your account

**3** Invite friends & family

3. OPERATING INSTRUCTIONS

The Nixplay frame offers a variety of features to enhance your photo and video viewing experience. Manage your content and frame settings directly from the Nixplay mobile app or through the web interface.

Adding and Sharing Content

Easily connect and transfer photos and videos from various sources such as Apple Photos, Facebook, Instagram, and Google Photos (subscription may be required for Google Photos). You can also email photos directly to the frame. The app allows you to send unique photos or playlists to separate frames, perfect for sharing with different family members.

Share & Connect
From Anywhere in the World

Have full control of your frame from your smartphone wth the Nixplay app.

Smart Features

- **AI-Enhanced Display:** Experience perfectly centered images with AI-driven smart-centering. The frame also features automatic rotation, seamlessly switching between landscape and portrait modes for dynamic content display.

- **Motion Sensor:** The smart motion sensor automatically turns the frame on or off when you enter or leave the room, conserving energy and ensuring your memories are displayed when you're present.

- **NixCast:** Effortlessly cast photos and videos from your Nixplay app to your smart TV.

- **NixEvents:** This feature allows guests at events to easily contribute their photos to a shared album, creating real-time slideshows.

Figure 4: The Nixplay frame features intelligent AI for face framing and a smart motion sensor for convenient power management.

Audio and Design

The frame boasts a sophisticated design with built-in stereo speakers, making it ideal for video playback. Its sleek profile and black finish allow it to blend seamlessly with any home decor.

Figure 5: The sophisticated design of the Nixplay frame includes integrated stereo speakers for enhanced video playback.

4. MAINTENANCE

To ensure the longevity and optimal performance of your Nixplay Smart Digital Picture Frame, regular maintenance is recommended:

- **Cleaning the Screen:** Use a soft, lint-free cloth to gently wipe the screen. For stubborn smudges, slightly dampen the cloth with water or a screen-safe cleaner. Avoid abrasive materials or harsh chemicals.
- **Cleaning the Frame:** Wipe the frame's exterior with a dry, soft cloth.
- **Dusting:** Regularly dust the frame and its surroundings to prevent dust buildup in vents or around connections.

- **Placement:** Place the frame in a location away from direct sunlight, extreme temperatures, and high humidity to prevent damage to the display and internal components.

5. TROUBLESHOOTING

If you encounter any issues with your Nixplay Smart Digital Picture Frame, try the following troubleshooting steps:

- **Frame Not Turning On:** Ensure the power adapter is securely connected to both the frame and a working power outlet. Try a different outlet if necessary.

- **No Display/Blank Screen:** Check if the motion sensor is enabled and if there is movement in the room. If the frame is set to a sleep schedule, verify the current time. A simple restart by unplugging and re-plugging the power adapter can often resolve display issues.

- **Cannot Connect to WiFi:** Verify your WiFi password. Ensure the frame is within range of your router. Try restarting your router and the frame. If issues persist, check the Nixplay app for network diagnostic tools.

- **Photos Not Appearing:** Confirm that photos have been successfully uploaded to your playlists in the Nixplay app. Check your internet connection. Ensure the correct playlist is selected for display on the frame.

- **Poor Image Quality:** Ensure the uploaded photos are of high resolution. The frame's AI-enhanced features optimize display, but low-resolution source images will appear pixelated.
