HammerHead Showers 3F-HHS-CH-2.5

HammerHead Showers 3-Spray Handheld Shower Head User Manual

Model: 3F-HHS-CH-2.5

INTRODUCTION

Thank you for choosing the HammerHead Showers Solid Metal 3-Spray Handheld Shower Head. This manual provides detailed instructions for installation, operation, and maintenance to ensure optimal performance and longevity of your product. Please read this manual thoroughly before installation and keep it for future reference.

PRODUCT FEATURES

- **Solid Metal Construction:** Crafted from durable stainless steel and lead-free brass for lifetime use, unlike plastic alternatives.
- **3 High-Pressure Spray Settings:** Enjoy Wide, Massage, and Mist spray options for a customized shower experience.
- **72-inch Metal Hose:** Provides extended reach for various uses, featuring non-toxic silicone inner tubing for hygiene.
- **Easy DIY Installation:** Designed for straightforward installation without specialized plumbing experience.
- **Adjustable Shower Holder:** Solid brass holder allows for precise spray angle adjustment.

SAFETY INFORMATION

- Ensure water supply is turned off before installation to prevent leaks or injury.
- Do not overtighten connections, as this can damage threads and cause leaks.
- Use plumber's tape on all threaded connections to ensure a watertight seal.
- If you are unsure about any step during installation, consult a qualified plumber.

INSTALLATION INSTRUCTIONS

Follow these steps for a quick and easy installation:

1. **Prepare the Shower Area:** Turn off the main water supply to your shower. Remove your old shower head and clean any residue from the shower arm threads.
2. **Apply Plumber's Tape:** Wrap plumber's tape (included) clockwise around the threads of your shower arm 3-4 times.

3. **Install Shower Holder:** Screw the solid brass shower holder onto the shower arm. Hand-tighten first, then use the provided wrench for a snug fit, ensuring the holder is angled correctly.
4. **Connect Shower Hose:** Attach one end of the 72-inch metal shower hose to the outlet on the shower holder and the other end to the handheld shower head. Ensure washers are properly seated in both connections. Hand-tighten, then use the wrench for a secure, leak-free connection.
5. **Test for Leaks:** Turn the main water supply back on and check all connections for leaks. If leaks occur, tighten slightly more or reapply plumber's tape.

OPERATING INSTRUCTIONS

Your HammerHead Showers handheld shower head features three distinct spray settings:

- **Wide Spray:** Provides a drenching, full-coverage shower experience.
- **Massage Spray:** A powerful, concentrated spray ideal for rinsing shampoo out of thick hair or for muscle relaxation.
- **Mist Spray:** A fine, refreshing mist perfect for cooling down on a hot day.

To switch between spray settings, rotate the lever or dial located on the shower head face.

MAINTENANCE

- **Cleaning:** To maintain the finish and prevent mineral buildup, regularly wipe the shower head and hose with a soft cloth and mild soap. Avoid abrasive cleaners or scrubbers.
- **Nozzle Cleaning:** The silicone nozzles are designed for easy cleaning. Simply rub your finger across the nozzles to dislodge any mineral deposits.
- **Hose Care:** The metal hose with silicone inner tubing is designed to resist biofilm. Periodically rinse the hose thoroughly.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Low Water Pressure	Mineral buildup in nozzles or flow restrictor.	Clean nozzles by rubbing them. Check if a flow restrictor is installed and consider removing it if local regulations allow.
Leaking Connections	Loose connections or worn washers.	Ensure all connections are hand-tightened and then snugged with a wrench. Replace washers if necessary. Apply plumber's tape to threaded connections.
Shower Head Drips After Use	Residual water in the shower head.	This is normal for some shower heads as water drains from the internal channels. If dripping persists excessively, check for loose connections.

SPECIFICATIONS

- **Brand:** HammerHead Showers
- **Model Number:** 3F-HHS-CH-2.5
- **Material:** Solid Metal (Stainless Steel, Lead-Free Brass)
- **Finish:** Polished Chrome
- **Flow Rate:** 2.5 GPM (Gallons Per Minute)
