KEY FEATURES

Palm Rejection Technology

Rest your palm comfortably on the iPad screen while writing or drawing, just like with a traditional pencil and paper. This feature prevents unintended marks and allows for a natural writing experience without the need for special gloves.

Palm Rejection, No Gloves Required

Feel free to rest your hand on screen.
The pen can be written like a pencil.

Image: A user's hand resting on the iPad screen while drawing with the stylus, showcasing the palm rejection feature.

Smart Touch Switch

The stylus pen features a smart touch switch for easy power control. Simply double-touch the top of the pen to turn it on or off. No Bluetooth pairing or app is required for basic functionality.

High Precision Tip

Equipped with an ultra-fine 1.5mm tip made of newly upgraded material, the stylus provides precise and accurate input. It ensures smooth, continuous lines without lag or breaks, allowing for detailed work. Please note, this stylus does not feature pressure sensitivity.

Long Battery Life & Fast Charging

The stylus pen features a built-in battery that provides up to 15 hours of continuous use on a single charge. It supports fast charging via a USB-C cable, requiring only 20 minutes for a full charge. An auto-sleep mode activates after five minutes of inactivity to conserve power.

Long Standby & Fast Charging

20mins Charging time

20hours Continuous Use

5mins Auto sleep

SETUP

- Initial Charge:** Before first use, fully charge the stylus pen using the provided USB-C cable. Connect the cable to the pen's charging port and a compatible USB power source. The indicator light will show charging status (e.g., red for charging, green for full).
- Power On/Off:** Double-touch the top of the stylus pen to turn it on. The indicator light will illuminate. Double-touch again to turn it off.
- Disconnect Previous Stylus (if applicable):** If you have previously paired an Apple Pencil or another stylus with your iPad, ensure it is disconnected or Bluetooth is temporarily turned off on your iPad before using the XIRON Stylus Pen. This stylus does not require Bluetooth pairing.

OPERATING INSTRUCTIONS

Once powered on, the XIRON Stylus Pen is ready for immediate use with your compatible iPad.

General Use:

Simply touch the pen tip to the iPad screen to navigate, select, or interact with apps. The palm rejection feature allows you to rest your hand naturally on the screen.

Sketching and Drawing:

Use the precise tip for detailed artwork, sketching, and coloring in drawing applications. The smooth performance ensures your strokes are accurately rendered.

Writing and Note-Taking:

Ideal for digital note-taking, annotating documents, and handwriting. The pen's design mimics a traditional writing instrument for a comfortable experience.

MAINTENANCE

- **Cleaning:** Wipe the stylus pen with a soft, dry cloth. Do not use abrasive cleaners or solvents.
- **Storage:** Store the pen in a cool, dry place away from direct sunlight and extreme temperatures.
- **Tip Care:** The tip is durable, but avoid excessive force when writing or drawing. If the tip becomes worn,

replacement tips may be available from the manufacturer.

- **Charging:** Charge the pen regularly to maintain battery health, even if not in frequent use.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Pen not responding.	Pen is off or battery is low.	Double-touch the top of the pen to turn it on. Charge the pen if the indicator light is off or red.
Inaccurate or lagging input.	Another stylus (e.g., Apple Pencil) is connected to the iPad.	Go to iPad Settings > Bluetooth and disconnect or "Forget This Device" any previously paired Apple Pencils or other styluses. Restart the XIRON Stylus Pen.
Palm rejection not working.	Using an incompatible iPad model or app.	Ensure your iPad model is listed in the compatibility section. Most modern drawing/note-taking apps support palm rejection automatically.
Pen turns off unexpectedly.	Accidental touch to the power switch or auto-sleep mode activated.	Double-touch the top to turn it back on. The pen enters auto-sleep after 5 minutes of inactivity to save power.
