KastKing Brutus 30

KastKing Brutus Spincast Fishing Reel Model 30 Instruction Manual

Model: Brutus 30

INTRODUCTION

Thank you for choosing the KastKing Brutus Spincast Fishing Reel, Model 30. This manual provides essential information for the proper setup, operation, maintenance, and troubleshooting of your new fishing reel. Please read these instructions carefully before use to ensure optimal performance and longevity of your product.

KEY FEATURES

- **High Performance Dual Pickup System:** Stainless-steel system designed to quickly grab slack line.
- **High Speed Gear Ratio:** 4.0:1 gear ratio for faster line retrieval.
- **Smooth and Durable:** Equipped with 5 Stainless-Steel, double shielded ball bearings for smooth operation.
- **Reversible Handle:** Aluminum, double paddle handle with durable rubber grips, easily changeable for left- or right-hand retrieve.
- **Pre-Spooled Line:** Comes pre-spoiled with 160 yards of 10 lb test KastKing Premium Monofilament fishing line.
- **Smooth Drag:** Provides 11 lbs of smooth drag.
- **Durable Construction:** Features a graphite frame and aluminum components.

SETUP

1. Attaching the Reel to a Fishing Rod

1. Align the reel foot with the reel seat on your fishing rod.
2. Tighten the reel seat nut securely to ensure the reel is firmly attached and does not wobble.

2. Adjusting Handle for Left or Right Retrieve

The KastKing Brutus Spincast Reel features a reversible handle, allowing for both left- and right-hand retrieve.

1. Locate the handle retainer cap on the side opposite to the current handle position.
2. Unscrew and remove the handle retainer cap.
3. Pull the handle shaft out from the reel body.
4. Insert the handle shaft into the desired side of the reel body.
5. Securely screw the handle retainer cap back into place on the opposite side to lock the handle.

DUAL HANDLE KNOBS

REVERSIBLE RETRIEVE LEFT/RIGHT

Image: The KastKing Brutus Spincast Fishing Reel highlighting its dual handle knobs and reversible retrieve feature, showing how the handle can be positioned for either left or right-handed use.

3. Line Management

Your KastKing Brutus Spincast Reel comes pre-spooled with 160 yards of 10 lb test KastKing Premium Monofilament fishing line, making it ready for immediate use. No additional spooling is required before your first fishing trip.

OPERATING INSTRUCTIONS

1. Casting with the Push Button Design

1. Hold the rod and reel comfortably.
2. Press and hold the push button located on the rear of the reel. This disengages the line pickup.
3. Swing the rod forward in a smooth motion, releasing the push button at the peak of your forward cast to allow the line to fly freely.
4. As soon as your lure hits the water, begin to turn the handle to re-engage the line pickup and prepare for retrieval.

Image: A person demonstrating the push-button casting technique with the KastKing Brutus Spincast Fishing Reel mounted on a rod.

2. Line Retrieval

To retrieve your line, simply turn the handle in the appropriate direction (clockwise for right-hand retrieve, counter-clockwise for left-hand retrieve). The 4.0:1 high-speed gear ratio ensures efficient line pickup.

3. Adjusting the Drag

The drag system controls the amount of resistance the line experiences when a fish pulls on it, preventing line breakage. Your Brutus reel offers 11 lbs of smooth drag.

1. Locate the drag adjustment knob, typically found on the top or side of the reel.
2. Turn the knob clockwise to increase drag tension (more resistance).
3. Turn the knob counter-clockwise to decrease drag tension (less resistance).
4. Adjust the drag setting based on the line strength and the size of the fish you are targeting. A good starting point is to set the drag to about one-third of your line's breaking strength.

HIGH SPEED GEAR RATIO:
4.0:1

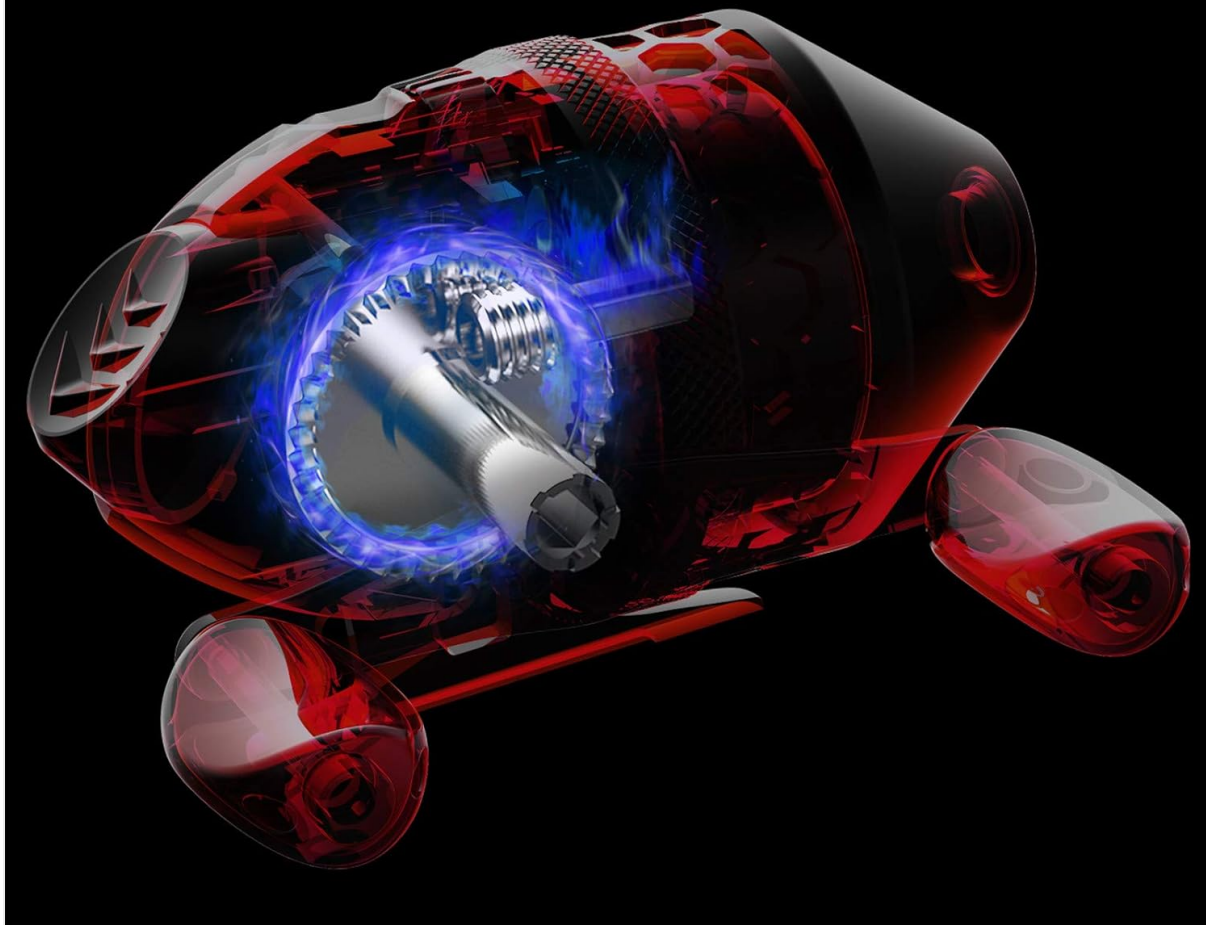

Image: An X-ray view of the KastKing Brutus Spincast Reel highlighting its internal high-speed 4.0:1 gear ratio mechanism.

4. Dual Pickup System

The stainless-steel Dual Pickup System is designed to quickly grab even slack line, ensuring you are always ready to set the hook or make another cast efficiently.

MAINTENANCE

Regular maintenance will extend the life and performance of your KastKing Brutus Spincast Reel.

- **Cleaning:** After each use, especially in saltwater, rinse the reel with fresh water. Wipe it dry with a soft cloth.
- **Lubrication:** Periodically apply a small amount of reel oil to moving parts and grease to gears. Refer to the exploded diagram for component locations.
- **Line Replacement:** Replace your fishing line regularly, especially if it shows signs of wear, fraying, or memory.
- **Storage:** Store your reel in a dry, cool place away from direct sunlight and extreme temperatures.

TROUBLESHOOTING

- **Line Twist:** If you experience excessive line twist, remove all line from the reel and re-spool it carefully, ensuring the line comes off the filler spool in the same direction it goes onto the reel spool.
- **Loose Handle:** If the handle feels loose even when tightened, ensure the handle retainer cap is fully secured. If the issue persists, inspect the handle assembly for any worn or damaged components.
- **Line Catching/Sticking During Cast:** This can sometimes be caused by the spool being slightly out of alignment. If cleaning and re-spooling the line does not resolve the issue, professional inspection may be required.

SPECIFICATIONS

Feature	Detail
Brand	KastKing
Model Name	Brutus
Hand Orientation	Ambidextrous
Color	Model 30 (Black/Red)
Material	Graphite (Frame), Aluminum (Handle), Stainless Steel (Bearings)
Fishing Technique	Spincast
Item Weight	9.88 Ounces
Gear Ratio	4.0:1
Special Feature	Anti-Reverse, Dual Pickup System
Fishing Reel Line Retrieve	15.75 Inches per turn
Fishing Reel Maximum Drag	11 Pounds
Line Capacity (Pre-spooled)	160 yards of 10 lb Monofilament
Bearings	5 Stainless-Steel, double shielded ball bearings + 1 anti-reverse bearing
