GAME 14030-BB

GAME Solar Digital Pool & Spa Floating Thermometer (Model 14030-BB) User Manual

Model: 14030-BB

INTRODUCTION

This manual provides essential instructions for the proper setup, operation, and maintenance of your GAME Solar Digital Pool & Spa Floating Thermometer. Designed for accuracy and ease of use, this solar-powered thermometer displays water temperature in both Fahrenheit and Celsius on an oversized, double-sided LCD screen. Its durable, shatter-resistant construction makes it suitable for various water environments, including swimming pools, hot tubs, and spas.

PRODUCT FEATURES

- **Solar Powered:** Operates without batteries, utilizing solar energy for continuous charging.
- **Large, Easy-to-Read Display:** Features an oversized, double-sided LCD screen with angled viewing for clear temperature readings from a distance.
- **Temperature Units:** Easily switch between Fahrenheit (°F) and Celsius (°C) with a dedicated button.
- **Accurate Readings:** Designed to immerse 5 inches below the water's surface for precise temperature measurement.
- **Durable Construction:** Made from high-quality, shatter-resistant materials for longevity in aquatic environments.
- **Integrated Tether:** Includes a durable tether to secure the thermometer and prevent it from drifting into skimmer baskets or other pool equipment.

SETUP

1. **Unpack:** Carefully remove the thermometer from its packaging.
2. **Initial Charge:** Place the thermometer in direct sunlight for several hours to ensure the internal solar battery is sufficiently charged before first use. The display should activate automatically.
3. **Unit Selection:** Locate the blue button on the thermometer. Press this button to toggle between Fahrenheit (°F) and Celsius (°C) display modes.
4. **Deployment:** Gently place the thermometer into your pool, spa, or pond. Ensure it floats freely.
5. **Secure (Optional):** If desired, attach the included tether to a secure point on the edge of your pool or spa to prevent the thermometer from moving excessively or entering filtration systems.

OPERATING INSTRUCTIONS

The GAME Solar Digital Pool & Spa Floating Thermometer is designed for continuous, automatic operation once deployed. The solar panel keeps the device powered, eliminating the need for battery replacement.

- **Reading Temperature:** The current water temperature will be displayed on the oversized LCD screen. The double-sided display allows for easy viewing from multiple angles.
- **Changing Temperature Units:** To switch between Fahrenheit (°F) and Celsius (°C), press the blue button located on the top of the thermometer.
- **Optimal Placement:** For the most accurate readings, allow the thermometer to float freely in the water, ensuring the temperature probe is submerged to its intended depth of 5 inches.

MAINTENANCE

- **Cleaning:** The thermometer should be cleaned by hand only. Use a soft cloth and mild soap if necessary. Avoid abrasive cleaners or harsh chemicals that could damage the plastic casing or solar panel.
- **Storage:** During periods of non-use, especially in colder climates to prevent freezing damage, remove the thermometer from the water, clean it, and store it in a dry place away from direct sunlight.
- **Tether Inspection:** Periodically check the tether for any signs of wear or damage. Replace if necessary to ensure the thermometer remains securely anchored.

TROUBLESHOOTING

Problem	Possible Cause	Solution
---------	----------------	----------

Problem	Possible Cause	Solution
Display is blank or dim.	Insufficient solar charge.	Place the thermometer in direct sunlight for several hours to recharge the internal battery.
Inaccurate temperature readings.	Thermometer not fully submerged or placed in an area with inconsistent water flow.	Ensure the thermometer is floating freely and the probe is submerged to the recommended 5-inch depth. Move to a central area of the pool/spa.
Water inside the display or casing.	Seal compromise or manufacturing defect.	Remove from water immediately. Allow to dry completely. If the issue persists, contact customer support for warranty assistance.
Thermometer drifts into skimmer.	Tether not used or improperly secured.	Utilize the included tether and secure it to a fixed point to prevent movement.

SPECIFICATIONS

Model Number: 14030-BB

Power Source: Solar Powered

Display Type: Digital LCD, Double-Sided

Temperature Units: Fahrenheit (°F) / Celsius (°C)

Immersion Depth: 5 Inches (approx. 12.7 cm)

Material: Shatter-resistant Plastic

Item Length: 10.25 Inches (approx. 26 cm)

Item Weight: 12.4 ounces (approx. 351.5 grams)

Included Components: Solar Digital Thermometer, Tether

Indoor/Outdoor Usage: Outdoor

WARRANTY INFORMATION

This GAME product is covered by a **90-Day Manufacturer's Warranty** from the date of purchase. This warranty covers defects in materials and workmanship under normal use. It does not cover damage resulting from misuse, accident, alteration, neglect, or unauthorized repair.

Please retain your proof of purchase for any warranty claims.

CUSTOMER SUPPORT

For technical assistance, warranty claims, or any questions regarding your GAME Solar Digital Pool & Spa Floating Thermometer, please contact GAME customer service directly.
