TESSAN TS-AP2U-IN

TESSAN US to India Type D Travel Power Adapter

Model: TS-AP2U-IN

Introduction

This manual provides essential information for the safe and effective use of your TESSAN US to India Type D Travel Power Adapter. Please read these instructions carefully before use and retain for future reference.

Safety Instructions

IMPORTANT: This is NOT a voltage converter. This adapter is designed for use with dual voltage devices (100V to 250V). It will not convert 220V to 110V or vice versa. Ensure your electronic devices are compatible with the local voltage (typically 220V-240V in Type D countries) before plugging them into this adapter. Failure to do so may result in damage to your device or personal injury.

Always check the voltage requirements of your device before use. High-power appliances such as hair dryers, straighteners, curling irons, and electric razors often require a voltage converter, not just an adapter. Verify your device's voltage range printed on the product or its power adapter.

Do not expose the adapter to liquids, extreme temperatures, or direct sunlight. Do not disassemble or attempt to repair the adapter. Keep out of reach of children.

Image: Important warning regarding voltage conversion. The image shows the adapter with a red warning text stating it is not a voltage converter and advises checking device voltage. Below are crossed-out icons for a hair dryer, straightener, electric toothbrush, and razor, indicating these devices may not be compatible without a voltage converter.
