PRODUCT FEATURES

- **MFi Certified:** Ensures compatibility and safe charging with Apple devices.
- **Universal Apple Device Support:** Compatible with iPhone, iPad, and iPod devices.
- **Durable Construction:** Tangle-free design for enhanced longevity.
- **Convenient Length:** 1-foot (0.3m) cable for flexible use.
- **USB-A to Lightning:** Standard connectors for broad compatibility with power sources and devices.

A close-up view of the USB-A and Lightning connectors of the GE Pro cable, highlighting the GE branding on each connector.

SETUP AND CONNECTION

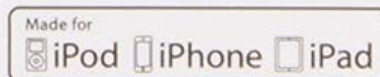

1. **Connect to Power Source:** Insert the USB-A end of the cable into a compatible USB-A port on a computer, wall adapter, car charger, or power bank. Ensure the power source is active.
2. **Connect to Apple Device:** Insert the Lightning end of the cable into the charging port of your Apple iPhone, iPad, or iPod.
3. **Verify Connection:** Your device should indicate that it is charging or connected for data transfer.

Pro™

USB Cable with Lightning™ Connector

Connect, sync and charge Apple devices
with a Lightning connector

LIFETIME
WARRANTY

The GE Pro Lightning cable connected to an Apple iPhone, demonstrating how the Lightning connector fits into the device's charging port.

OPERATING INSTRUCTIONS

Charging Your Device

Once connected to a power source and your Apple device, the cable will automatically begin charging. The charging status will be displayed on your device's screen.

Syncing Data

To sync data, connect the USB-A end of the cable to a computer's USB-A port and the Lightning end to your Apple device. Your computer should recognize the device, allowing you to transfer files, back up data, or update software using iTunes or Finder (macOS Catalina and later).

MAINTENANCE AND CARE

- **Cleaning:** Use a soft, dry cloth to gently wipe the cable and connectors. Avoid using harsh chemicals

or abrasive materials.

- **Storage:** Store the cable in a cool, dry place away from direct sunlight and extreme temperatures. Avoid tightly coiling or bending the cable at sharp angles to prevent damage.
- **Handling:** Always grasp the connector head when plugging or unplugging the cable, rather than pulling on the cable itself.

TROUBLESHOOTING

- **Device Not Charging:**
 - Ensure both ends of the cable are securely connected.
 - Try a different USB-A port or power adapter.
 - Test the cable with a different Apple device, if available.
 - Check the Lightning port on your device for any debris or damage.
- **Device Not Syncing:**
 - Confirm the USB-A end is connected to a computer, not just a power adapter.
 - Restart your computer and Apple device.
 - Ensure your computer's operating system and iTunes/Finder are up to date.
 - Try a different USB-A port on your computer.
