# Finnhomy 8-Tier Wire Shelving Unit Instruction Manual

Model: 7655 | Brand: Finnhomy

## 1. INTRODUCTION AND OVERVIEW

Thank you for choosing the Finnhomy 8-Tier Wire Shelving Unit. This adjustable steel storage rack is designed for versatile use in various environments such as kitchens, offices, garages, bathrooms, laundry rooms, living rooms, and dining rooms. Its robust construction and adjustable shelves provide an efficient solution for organizing your space.

This unit can be assembled as one tall 8-tier unit or separated into two 4-tier units for flexible storage configurations. It is NSF Certified, ensuring quality and reliability.

## 2. SAFETY INFORMATION

**WARNING: Ensure the rack is stable and secure. Do not exceed the weight limit of 250 lbs (113 kg) per shelf. Use the provided safety device to prevent the rack from falling down.**

- Always distribute weight evenly across shelves.
- Do not climb on the unit.
- Keep small children away from the unit during assembly and use.
- Place the unit on a level surface. Use leveling feet to ensure stability.

## 3. PACKAGE CONTENTS

Please verify that all components are present before beginning assembly:

- 8 x Shelves
- 24 x Solid Poles (sections)
- 8 x Leveling Feet
- 64 + 4 pairs of Plastic Sleeves (clips)
- 8 x PE Mats
- 1 x Smart Device (safety device)

## 4. SETUP AND ASSEMBLY

This shelving unit features a no-tool assembly design. Follow these steps for quick and easy setup:

1. **Unpack Components:** Carefully remove all parts from the packaging. Organize them and ensure all listed components are present.
2. **Assemble Poles:** The poles come in sections. Screw the pole sections together to achieve the desired height. The top sections have caps, and the bottom sections are designed for leveling feet or optional wheels.
3. **Attach Plastic Sleeves:** Snap the two-part plastic sleeves around the poles at your desired shelf height. Ensure the ridges on the sleeves align with the grooves on the poles. These sleeves will support the shelves.
4. **Install Shelves:** Slide each shelf down over the poles until it rests securely on the plastic sleeves. Apply gentle pressure or use a rubber mallet (not included) to ensure the shelves are firmly seated.
5. **Install Leveling Feet:** Screw the leveling feet into the bottom of the poles. Adjust them to ensure the unit is stable and level on uneven surfaces.
6. **Optional Wheels:** If using optional wheels (not included with this model but available for other Finnhome units), replace the leveling feet with the wheels. Ensure any locking mechanisms on the wheels are engaged for stability.
7. **Place PE Mats:** Lay the provided PE mats on top of the wire shelves to create a smoother surface and prevent small items from falling through.
8. **Attach Safety Device:** Secure the smart device (safety device) to the wall and the shelving unit to prevent accidental tipping.

Figure 1: The 8-tier unit can be configured as two 4-tier units. Dimensions: 8-tier unit (23.3"D x 13.5"W x 72"H), 4-tier unit (23.3"D x 13.5"W x 36"H).

Video 2: Short clip explaining the importance of understanding shelf height before assembly.

---

## 5. OPERATING INSTRUCTIONS

The Finnhome 8-Tier Wire Shelving Unit is designed for ease of use and adaptability.

- **Adjustable Shelves:** Shelves can be adjusted in 1-inch increments to accommodate items of various heights. To adjust, remove items from the shelf, detach the plastic sleeves, reposition them to the desired height, and re-attach the shelf.
- **Load Capacity:** Each shelf can hold up to 250 lbs (113 kg) when weight is evenly distributed, with a total unit capacity of 2000 lbs (907 kg).
- **Versatile Use:** This unit is suitable for organizing items in any room, including kitchens, pantries, garages, offices, and laundry rooms.
- **PE Mats:** Use the included PE mats to prevent smaller items from falling through the wire grid and to provide a flat surface.

Video 3: Short clip showcasing the unit's suitable size for small spaces.

Video 4: Short clip highlighting the solid build quality of the shelving unit.

## 6. MAINTENANCE

To ensure the longevity and appearance of your Finnhome shelving unit, follow these simple maintenance guidelines:

- **Cleaning:** Wipe the shelves and poles with a dry cloth to remove dust and debris. For tougher spots, use a damp cloth with mild soap and dry immediately.
- **Rust Prevention:** The chrome outer varnish is waterproof and designed to be anti-rust. Avoid using abrasive cleaners or harsh chemicals that could damage the finish.
- **Regular Inspection:** Periodically check all connections and ensure shelves are securely seated on the plastic sleeves. Re-tighten leveling feet if necessary.

## 7. TROUBLESHOOTING

If you encounter any issues with your shelving unit, please refer to the following common solutions:

- **Unit is Wobbly:** Ensure the unit is placed on a flat surface. Adjust the leveling feet by twisting them until all four feet make firm contact with the floor and the unit is stable. Verify that all shelves are properly seated on their plastic sleeves.
- **Shelf Not Level:** Check that the plastic sleeves for the affected shelf are positioned at the same height on all four poles. Adjust as needed.
- **Items Sliding Off:** Ensure PE mats are correctly placed on the shelves.
- **Difficulty Assembling:** Refer to the assembly steps in Section 4. Ensure plastic sleeves are correctly oriented with the 'TOP' arrow pointing upwards and are snapped securely into the pole grooves.
