S-Link SPGX-33

S-Link SPGX-33 3-Outlet Child-Protected Power Strip User Manual

Model: SPGX-33

1. Introduction

Thank you for choosing the S-Link SPGX-33 3-Outlet Child-Protected Power Strip. This device is designed to provide convenient and safe power distribution for your electronic appliances. Please read this manual carefully before use to ensure proper operation and to prevent damage or injury. Keep this manual for future reference.

2. Safety Information

To reduce the risk of electric shock, fire, or injury, always follow these basic safety precautions:

- **Indoor Use Only:** This power strip is designed for indoor use in dry locations. Do not use it outdoors or in wet conditions.
- **Proper Grounding:** Ensure the wall outlet you are plugging the power strip into is properly grounded.
- **Overload Protection:** Do not exceed the maximum electrical rating of the power strip (16A, 250V). Overloading can cause overheating and fire.
- **Child Protection:** The outlets are equipped with child protection shutters to prevent accidental insertion of objects.
- **Avoid Daisy-Chaining:** Do not plug one power strip into another.
- **Cable Care:** Do not run the power cord under carpets, furniture, or heavy objects. Inspect the cord regularly for damage.
- **Ventilation:** Do not cover the power strip, as this may lead to overheating.
- **Maintenance:** Do not attempt to open or modify the power strip. Refer all servicing to qualified personnel.

3. Product Features

- 3 AC outlets for multiple device connections.
- Integrated child protection shutters on each outlet.
- 1.5-meter full copper cable (1.5mm² cross-section) for efficient power delivery.

6. Operating Instructions

1. After plugging the power strip into a wall outlet, press the illuminated On/Off switch to turn on the power strip. The switch will light up when the power is on.
2. Connect your electronic devices to the available AC outlets on the power strip.
3. To turn off power to all connected devices, press the On/Off switch again. The light will turn off.
4. Always ensure that the total power consumption of all connected devices does not exceed the power strip's maximum rating.

7. Maintenance

- **Cleaning:** Disconnect the power strip from the wall outlet before cleaning. Use a soft, dry cloth to wipe the surface. Do not use liquid cleaners or aerosols.
- **Storage:** When not in use for extended periods, store the power strip in a cool, dry place.
- **Inspection:** Periodically inspect the power cord and the power strip for any signs of damage, such as frayed wires, cracks, or loose connections. If damage is found, discontinue use immediately.

8. Troubleshooting

- **No Power to Devices:**
  - Ensure the power strip's On/Off switch is pressed and illuminated.
  - Check if the power strip's main plug is securely inserted into the wall outlet.
  - Verify that the wall outlet itself is functional by plugging in another device directly.
  - Ensure the total load of connected devices does not exceed the power strip's maximum rating.
- **Power Strip Feels Hot:**
  - Immediately disconnect all devices and unplug the power strip.
  - This indicates an overload. Reduce the number of connected devices or use devices with lower power consumption.
