## MSpa D-SC04

# MSPA D-SC04 Silver Cloud Portable Inflatable Spa User Manual

Model: D-SC04 | Brand: MSpa

## INTRODUCTION

Welcome to the MSpa D-SC04 Silver Cloud Portable Inflatable Spa User Manual. This manual provides essential information for the safe and efficient operation, setup, maintenance, and troubleshooting of your MSpa D-SC04 Silver Cloud inflatable spa. Please read this manual thoroughly before installation and use to ensure proper function and longevity of your product.

## SAFETY INFORMATION

Always adhere to the following safety guidelines to prevent injury or damage to the spa.

- Do not operate the spa if it is damaged or malfunctioning.
- Ensure the spa is placed on a flat, stable surface capable of supporting its full weight when filled with water and occupants.
- Keep children under supervision at all times when near the spa.
- Do not use electrical appliances near the spa.
- Maintain proper water chemistry to prevent skin irritation and equipment damage.
- Disconnect power before performing any maintenance or cleaning.

## PACKAGE CONTENTS

---

Verify that all items listed below are present in your package:

- Inflatable Spa Unit (Silver Cloud model)
- Rhino-Tech PVC Cover
- PVC Liner
- Lightweight Control Panel
- Filtration Pump
- Air Jets (118-132 jets)
- Massage Air Blower
- Heater
- Pressure Gauge
- Garden Hose Adapter
- Inflation Hose
- Digital Lock
- Instruction DVD
- User Manual

## SETUP

---

Follow these steps for initial setup of your MSpa D-SC04.

1. **Site Selection:** Choose a flat, level surface outdoors or indoors that can support the weight of the filled spa (approximately 700 liters of water plus occupants). Ensure adequate drainage.
2. **Unpacking:** Carefully remove all components from the packaging. Spread the ground cloth (if included) or a protective mat on the chosen site.
3. **Inflation:** Connect the inflation hose to the spa's air valve and the inflation port on the control unit. Use the self-inflation feature to inflate the spa until it is firm to the touch but not over-inflated.

Image: A woman relaxing comfortably in the MSPA D-SC04 inflatable spa, demonstrating its spacious interior and inviting atmosphere.

4. **Control Unit Connection:** Attach the control unit to the spa. Ensure all connections are secure.
5. **Filter Installation:** Install the filter cartridge into the designated filter housing inside the spa.

Image: A close-up of a woman enjoying the MSPA D-SC04 spa, highlighting the relaxing experience provided by the bubble jets.

6. **Filling with Water:** Fill the spa with fresh water using a garden hose. Fill to the indicated minimum and maximum water lines. The capacity is approximately 700 liters (184 gallons).

Image: An interior view of the MSPA D-SC04 spa, showing the filter cartridge and the clearly marked minimum and maximum water fill lines.

7. **Power Connection:** Plug the spa into a standard electrical outlet. Do not use extension cords.

## OPERATING INSTRUCTIONS

---

Your MSpa D-SC04 features a user-friendly control panel for easy operation.

Image: The lightweight, handheld control panel for the MSPA D-SC04, displaying its digital screen and function buttons.

- **Power On/Off:** Press the power button on the control panel to turn the spa on or off.
- **Heating Function:** Press the 'Heater' button to activate the heating system. The water temperature can be set up to 36°C (96.8°F). Use the 'Up' and 'Down' arrows to adjust the desired temperature. Heating time will vary based on ambient temperature and initial water temperature.
- **Bubble Function:** Press the 'Bubble' button to activate the 118-132 air jets for a bubbling massage. Press again to turn off.
- **Filtration System:** The filtration system operates automatically to keep the water clean. Press the 'Filter' button to manually turn the filtration on or off.
- **Timer Function:** Use the 'Timer' button to set a delayed start for the heating function or to set the duration of operation. Refer to the control panel's specific instructions for detailed timer programming.

## MAINTENANCE

---

Regular maintenance is crucial for the longevity and hygiene of your MSpa D-SC04.

- **Filter Cartridge Cleaning/Replacement:** The filter cartridge should be cleaned regularly (e.g., daily or every other day depending on usage) by rinsing with a garden hose. Replace the filter cartridge every 1-2 weeks or when it appears worn or clogged.
- **Water Chemistry:** Test the spa water regularly (daily or weekly) using test strips. Adjust pH, alkalinity, and sanitizer levels as needed to maintain balanced and safe water. Consult a pool/spa chemical guide for recommended levels.
- **Water Replacement:** It is recommended to drain and refill the spa water every 1-3 months, depending on usage and water quality.
- **Spa Cleaning:** Clean the interior and exterior of the spa regularly with a soft cloth and mild, non-abrasive cleaner. Do not use harsh chemicals.
- **Cover Care:** Keep the spa cover clean and free of debris. Ensure it is securely fastened when the spa is not in use to retain heat and prevent contamination.

Image: The MSPA D-SC04 spa with its protective cover securely in place, situated in a lush green garden, demonstrating its outdoor suitability.

- **Storage:** When storing the spa for an extended period, ensure it is completely drained, cleaned, and dry. Deflate and fold neatly, storing in a cool, dry place away from direct sunlight and extreme temperatures.

## TROUBLESHOOTING

Refer to this section for common issues and their solutions.

Problem	Possible Cause	Solution
Spa not heating	Heater not activated; low water level; dirty filter; ambient temperature too low.	Ensure heater is on; check water level and refill if necessary; clean or replace filter; ensure spa is in an appropriate environment.
Bubbles not strong enough	Air blower issue; low power.	Check power connection; ensure air blower is clear of obstructions.
Water cloudy/dirty	Dirty filter; unbalanced water chemistry; insufficient filtration time.	Clean or replace filter; test and adjust water chemistry; ensure filtration runs for adequate periods.
Spa losing air	Loose valve cap; small puncture.	Tighten valve cap; locate and repair puncture using the included repair kit.
