WeatherTech 431262

WeatherTech Cargo Trunk Liner Instruction Manual

Model: 431262 - Cocoa

For BMW X7 (2019-2025 models, behind 2nd row seating)

PRODUCT OVERVIEW

The WeatherTech Cargo Trunk Liner is a custom-fit protective mat designed to safeguard the cargo area of your BMW X7. Manufactured in the USA from a proprietary custom blended TPE, this liner is engineered to be wear-resistant and maintain flexibility across various temperature extremes. Its textured finish helps to prevent cargo from shifting during transit, making it ideal for transporting a wide range of items, from gardening supplies to construction materials, or even pets.

This specific liner is designed for select 2019-2020 BMW X7 50i, 2023-2025 BMW X7 M60i, 2020-2022 BMW X7 M50i, 2019-2025 BMW X7 40i, and 2021-2025 BMW ALPINA XB7 Models, covering the area behind the 2nd row seating. The color of this liner is Cocoa.

SETUP AND INSTALLATION

Follow these steps for proper installation of your WeatherTech Cargo Trunk Liner:

1. **Unpack the Liner:** Carefully remove the cargo liner from its packaging. If the liner was rolled for shipping, allow it to lay flat in a warm environment for a few hours to regain its original shape.
2. **Prepare the Cargo Area:** Ensure the vehicle's cargo area is clean and free of any debris, dirt, or moisture. A clean surface will help the liner sit properly and prevent trapped particles from causing wear to the original carpet.
3. **Position the Liner:** Place the WeatherTech Cargo Trunk Liner into the cargo area of your BMW X7. Align it carefully with the contours of the vehicle's floor.
4. **Ensure Proper Fit:** Gently press down on the liner, especially around the edges and corners, to ensure it settles securely into place. The custom design ensures a precise fit for the specified BMW X7 models.

OPERATING INSTRUCTIONS

The WeatherTech Cargo Trunk Liner is designed for practical use and protection of your vehicle's cargo space.

- **Cargo Protection:** Place items directly onto the liner. The raised lip around the perimeter and the textured surface are designed to contain spills and prevent cargo from shifting during driving.
- **Versatile Use:** The liner is suitable for hauling various items, including groceries, sports equipment, gardening supplies, or even pets. Its durable material provides a barrier against dirt, mud, liquids, and general wear and tear.

MAINTENANCE AND CLEANING

To ensure the longevity and appearance of your WeatherTech Cargo Trunk Liner, regular cleaning is recommended:

1. **Remove from Vehicle:** For best results, remove the cargo liner from your vehicle.
2. **Shake Off Debris:** Shake off any loose dirt, dust, or debris.
3. **Clean the Surface:** Use a mild soap and water solution, or a specialized cleaner like WeatherTech TechCare FloorLiner and FloorMat Cleaner, to clean the surface. Scrub gently with a soft brush or cloth.
4. **Rinse Thoroughly:** Rinse the liner completely with clean water to remove all soap residue.
5. **Air Dry:** Allow the liner to air dry completely before placing it back into your vehicle. Do not use harsh chemicals or abrasive cleaners, as these may damage the material.

TROUBLESHOOTING

Here are solutions to common concerns regarding the WeatherTech Cargo Trunk Liner:

- **Fitment Issues:** If the liner does not seem to fit correctly, first ensure that you have the correct model number (431262) for your specific BMW X7 year and trim. Always confirm fitment using the Amazon Garage feature or by cross-referencing with WeatherTech's official fitment guide prior to purchase. Minor discrepancies can sometimes be resolved by allowing the liner to warm up and settle into place over time.
- **Blocked Tie-Downs:** Some vehicle models may have cargo tie-downs that are covered by the liner. If access to these tie-downs is required, the liner may need to be temporarily lifted or removed in that specific area. This design prioritizes full coverage and protection of the cargo area.
- **Visible Scuff Marks (Lighter Colors):** Lighter colored liners, such as Cocoa, may show scuff marks more readily than darker colors. This is a characteristic of the material and color. Regular cleaning as described in the Maintenance section will help minimize the appearance of these marks.

SPECIFICATIONS

Attribute	Value
Manufacturer	Weathertech
Brand	WeatherTech
Model Number	431262
Item Weight	8.8 pounds
