BEREST A13

BEREST A13 White Noise Machine & Baby Sleep Soother Instruction Manual

INTRODUCTION

This manual provides comprehensive instructions for the safe and effective use of your BEREST A13 White Noise Machine and Baby Sleep Soother. Please read this manual thoroughly before operation and retain it for future reference.

IMPORTANT SAFETY INFORMATION

For the safety of your child and to ensure proper device function, please adhere to the following guidelines:

- Do not use the device in the bath or near water.
- Do not use the USB cable while the machine is in use.
- This device is not a toy. Keep it out of reach of children.
- Use the device within recommended noise levels to prevent hearing damage.

PACKAGE CONTENTS

Verify that all items are present in the package:

- BEREST A13 White Noise Machine & Baby Sleep Soother
- Power Cable (USB)
- Built-in Rechargeable Battery (pre-installed)

SETUP

1. **Initial Charge:** Before first use, fully charge the device using the provided USB cable. Connect the cable to the device and a compatible USB power adapter (not included). The red charging indicator light will turn off when charging is complete.
2. **Placement:** Place the device on a stable surface or attach it to a crib, stroller, or diaper bag using its integrated clip. Ensure it is securely fastened and out of direct reach of the child.

3. **Power On:** Press and hold the power button (usually located on the top right) to turn on the device.

INTEGRATED CLIP ATTACHES TO STROLLERS, DIAPER BAGS, CRIBS & MORE.

Smart Baby Cry Sensor

- 1. Enable Cry Sensor:** Press the baby cry sensor button (labeled with a baby icon) to activate this feature. When enabled, the device will automatically detect a baby's crying and play music for 30 minutes to help soothe the baby back to sleep.
- 2. Continuous Operation with Cry Sensor:** To allow the machine to operate all night, ensure the cry sensor is enabled and no auto-off timer is set. The device will reactivate when it detects sound.

Image: A graphic illustrating the BEREST A13 device's cry sensor feature, showing sound waves emanating from the device towards a crying baby, with a sleeping baby below.

Auto-Off Timer

- Set Timer:** Press the timer button (labeled with a clock icon) to select an auto-off duration of 20, 40, or 60 minutes. The device will automatically shut off after the selected time.
- Disable Timer for All-Night Play:** If continuous operation is desired, ensure no timer setting is active.

○ SET A TIME

Featuring 3 timer options, **20-40-60min** auto-off timer options available (Please don't set the timer if you want it to play all night)

MAINTENANCE

- **Cleaning:** Wipe the device with a soft, dry cloth. Do not use abrasive cleaners or immerse in water.
- **Storage:** Store the device in a cool, dry place when not in use.
- **Battery Care:** The built-in lithium-ion battery is rechargeable. Recharge when the power is low. Avoid fully depleting the battery frequently to prolong its lifespan.

The built – in lithium battery and twelve hours long standby

Environmentally friendly and helps you save a lot of disposable battery cost!

TROUBLESHOOTING

Problem	Possible Cause	Solution
Device does not turn on.	Low battery or device is off.	Charge the device fully. Press and hold the power button for 3 seconds to turn on.
No sound or projector light.	Volume too low, light off, or device paused.	Increase volume. Press the light button to activate. Press the power button to unpause.
Auto-off timer not working as expected.	Incorrect timer setting or cry sensor interference.	Ensure the desired timer setting (20/40/60 min) is selected. If continuous play is desired, ensure no timer is set. Note that the cry sensor may reactivate the device if it detects sound, overriding a set timer for continuous soothing.

Problem	Possible Cause	Solution
Cry sensor not activating or too sensitive.	Sensor not enabled or environmental factors.	Ensure the cry sensor button is pressed to enable it. The sensor is sensitive; ensure the device is placed in a quiet environment to avoid false triggers.
Projected stars are dim.	Brightness setting is low or room is too bright.	Adjust brightness using the brightness control button. Ensure the room is sufficiently dark for optimal projection.
