## OPERATING INSTRUCTIONS

---

### Charging Your Device

To charge your Qi-enabled smartphone, simply place it on the charging stand. The charger is designed to support both vertical and horizontal charging orientations.

The LED indicator light on the base of the charger will illuminate to confirm that charging has begun. For sleep-friendly operation, the LED indicator will automatically shut off after approximately 10 seconds.

## Case Compatibility

The charger is designed to work with most phone cases up to 0.2 inches (5mm) thick.

**Important: Metal phone cases or cases thicker than 0.2 inches (5mm) may interfere with wireless charging. Please remove such cases for optimal charging performance.**

## SAFETY INFORMATION

---

Your NANAMI wireless charger features internal safeguards to protect against:

- Overcharge Protection (OCP)
- Overvoltage Protection (OVP)
- Over Temperature Protection (OTP)
- Short Circuit Protection (SCP)

These features ensure ultimate safety for your smartphone and the charging device. The anti-slip bottom silicone rim and raised support provide extra stability on any desk surface.

## MAINTENANCE

- Keep the charger clean by wiping it with a soft, dry cloth.
- Avoid exposing the charger to extreme temperatures, humidity, or liquids.
- Do not disassemble or attempt to repair the charger yourself.

## TROUBLESHOOTING

### Device Not Charging

- Ensure the charging cable is securely connected to both the charger stand and the power adapter.
- Verify that the power adapter is plugged into a working electrical outlet.
- Check if your phone case is too thick or contains metal. Remove the case and try again.
- Reposition your phone on the charging stand to ensure proper alignment with the charging coils.
- Confirm your device is Qi-enabled.

### **Slow Charging**

- Use a QC 2.0 or above (higher than 10W) power adapter for fast charging. Standard 5W adapters will result in slower charging speeds.
- Ensure your phone is properly aligned on the charging stand.
- Remove any thick or metal cases.

### **LED Indicator Behavior**

- The LED indicator will light up when charging begins and automatically turn off after approximately 10 seconds to avoid disturbing sleep. This is normal operation.

## **WARRANTY AND SUPPORT**

---

NANAMI is committed to maintaining the highest quality standards. For any questions or problems during use, please feel free to send us an email via Amazon. We will provide prompt assistance.
