# RYDEEN JB01 Jeep Spare Tire Backup Camera Bracket Instruction Manual

Model: JB01

## INTRODUCTION

This manual provides detailed instructions for the installation, operation, and maintenance of your RYDEEN JB01 Jeep Spare Tire Backup Camera Bracket. The JB01 is designed to securely mount compatible RYDEEN MINy backup cameras to the spare tire carrier of Jeep Wrangler vehicles, offering a stable and integrated solution for rear-view visibility.

## Key Features

- Designed specifically for RYDEEN MINy backup cameras.
- Constructed from sturdy metal for durability.
- Rigid design ensures stable camera mounting.
- Integrates seamlessly with Jeep spare tire carriers.

## SETUP AND INSTALLATION

Proper installation of the RYDEEN JB01 bracket is crucial for optimal performance of your backup camera. Please follow these steps carefully.

## OPERATION

---

The RYDEEN JB01 is a mounting bracket and does not require active operation. Once installed, it provides a stable platform for your RYDEEN MINy backup camera. The camera's operation will be governed by its own instruction manual and your vehicle's electrical system.

## MAINTENANCE

---

- **Regular Inspection:** Periodically check the bracket and camera for any signs of looseness, damage, or corrosion. Ensure all mounting screws are tight.
- **Cleaning:** Clean the bracket and camera housing with a soft, damp cloth. Avoid abrasive cleaners or solvents that could damage the finish or camera lens.
- **Environmental Factors:** While designed for outdoor use, extreme weather conditions (e.g., heavy snow, ice, prolonged direct sunlight) may require more frequent inspection.

## TROUBLESHOOTING

---

## Camera Not Stable

If the camera appears loose or vibrates excessively, check all mounting points on the JB01 bracket and ensure they are securely fastened. Also, verify that the bracket itself is tightly secured to the vehicle's spare tire carrier.

## Obstructed View

Ensure that the camera lens is clean and free from dirt, mud, or snow. Verify that no part of the spare tire or wheel is obstructing the camera's field of view. Adjust the camera angle if necessary, following the instructions provided with your RYDEEN MINy camera.
