Skechers Tresmen-Garo Men's Open Toe Water Sandal Instruction Manual

INTRODUCTION

This manual provides essential information for the proper use and care of your Skechers Tresmen-Garo Men's Open Toe Water Sandals. Designed for comfort and durability, these sandals feature a secure strap closure and are suitable for various activities.

Key features include:

- **Relaxed Fit:** Provides a roomy and comfortable fit for the toe and forefoot.
- **Luxe Foam Insole:** Cushioned for enhanced comfort during wear.
- **Durable Synthetic Upper:** Features an open-toe design.
- **Adjustable Ankle-Strap:** Equipped with a hook-and-loop closure for a secure and customizable fit.
- **Shock-Absorbing Midsole:** Offers supportive cushioning.

SETUP AND ADJUSTMENT

To ensure optimal comfort and a secure fit, follow these steps for adjusting your sandals:

1. **Unfasten Straps:** Fully open all hook-and-loop closure straps on the sandal.
2. **Position Foot:** Place your foot into the sandal, ensuring your heel is comfortably seated in the heel cup and your toes are within the footbed.
3. **Adjust Forefoot Strap:** Begin by securing the strap over the forefoot. Adjust it to be snug but not overly tight, allowing for natural foot movement.
4. **Adjust Ankle Strap:** Next, secure the ankle strap. This strap should hold your foot firmly in place without causing pressure points.
5. **Adjust Heel Strap:** Finally, adjust the heel strap to ensure your heel remains stable within the sandal.
6. **Test Fit:** Walk a few steps to check the fit. Readjust any straps as necessary to achieve a comfortable and secure feel.

OPERATING (WEARING)

The Skechers Tresmen-Garo sandals are designed for general casual wear and light outdoor activities, including those involving water. The Luxe Foam cushioned insole provides comfort for extended periods of standing or walking. The Relaxed Fit design ensures ample room for your foot, reducing constriction.

Ensure all straps are properly adjusted before wearing for prolonged periods to prevent discomfort or instability.

MAINTENANCE AND CARE

Proper care will extend the life of your sandals. Follow these guidelines:

- **Cleaning:** For the synthetic upper and neoprene inner material, gently wipe with a damp cloth and mild soap. Avoid harsh chemicals or abrasive cleaners.
- **Drying:** Allow sandals to air dry naturally away from direct heat or sunlight. Do not machine wash or tumble dry.
- **Storage:** Store in a cool, dry place when not in use.
- **Water Exposure:** While designed as water sandals, prolonged submersion or exposure to saltwater may require more thorough rinsing with fresh water to prevent material degradation.

TROUBLESHOOTING

If you encounter issues with your sandals, consider the following:

- **Discomfort or Rubbing:** Ensure all straps are correctly adjusted. Sometimes, a slight loosening or tightening of a specific strap can resolve discomfort. Verify that the sandal size is appropriate for your foot using the provided size guide if available.
- **Slipping:** If your foot is slipping within the sandal, tighten the straps for a more secure fit. If the outsole is slipping on surfaces, inspect the Steady Grip pattern for wear or debris.
- **Odor:** Regular cleaning and proper drying after water exposure can help prevent odor buildup.
