Hikenture Double Sleeping Pad (Full XL Navy Pumpsack) - Instruction Manual

PRODUCT OVERVIEW

The Hikenture Double Sleeping Pad is designed to provide bed-like comfort for two people during outdoor activities such as camping, backpacking, and hiking. Featuring a 4-inch extra-thick design, it ensures you never touch the hard ground, offering cozy and solid cushioning for all sleeping positions. This inflatable and ultralight mattress is constructed from durable polyester pongee with TPU lamination, making it waterproof and tear-resistant. It includes a 40L high-volume pumpsack for quick inflation and is designed for easy deflation and compact storage.

- **4-inch Extra-Thick Comfort:** Provides substantial cushioning to keep you off the ground.
- **Double Size:** Generous dimensions of 79 x 55 inches comfortably accommodate two adults.
- **Integrated Pumpsack:** Inflates swiftly in 6-8 pumps without the need for external pumps.
- **Ultralight & Compact:** Weighs only 4 lbs and packs down to 15x7 inches for easy transport.
- **Durable & Waterproof:** Made from polyester pongee with TPU lamination for long-lasting use in various outdoor conditions.

SETUP GUIDE

1. Unpacking and Preparation

Remove the sleeping pad from its carry bag. Unroll the pad completely and lay it flat on the ground where you intend to use it. Ensure the area is clear of sharp objects.

Feels Like Sleep In Your Bed

2. Inflation (Pumpsack Method)

The Hikenture Double Sleeping Pad comes with an integrated 40L pumpsack for convenient inflation. Locate the inflation valve on the pad. Attach the pumpsack securely to the valve. Open the pumpsack to capture air, then roll down the opening to trap the air inside. Press the pumpsack to force air into the sleeping pad. Repeat this process 6-8 times until the pad reaches your desired firmness. Close the valve tightly once inflated.

3. Inflation (Electric Air Pump Method - Optional)

For faster inflation, an external electric air pump (not included) can be used. Locate the inflation valve on the pad. Open the valve and connect your electric air pump nozzle. Turn on the pump and inflate until the pad reaches your desired

firmness. Disconnect the pump and close the valve tightly.

4. Deflation

To deflate the pad, locate the deflation valve. Open the valve completely to allow air to escape. You can gently roll the pad from the end opposite the valve to push out any remaining air. Once fully deflated, fold or roll the pad tightly and secure it with the included straps before placing it back into the carry bag.

OPERATING INSTRUCTIONS

1. Comfort Adjustment

The firmness of the sleeping pad can be adjusted to your preference. For a softer feel, release a small amount of air from the valve. For a firmer feel, add more air using the pumpsack or an external pump. Experiment to find your ideal comfort level.

2. Usage Environment

This sleeping pad is suitable for various outdoor environments including grass, soil, sand, and rocky terrains. Its 4-inch thickness provides excellent insulation and comfort, keeping you elevated from cold or uneven ground. Always ensure the surface is free of sharp objects to prevent punctures.

CARE AND MAINTENANCE

1. Cleaning

To clean the sleeping pad, wipe it down with a damp cloth and mild soap. Avoid using harsh chemicals or abrasive cleaners, as these can damage the material. Ensure the pad is completely dry before storing to prevent mold or mildew.

growth.

2. Storage

After use, fully deflate the pad, roll it tightly, and place it back into its original carry bag. Store the pad in a cool, dry place away from direct sunlight and extreme temperatures. Proper storage helps maintain the integrity and lifespan of the material.

TROUBLESHOOTING

1. Loss of Air

If the sleeping pad loses air, first ensure all valves are securely closed. Check the surface of the pad for any punctures or leaks. A repair patch kit is included for minor damages. Apply the patch according to the kit's instructions. For significant damage, contact customer support.
