1. INTRODUCTION

This manual provides essential instructions for the assembly, operation, and maintenance of your Kozyard 10'x12' Hardtop Gazebo. Please read this manual thoroughly before beginning assembly or use to ensure safe and correct installation and to maximize the lifespan of your product.

The Kozyard 10'x12' Hardtop Gazebo provides a shaded outdoor living space, featuring a durable metal roof and privacy curtains.

2. SAFETY INFORMATION

Always adhere to the following safety guidelines to prevent injury or damage to the gazebo:

- **Assembly Safety:** Assembly typically requires two or more adults. Ensure all parts are correctly aligned and secured as per instructions. Do not force components together.
- **Anchoring:** Securely anchor the gazebo to the ground or a solid surface (e.g., concrete patio, deck) using appropriate hardware. This is crucial for stability, especially in windy conditions.
- **Weather Conditions:** While the galvanized steel roof is designed to withstand heavy snow (up to 2000 lbs) and wind (up to 35 mph), it is recommended to clear excessive snow accumulation promptly. In extreme weather conditions, such as severe storms or hurricanes, it is advisable to take down curtains and nets and consider additional securing measures.
- **Overhead Weight:** Do not hang heavy objects from the roof structure without verifying its load-bearing capacity and using proper support. The integrated hook is for lightweight items like fans or lights.

- **Fire Safety:** Keep all heat sources, including grills, fire pits, and heaters, at a safe distance from the gazebo structure and curtains to prevent fire hazards. The privacy curtain is fireproofed, but caution is still advised.
- **Children and Pets:** Supervise children and pets around the gazebo to prevent accidents.
- **Mosquito Netting:** Be aware of mosquito presence while using the gazebo. Ensure netting is properly closed to provide protection.

3. PACKAGE CONTENTS

Before beginning assembly, verify that all components are present and undamaged. Refer to the parts list provided in your packaging for exact quantities. Key components include:

- Aluminum Frame Components (posts, beams, connectors)
- Galvanized Steel Roof Panels
- 2-Layer Sidewalls (Polyester Privacy Curtains and PBV-coated Polyester Mosquito Netting)
- Hardware Kit (screws, bolts, anchors)
- Assembly Tools (basic wrenches, hex keys may be included)

The gazebo features a dark brown colored rustproof aluminum frame, providing stability and durability.

The gazebo includes durable PBV-coated polyester mosquito netting and removable steel railing for the sidewalls.

4. SETUP

Assembly of the Kozyard Hardtop Gazebo requires careful attention to detail and typically involves multiple individuals. It is recommended to have at least two people for assembly, and potentially more for lifting the roof structure.

4.1 Site Preparation

- Choose a level surface for installation. Uneven ground can compromise the gazebo's stability.
- Ensure adequate clearance around the gazebo for assembly and future use.

4.2 Frame Assembly

1. Unpack all components and lay them out, organizing by part number.
2. Assemble the main support posts and horizontal beams according to the provided diagrams. Ensure all bolts are finger-tightened initially.
3. Once the main frame is upright, carefully tighten all bolts using the provided tools. Do not overtighten.

The strong anchoring stands feature three pre-drilled holes for secure fixation to various floor types.

4.3 Roof Installation

1. Assemble the roof frame sections on the ground if possible, then lift into place.
2. Attach the galvanized steel roof panels to the roof frame. Ensure panels overlap correctly to prevent leaks.
3. Secure all roof components firmly.

4.4 Sidewall and Netting Attachment

1. Hang the mosquito netting and privacy curtains onto the double track system. Pay attention to any numbering or labeling on the curtains to ensure correct placement.
2. Ensure the curtains and nets can move freely along their tracks.

5. OPERATING INSTRUCTIONS

Your Kozyard Hardtop Gazebo is designed for versatile outdoor use. Here's how to operate its features:

5.1 Using the Sidewalls and Mosquito Nets

The gazebo features a double track system allowing for flexible use of the privacy curtains and mosquito nets.

- **Privacy Curtains:** Slide the polyester privacy curtains along the outer track to create a secluded space or to block sun and wind. These curtains are fireproofed and waterproofed.
- **Mosquito Netting:** Slide the PBV-coated polyester mosquito netting along the inner track to protect against insects while maintaining airflow.
- **Securing Curtains:** Use the included ties to secure curtains and nets to the posts when not in use, or to hold them open.

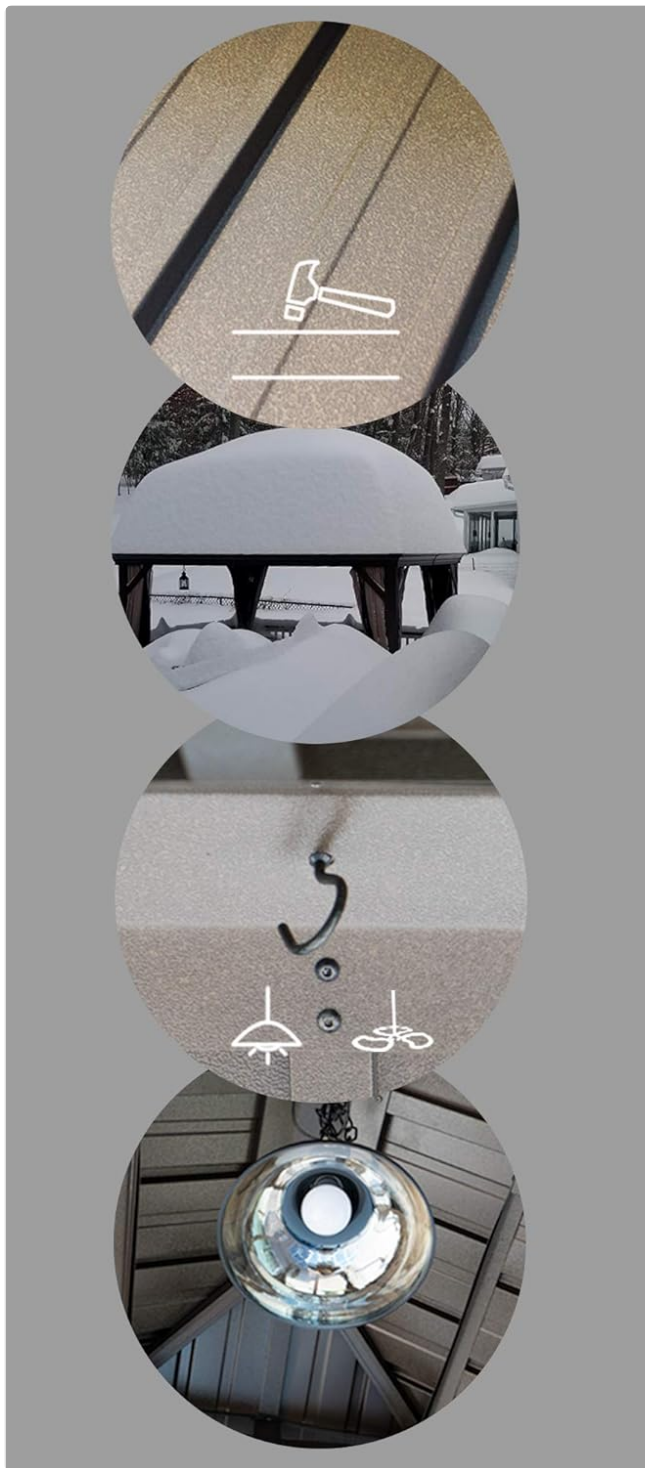

The gazebo with privacy curtains fully closed, offering seclusion and protection from elements.

The gazebo with privacy curtains tied back, allowing for an open-air experience.

5.2 Roof Hook Usage

A hook is integrated into the center of the gazebo roof. This hook is designed for hanging lightweight items such as decorative lights or small outdoor fans. Do not exceed the weight limit specified in the product documentation (if available) to avoid damage.

Metal roof

- 1. Anti-weather
- 2. Snow capacity: 2000 lbs

Hook for

- 1. lights
- 2. fan

The metal roof is designed for durability and snow capacity, featuring a central hook for lights or a fan.

6. MAINTENANCE

Regular maintenance will help preserve the appearance and functionality of your gazebo.

6.1 Cleaning

- **Frame:** Clean the aluminum frame with a mild soap and water solution. Rinse thoroughly and dry with a soft cloth to prevent water spots. Avoid abrasive cleaners or harsh chemicals.
- **Roof:** The galvanized steel roof can be cleaned with a soft brush and water. For stubborn dirt, use a mild detergent. Rinse well.
- **Curtains and Netting:** The polyester curtains and netting can be spot cleaned with mild soap and water. For deeper cleaning, they may be removed and hand washed. Allow to air dry completely before reattaching or storing.

6.2 Seasonal Care

- **Winter:** The galvanized steel roof has a high snow loading capacity (up to 2000 kgs / 4400 lbs). However, it is advisable to regularly clear heavy snow accumulation to prevent excessive stress on the structure.
- **Wind:** Ensure the gazebo is always securely anchored, especially in anticipation of strong winds. Consider removing curtains and nets during high winds to reduce wind resistance.

The gazebo's hardtop roof is designed to withstand significant snow loads, as shown in this winter scene.

7. TROUBLESHOOTING

This section addresses common issues you might encounter with your gazebo.

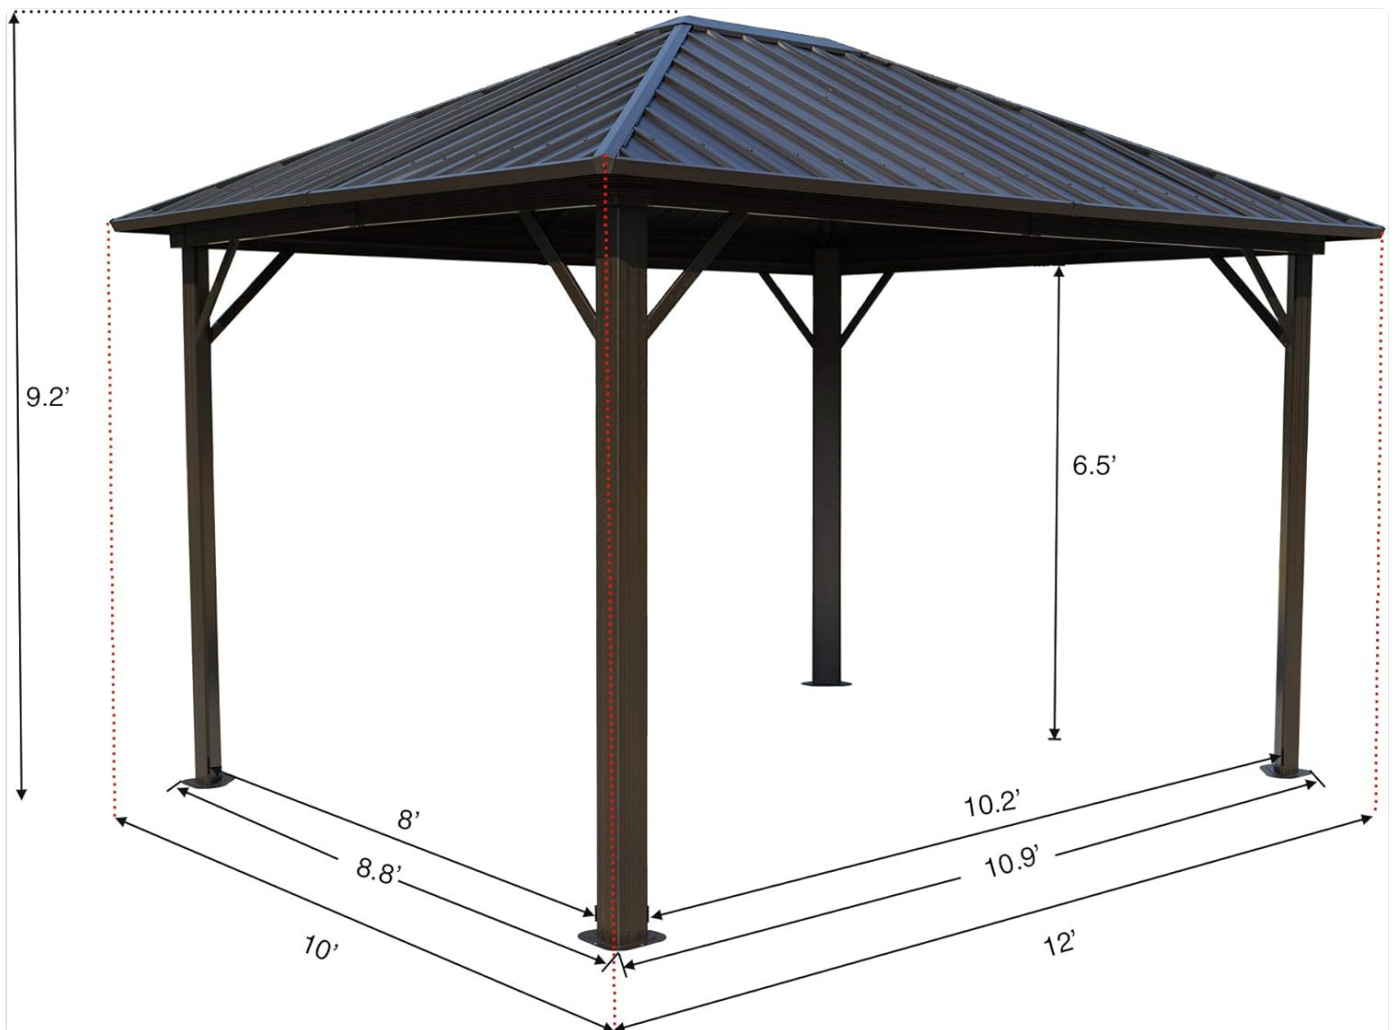

Problem	Possible Cause	Solution
Parts do not align during assembly.	Incorrect orientation of parts; bolts overtightened prematurely; manufacturing tolerance variations.	Review the instruction manual diagrams carefully. Loosen all bolts, adjust alignment, then retighten gradually. Do not force parts. If issues persist, contact customer support.
Gazebo feels unstable or wobbly.	Not properly anchored; loose bolts; uneven ground.	Ensure all frame bolts are securely tightened. Verify the gazebo is anchored to a solid, level surface. Re-level the ground if necessary.
Roof leaks.	Roof panels not properly overlapped or sealed; damaged panels.	Inspect roof panel overlaps and ensure they are correctly installed. Check for any damage to panels. Apply a suitable sealant if necessary.
Curtains/nets do not slide smoothly.	Debris in tracks; bent tracks; incorrect installation.	Clean tracks of any dirt or obstructions. Inspect tracks for damage and straighten if possible. Ensure curtains/nets are installed correctly on the tracks.

8. SPECIFICATIONS

Key technical specifications for the Kozyard 10'x12' Hardtop Gazebo:

- **Brand:** Kozyard

- **Model:** 10'x12' Hardtop Gazebo
- **Dimensions:** Approximately 10 ft x 12 ft (footprint)
- **Frame Material:** Rustproof Aluminum, Alloy Steel, Metal
- **Roof Material:** Galvanized Steel
- **Sidewall Material:** PBV-coated Polyester (Mosquito Netting), 180gsm Polyester (Privacy Curtains)
- **Color:** Dark Brown
- **Item Weight:** 235.4 Pounds
- **Snow Load Capacity:** 2000 kgs (approximately 4400 lbs)
- **Wind Resistance:** Up to 35 miles per hour
- **Water Resistance Level:** Water Resistant
- **UV Protection:** Yes (level not specified)
- **Assembly Required:** Yes

Detailed dimensions of the gazebo, including height and footprint measurements.

9. WARRANTY & SUPPORT

For specific warranty details, including coverage period and terms, please refer to the warranty card included with your product or contact Kozyard customer service directly. Keep your purchase receipt as proof of purchase.

If you require assistance with assembly, have questions about product features, or need to report missing/damaged parts, please contact Kozyard customer support:

- **Manufacturer:** Kozyard
