# Weatherproof Max UTV Cover Instruction Manual

Brand: Car Covers | Model: WPSMax-767501531173-UTV

## 1. PRODUCT OVERVIEW

The Weatherproof Max UTV Cover is designed to provide comprehensive protection for your 2017 Massimo Motor Sports Gunner 250. Constructed from durable, UV-treated PolyShield material, this cover offers effective defense against various environmental elements, ensuring the longevity and cleanliness of your UTV.

Key features include:

- **Material:** High-quality 600 Denier fabric, chemically treated for UV resistance and rot prevention.
- **Protection:** Shields against rain, snow, bird droppings, tree sap, dust, dirt, and other harmful pollutants.
- **Breathability:** Dual built-in air vents promote airflow and prevent moisture buildup.
- **Fit:** Sized specifically for the UTV model, with fully elasticized hems for a snug fit.
- **Security:** Integrated straps ensure the cover remains secure, both stationary and during transport.
- **Convenience:** Includes a free storage bag for easy portability and storage.

## 2. SETUP AND INSTALLATION

Follow these steps to properly install your UTV cover:

1. **Prepare the UTV:** Ensure the UTV is clean and dry before covering to prevent moisture trapping and potential damage. Allow hot engine or exhaust components to cool down completely.
2. **Unfold the Cover:** Lay the cover out near the UTV, identifying the front and rear sections. The cover is designed to fit the specific dimensions of your UTV.
3. **Position the Cover:** Drape the cover over the UTV, starting from the front. Guide the elasticized hems around the base of the UTV.

4. **Secure the Hems:** Ensure the fully elasticized hems are snug around the bottom perimeter of the UTV for a secure fit.
5. **Fasten Straps:** Utilize the built-in securing straps. Locate the buckle and strap system underneath the UTV and connect them, tightening as necessary to prevent the cover from shifting, especially in windy conditions or during trailering.

### 3. OPERATING AND USAGE

The Weatherproof Max UTV Cover is suitable for both outdoor and indoor use, providing protection in various conditions.

- **Weather Protection:** The cover is designed to protect your UTV from rain, snow, sun (UV damage), and environmental debris like bird droppings and tree sap.
- **Air Circulation:** The dual covered air vents are crucial for maintaining breathability and preventing moisture and condensation from accumulating under the cover. Ensure these vents are not obstructed.
- **Trailering:** The built-in straps are designed to keep the cover secure even when the UTV is being trailered. Always ensure all straps are tightly fastened before transport.

## **Dual Covered Vents For Breathability And Air Flow**

Image: A close-up view of the dual covered vents, designed to provide breathability and air flow, preventing moisture buildup.

Proper maintenance will extend the life of your UTV cover:

- **Cleaning:** If the cover becomes dirty, clean it with mild soap and water. Rinse thoroughly and allow it to air dry completely before folding and storing. Do not use harsh chemicals or abrasive brushes.
- **Storage:** When not in use, fold the cover neatly and store it in the provided free storage bag. Store in a cool, dry place away from direct sunlight to preserve the fabric's integrity.

## 5. TROUBLESHOOTING

Here are some common issues and their solutions:

- **Cover Not Fitting Snugly:** Ensure the cover is correctly oriented (front to back) and that the elasticized hems are fully extended around the UTV's base. Adjust the built-in straps for a tighter fit.
- **Moisture Under Cover:** Verify that the dual air vents are clear and unobstructed to allow for proper air circulation. Ensure the UTV is dry before covering.
- **Cover Shifting in Wind:** Double-check that all built-in straps are securely fastened and tightened. The straps are designed to keep the cover in place during windy conditions and trailering.

## 6. SPECIFICATIONS
