## ASSEMBLY INSTRUCTIONS

Follow these steps carefully. It is recommended to assemble the unit on a soft, clean surface to prevent scratches.

Attach the side panels (B) to the base panel (C) and the top panel (A) using the provided dowels and cam locks from the hardware pack (K). Ensure all connections are secure.
- 2. Install Back Panel:**

Slide the back panel (D) into the grooves on the main frame. Secure it with small nails or screws from the hardware pack (K) along the edges.

### 3. Attach Cabinet Runners:

### 4. Assemble Drawers (Repeat for all 6):

- Slide the drawer base (H) into the grooves.
- Attach the drawer portion of the runners (I) to the sides of the assembled drawer box. Pay close attention to the orientation; the locking mechanism should face the front of the drawer.
- Secure the handles (J) to the drawer fronts (E) using the screws provided.

### 5. Insert Drawers:

Carefully align the drawer runners with the cabinet runners and push the drawers into place until they click or slide smoothly. If a drawer does not slide smoothly, remove it and re-check the runner alignment and installation.

## OPERATING INSTRUCTIONS

- **Closing Drawers:** Push the drawers firmly but gently until they are fully closed and flush with the cabinet frame.
- **Loading Drawers:** Distribute items evenly within each drawer. Avoid overloading drawers, as this can strain the runners and affect smooth operation. The drawers are designed for clothing, linens, and other light to medium-weight items.

## MAINTENANCE

Proper care will extend the life and appearance of your Artiss Chest of Drawers.

- **Cleaning:** Wipe surfaces with a soft, damp cloth. Avoid abrasive cleaners, harsh chemicals, or excessive moisture, which can damage the melamine finish.
- **Spills:** Clean up spills immediately to prevent staining or damage to the material.
- **Hardware Check:** Periodically check all screws and fittings to ensure they remain tight. Re-tighten if necessary, but

do not overtighten.

- **Runner Lubrication:** If drawer runners become stiff over time, a small amount of silicone spray or paraffin wax can be applied to the tracks to restore smooth operation.
- **Sunlight Exposure:** Avoid prolonged direct sunlight exposure, which can cause fading or discoloration of the finish.
