Stuhrling Original 995 Lily

Stuhrling Original 995 Lily Women's Watch User Manual

Model: 995 Lily

INTRODUCTION

This manual provides instructions for the proper use and care of your Stuhrling Original 995 Lily women's watch. Please read this manual thoroughly to ensure optimal performance and longevity of your timepiece.

Image: The Stuhrling Original 995 Lily watch, showcasing its elegant Mother of Pearl dial and crystal flower ring design. This image illustrates the overall aesthetic of the watch.

SETUP

Setting the Time

- Pull out the crown:** Gently pull the crown (the small knob on the side of the watch case) to its outermost position.
- Set the time:** Rotate the crown clockwise or counter-clockwise to move the hour and minute hands to the desired time.
- Push in the crown:** Once the time is set, push the crown back into its original position against the watch case. This will start the watch movement.

Battery Information

This watch is powered by a single nonstandard battery, which is included. For battery replacement, it is recommended to consult a professional watchmaker to ensure proper sealing and function.

OPERATING

Timekeeping

Your Stuhrling Original 995 Lily watch utilizes a reliable Japanese Miyota movement for accurate timekeeping. Once the time is set, the watch will continuously display the current time.

Leather Band Care

The watch features a genuine leather strap. To maintain its quality and appearance:

- Avoid prolonged exposure to direct sunlight, extreme temperatures, and moisture.
- Clean with a soft, dry cloth. Do not use harsh chemicals or abrasive materials.
- Allow the strap to air dry if it becomes wet.

MAINTENANCE

Cleaning Your Watch

Wipe the watch case and crystal with a soft, lint-free cloth. For stubborn dirt, a slightly damp cloth can be used, followed by immediate drying. Ensure the crown is fully pushed in before any cleaning involving moisture.

Water Resistance

While the watch is designed for daily wear, it is generally not recommended for swimming or showering unless explicitly stated otherwise in the specifications. Avoid exposing the watch to hot water or steam, as this can compromise the seals.

Battery Replacement

When the watch stops running, it indicates that the battery needs replacement. It is strongly advised to have the battery replaced by a qualified watch technician to prevent damage to the movement and to ensure the watch's water resistance is maintained.

TROUBLESHOOTING

• Watch not running:

- Check if the crown is fully pushed in.
- The battery may need replacement. Refer to the "Battery Replacement" section.

• Incorrect time:

- Ensure the crown is fully pushed in after setting the time.
- If the time is consistently incorrect, the watch may require servicing.
