GLORIOUS Model O- (Minus)

GLORIOUS Model O- (Minus) Compact Wired Gaming Mouse User Manual

Model: GOM-WHITE

Introduction

Welcome to the GLORIOUS Model O- (Minus) Compact Wired Gaming Mouse user manual. This guide provides essential information for setting up, operating, maintaining, and troubleshooting your new gaming mouse. The Model O- (Minus) is engineered for competitive gaming, featuring a superlight 58g design, ambidextrous form factor, customizable RGB lighting, a high-precision Pixart 3360 sensor, and durable Omron switches.

Setup Guide

1. **Connect the Mouse:** Plug the USB connector of the GLORIOUS Model O- (Minus) mouse into an available USB port on your computer. The mouse is plug-and-play compatible with Windows, Linux, and macOS.
2. **Install Glorious Core Software (Optional but Recommended):** For full customization of RGB lighting, button macros, and DPI settings, download and install the Glorious Core software from the official GLORIOUS website. This software allows you to personalize your mouse experience.
3. **Driver Installation:** Your operating system should automatically install the necessary drivers. No manual driver installation is typically required.

Operating Instructions

The GLORIOUS Model O- (Minus) mouse features 6 programmable buttons and customizable settings to enhance your gaming and productivity.

Button Functions

- **Left Click:** Primary action button.
- **Right Click:** Secondary action button.
- **Scroll Wheel:** Scrolls up/down, and acts as a middle click button.
- **DPI Button:** Cycles through preset DPI stages. Default stages can be customized via Glorious Core.
- **Side Buttons (2):** Typically used for forward/backward navigation in web browsers or customizable for in-game macros.

DPI Settings

The mouse features a Pixart 3360 sensor with a maximum sensitivity of 12000 DPI. You can adjust DPI settings using the dedicated DPI button or fine-tune them within the Glorious Core software. The DPI indicator LED on the bottom of the

mouse changes color to reflect the current DPI stage.

RGB Lighting

The Model O- (Minus) features vibrant RGB lighting. Customize lighting effects, colors, and brightness using the Glorious Core software to match your setup or mood.

Advanced Features

- **Polling Rate:** 1000 Hz for rapid response.
- **Lift-off Distance (LOD):** Less than 0.7mm, preventing unwanted cursor movement when repositioning the mouse.
- **Ambidextrous Design:** Suitable for both left and right-handed users.

Maintenance

To ensure the longevity and optimal performance of your GLORIOUS Model O- (Minus) mouse, follow these maintenance guidelines:

- **Cleaning:** Use a soft, dry cloth to wipe the surface of the mouse. For the honeycomb shell, a can of compressed air can help remove dust and debris. Avoid using harsh chemicals or abrasive materials.
- **Sensor Care:** Keep the optical sensor on the bottom of the mouse clean and free from obstructions.
- **Cable Management:** Avoid sharp bends or excessive pulling on the Ascended Paracord cable to prevent damage.

Troubleshooting

If you encounter issues with your GLORIOUS Model O- (Minus) mouse, please refer to the official Troubleshooting Guide (PDF) for detailed solutions. Common issues and quick fixes include:

- **Mouse not responding:** Ensure the USB cable is securely connected to your computer. Try a different USB port.
- **DPI not changing:** Verify that the Glorious Core software is installed and running, and check your DPI settings within the software.
- **RGB lighting not working:** Check RGB settings in Glorious Core. Ensure the mouse is properly connected.
- **Cursor erratic or not tracking:** Clean the optical sensor and ensure you are using the mouse on a suitable surface (e.g., a mouse pad).

Specifications

MINUS
