OPERATING INSTRUCTIONS

Display Mirroring

Once connected, your Mac or iPad Pro display will automatically mirror to the HDMI-enabled TV or display. You may adjust display settings on your device, such as resolution or arrangement, through your device's system preferences or control center.

USB Device Connection

Connect compatible USB devices to the standard USB-A port. The adapter supports data transfer for devices like flash drives and cameras. It also facilitates syncing and charging for iOS devices when connected via a USB cable.

Charging

To maintain power to your Mac or iPad Pro while using the adapter, connect a USB-C charging cable to the adapter's dedicated USB-C input port. This allows pass-through charging to your device.

TROUBLESHOOTING

- Try disconnecting and reconnecting the adapter and all associated cables.

USB Device Not Recognized

- Ensure the USB device is properly inserted into the adapter's USB-A port.
- Test the USB device directly with your Mac or iPad Pro (if possible) to rule out device-specific issues.
- Some high-power USB devices may require external power and might not function solely through the adapter.
