SETUP GUIDE

Connecting Your Monitor

The ZSCMALLS Portable Monitor offers versatile connectivity options. Ensure your device supports video output via USB-C (DisplayPort Alternate Mode) or HDMI.

1. Power Connection

Connect the provided Power Charger to the monitor's USB-C power input port. A red indicator light will illuminate when power is supplied.

2. Video Connection Options

Option A: USB-C (Single Cable Solution)

For devices with a full-featured USB-C port (supporting power and video output), use the provided Type-C to Type-C cable. Connect one end to your device's USB-C port and the other to the monitor's USB-C video input port. This single cable can provide both power and video signal.

Rich Ports To Support Multiple Devices

Work Perfectly with Laptop/tablet, PC, Phone, Switch/PS4/Xbox.etc.

Option B: Mini-HDMI (Video Only)

Use the provided Mini-HDMI to HDMI cable. Connect the Mini-HDMI end to the monitor's Mini-HDMI port and the HDMI end to your device's HDMI port. Note that this connection only transmits video; you will need to connect the USB-C power cable separately for power.

3. Using the Smart Cover Case

The included smart cover case can be folded into three different positions to serve as a stand, providing comfortable viewing angles for various uses.

CARE AND MAINTENANCE

- To clean the screen, gently wipe with a soft, lint-free cloth. Do not use abrasive cleaners or solvents.
- Avoid exposing the monitor to extreme temperatures, humidity, or direct sunlight.
- Store the monitor in its smart cover case when not in use to protect the screen from scratches and dust.

TROUBLESHOOTING

No Signal / Black Screen

- Ensure the power adapter is securely connected and the power indicator light is on.
- Verify that the video cable (USB-C or Mini-HDMI) is correctly connected to both the monitor and your device.
- Try a different cable or port on your device if available.

- Check your device's display settings to ensure it is configured to output to an external monitor (e.g., Extend, Duplicate, Second Screen Only).
- Restart your connected device.

Flickering Screen

- Ensure the power supply is stable and sufficient. Some devices may require additional power for the monitor.
- Try a different video cable.
- Adjust the refresh rate or resolution settings on your connected device.

No Sound or Low Volume

- Check the volume settings on both the monitor's OSD menu and your connected device.
- Ensure the audio output is directed to the portable monitor.
- If using Mini-HDMI, ensure your device is sending audio through HDMI.

Power Port Faulty

- If the power port is loose or requires holding the cable to maintain connection, this indicates a potential hardware issue.
- Contact ZSCMALLS customer support for technical assistance or replacement.
