Redragon H211

Redragon H211 Cronus White Gaming Headset User Manual

Model: H211

Introduction

Thank you for choosing the Redragon H211 Cronus White Wired Gaming Headset. This manual provides detailed instructions for setting up, operating, and maintaining your new headset to ensure optimal performance and longevity. Designed for an immersive gaming experience, the H211 Cronus combines high-quality audio with comfortable design and broad compatibility.

The Redragon H211 Cronus White Gaming Headset, showcasing its sleek design and integrated microphone.

Key Features

- **Immersive Audio:** Equipped with 40mm audio drivers for crisp highs and thundering lows, delivering stereo surround sound for a fully immersive gaming experience.
- **Clear Communication:** Features a unidirectional noise-canceling microphone that picks up your voice clearly while suppressing background noise, ensuring smooth team communication. The microphone is adjustable up to 120 degrees.
- **Dynamic RGB Backlight:** Enhance your gaming atmosphere with vibrant dynamic RGB lighting effects integrated into the earcups.
- **Comfortable Design:** Designed with a free-adjustable headband and cozy memory foam earpads for comfortable wear during extended gaming sessions.
- **Multi-platform Compatibility:** Compatible with PC, PlayStation, Xbox, Switch, and other devices with 3.5mm connections.

Setup Guide

1. **Connect Audio:** Plug the 3.5mm audio jack into the corresponding port on your PC, PlayStation, Xbox controller, or Nintendo Switch.
2. **Connect USB for RGB (Optional):** If you wish to enable the dynamic RGB lighting, plug the USB connector into an available USB port on your device. Note that the USB connection is solely for powering the RGB lighting and does not transmit audio.
3. **Adjust Headband:** Extend or retract the headband to achieve a comfortable fit on your head.
4. **Position Microphone:** Adjust the flexible microphone boom to an optimal position near your mouth for clear voice pickup.

Operating Instructions

- **Volume Control:** Use the volume wheel located on the left earcup to adjust the audio output level. Rotate upwards to increase volume and downwards to decrease.

Close-up view of the volume control wheel located on the earcup.

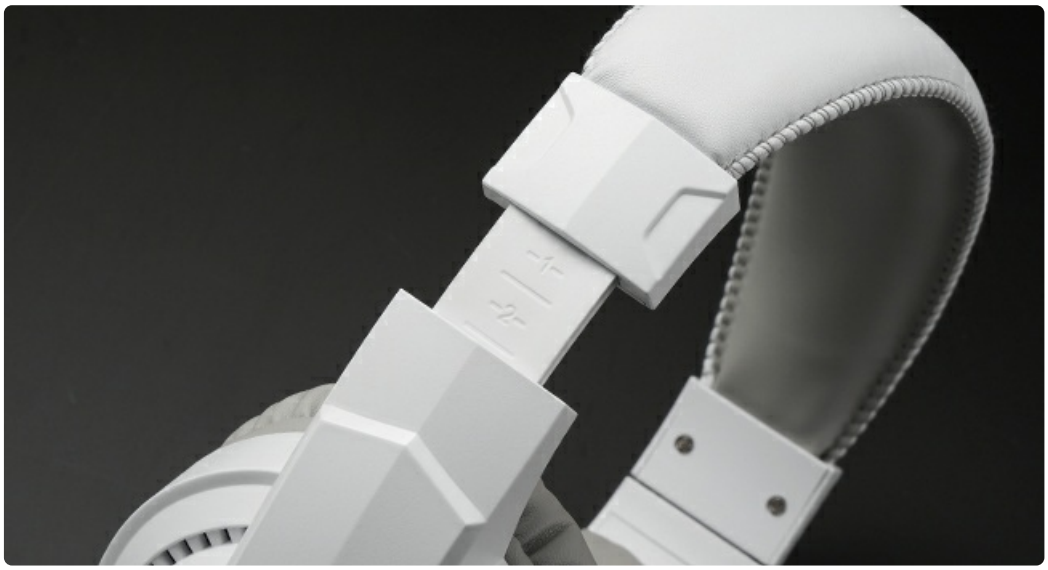

- **Microphone Mute:** The headset features an in-line control for muting and unmuting the microphone. Refer to the physical control on the cable for the specific switch.
- **RGB Lighting:** The dynamic RGB lighting will activate automatically when the USB connector is plugged in. There are no user-adjustable settings for the RGB lighting patterns.

Comfort and Design

The Redragon H211 Cronus headset is engineered for maximum comfort during prolonged use. The over-ear design with soft memory foam earpads provides a comfortable fit and helps with sound isolation. The headband is freely adjustable to accommodate various head sizes, ensuring a secure yet comfortable experience.

Maintenance

- **Cleaning:** Use a soft, dry cloth to wipe down the headset. For stubborn dirt, a slightly damp cloth can be used, but ensure no moisture enters the earcups or microphone.
- **Storage:** Store the headset in a cool, dry place away from direct sunlight and extreme temperatures. Avoid placing heavy objects on top of the headset.
- **Cable Care:** Avoid sharp bends or excessive pulling on the cable to prevent internal damage.

Troubleshooting

Problem	Possible Cause	Solution
No sound from headset	Volume too low or muted; Incorrect audio output device selected; Loose connection.	Increase volume using the wheel or system settings; Select the headset as the default audio output device; Ensure 3.5mm jack is fully inserted.
Microphone not working	Microphone muted; Incorrect input device selected; Microphone not positioned correctly.	Unmute microphone via in-line control or system settings; Select the headset microphone as the default input device; Adjust microphone boom closer to your mouth.
RGB lighting not working	USB not connected or faulty USB port.	Ensure USB connector is securely plugged in; Try a different USB port.
Sound distortion	Volume too high; Audio source issue.	Lower the volume; Test with a different audio source.
