ZINC 6006

ZINC 6006 Business Loafers Instruction Manual

Model: 6006 | Brand: ZINC

PRODUCT OVERVIEW

The ZINC 6006 Business Loafers are designed for professional and casual wear, offering a blend of classic style and comfort. Crafted from genuine cowhide leather, these loafers feature a square toe and a sharp last, making them versatile for various occasions. The design prioritizes ease of movement and durability, with a flexible and lightweight construction.

FEATURES

- **Genuine Leather:** Constructed from cowhide leather for durability and comfort.
- **Water Repellent:** Treated to resist light moisture, though not fully waterproof.
- **Flexible Design:** Engineered for ease of movement.
- **Lightweight:** Designed to reduce foot fatigue.
- **Non-skid Sole:** Synthetic sole provides improved traction.
- **Shoe Width:** 3E for a comfortable fit.

SETUP

The ZINC 6006 Business Loafers are ready to wear directly out of the packaging. No assembly or special setup is required.

1. **Unpack:** Carefully remove the shoes from their packaging.
2. **Inspect:** Check for any visible damage or manufacturing defects. If any are found, contact customer support.
3. **First Wear:** Wear the shoes for a short period initially to allow the genuine leather to conform to your foot shape.

OPERATING INSTRUCTIONS

These loafers are designed for daily wear in various business and casual settings. Proper use ensures longevity and comfort.

- **Wearing:** Slide your foot into the loafer. The flexible design allows for easy entry.
- **Fit:** Ensure a snug but comfortable fit. Genuine leather will adapt to your foot over time.
- **Environment:** Suitable for indoor and outdoor use. Avoid prolonged exposure to heavy rain or standing water due to the "Not Water Resistant" rating.

MAINTENANCE

Regular maintenance will preserve the appearance and extend the lifespan of your ZINC 6006 Business Loafers.

1. Cleaning:

- Wipe off dirt and dust with a soft, damp cloth after each wear.
- For deeper cleaning, use a leather cleaner specifically designed for genuine cowhide. Follow the product instructions carefully.
- Do not use harsh chemicals or abrasive materials, as these can damage the leather.

2. Conditioning:

- Apply a leather conditioner periodically (e.g., once a month or as needed) to keep the leather supple and prevent cracking.
- Allow the conditioner to absorb fully before polishing.

3. Polishing:

- Use a shoe polish that matches the color of your loafers (black).
- Apply a thin, even coat and buff to a shine with a clean, soft cloth or brush.

4. Drying:

- If the shoes get wet, stuff them with newspaper to absorb moisture and help retain their shape.
- Allow them to air dry naturally at room temperature, away from direct heat or sunlight, which can damage the leather.

5. Storage:

- Store in a cool, dry place away from direct sunlight.
- Use shoe trees to help maintain their shape and absorb moisture when not in use.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Leather appears dry or cracked.	Lack of conditioning; exposure to extreme conditions.	Apply a suitable leather conditioner. Store in a cool, dry place.
Shoes feel stiff.	New leather; infrequent wear.	Wear regularly to allow leather to break in. Use shoe trees when not in use.
Unpleasant odor.	Moisture buildup; lack of ventilation.	Allow shoes to air out after each wear. Use shoe deodorizers or cedar shoe trees.
Sole wear.	Normal wear and tear.	Consider professional resoling if wear is significant.
