## DOILIESE ZD-HS-C-6-002

# DOILIESE High Pressure 6-Setting Hand-Held Shower Head User Manual

Model: ZD-HS-C-6-002

## INTRODUCTION

---

Thank you for choosing the DOILIESE High Pressure 6-Setting Hand-Held Shower Head. This manual provides detailed instructions for the proper installation, operation, and maintenance of your new shower head, ensuring a long-lasting and satisfying showering experience. Please read this manual thoroughly before installation and retain it for future reference.

### Key Features:

- **6-Setting Premium Massage Shower Head:** Includes Rain+Massage, Rain, Massage, Mist, Spray, and Pause modes for a customizable shower experience.
- **Water Saving ON/OFF Pause Button:** Allows for complete shut-off of water flow to prevent waste, easily controlled with a thumb press.
- **Ultra Fine Mist Spray Mode:** Engineered with pre-compression technology for a powerful, wide-coverage mist.
- **Angle-Adjustable Overhead Bracket:** Directs water flow as desired for hands-free operation.
- **Flexible 5 Ft Stainless Steel Hose:** Durable design with brass connection nuts.
- **Tool-Free Connection:** Designed for quick and easy installation without professional help.
- **Anti-Clog Rub-Clean Jets:** Ensures easy maintenance and consistent performance.

## WHAT'S IN THE BOX

---

Verify that all components listed below are included in your package before beginning installation.

- Handheld Shower Head x 1
- 60 Inches Stainless Steel Shower Hose x 1
- Overhead Bracket x 1
- Installation Manual x 1 (This document)
- Washers x 3 (2 pre-installed)
- Plumber's Tape (Teflon Tape) x 1

# HIGH PRESSURE | Spa Spray Mode

With Restrictor: 1.8 GPM  
No Restrictor: 2.5 GPM

Figure 1: Included Components. Ensure all parts are present before proceeding.

## SETUP & INSTALLATION

---

Installation of your DOILIESE shower head is designed to be tool-free and can be completed in minutes. Follow these steps carefully for a secure and leak-free setup.

- 1. Prepare Your Shower Area:** Turn off the main water supply to your shower. Remove your old shower head and clean any debris from the shower arm threads.
- 2. Apply Plumber's Tape:** Wrap the threads of your existing shower arm with the provided plumber's tape (Teflon tape) 3-5 times clockwise. This helps prevent leaks.
- 3. Install the Angle-Adjustable Bracket:** Screw the angle-adjustable overhead bracket onto the shower arm. Hand-tighten only. Do not overtighten, as this can damage the threads or the bracket.
- 4. Connect the Shower Hose:**
  - Connect the conical nut end of the 60-inch stainless steel hose to the handheld shower head. Ensure a washer is inside the conical nut. Hand-tighten.
  - Connect the hexagonal nut end of the hose to the outlet on the angle-adjustable bracket. Ensure a washer is

inside the hexagonal nut. Hand-tighten.

5. **Place the Handheld Shower Head:** Insert the handheld shower head into the cradle of the angle-adjustable bracket.
6. **Test for Leaks:** Turn on the main water supply and check all connections for leaks. If leaks occur, ensure connections are hand-tightened and plumber's tape is properly applied.

Figure 2: Installation Steps. Remember to hand-tighten all connections.

## OPERATING INSTRUCTIONS

Your DOILIESE shower head offers six distinct spray settings and a convenient pause function for an optimized showering experience.

### Changing Spray Settings:

Rotate the dial on the face of the shower head to cycle through the 6 available spray modes:

- **Rain + Massage:** A combination of gentle rain and invigorating massage.

- **Rain:** A classic, full-coverage rain spray for a soothing shower.
- **Massage:** A powerful, pulsating spray for muscle relaxation.
- **Mist:** An ultra-fine, gentle mist, ideal for sensitive skin or rinsing.
- **Spray:** A focused, high-pressure spray for targeted rinsing.
- **Pause Mode:** Temporarily stops water flow to conserve water.

Figure 3: Six Spray Modes. Rotate the dial to select your preferred setting.

### Using the ON/OFF Pause Button:

The integrated ON/OFF pause button is located on the handle of the shower head. Press the button with your thumb to completely stop the water flow. Press it again to resume water flow at the same temperature and spray setting. This feature is designed to save water during activities like lathering or shaving.

Figure 4: ON/OFF Pause Button. Press to stop and resume water flow.

Figure 5: Water Saving Function. Effectively conserves water during your shower.

## MAINTENANCE

Regular maintenance will ensure the longevity and optimal performance of your DOILIESE shower head.

### Cleaning the Shower Head:

The shower head features anti-clog rub-clean jets. To remove mineral buildup and maintain spray performance:

- Periodically rub the rubber nozzles on the face of the shower head with your finger or a soft brush to dislodge any mineral deposits.
- For more stubborn buildup, soak the shower head in a solution of equal parts white vinegar and water for a few hours, then scrub and rinse thoroughly.
- Avoid using abrasive cleaners, harsh chemicals, or scouring pads, as these can damage the chrome finish.

### Hose and Bracket Care:

Wipe down the stainless steel hose and chrome bracket with a soft, damp cloth regularly to keep them clean and shiny. Ensure connections remain hand-tight to prevent leaks.

## TROUBLESHOOTING

If you encounter any issues with your DOILIESE shower head, refer to the common problems and solutions below.

Problem	Possible Cause	Solution
Low Water Pressure	<ul style="list-style-type: none"><li>• Mineral buildup in nozzles.</li><li>• Flow restrictor installed.</li><li>• Insufficient household water pressure.</li></ul>	<ul style="list-style-type: none"><li>• Clean nozzles by rubbing them.</li><li>• Consult local plumbing codes before removing the flow restrictor (if applicable and desired).</li><li>• Contact a plumber to assess household water pressure.</li></ul>
Leaking Connections	<ul style="list-style-type: none"><li>• Loose connections.</li><li>• Missing or worn washers.</li><li>• Insufficient plumber's tape.</li></ul>	<ul style="list-style-type: none"><li>• Hand-tighten all connections.</li><li>• Ensure washers are properly seated in all connections. Replace if worn.</li><li>• Reapply plumber's tape to threaded connections.</li></ul>
Pause Button Sticking	<ul style="list-style-type: none"><li>• Mineral buildup inside the button mechanism.</li><li>• Internal component wear (after extended use).</li></ul>	<ul style="list-style-type: none"><li>• Flush the shower head with hot water.</li><li>• Soak the shower head in a vinegar solution (see Maintenance).</li><li>• If the issue persists after cleaning and is due to wear, consider replacement.</li></ul>

If you experience problems not listed here or if the suggested solutions do not resolve the issue, please contact DOILIESE customer support for assistance.
