3. SETUP AND ASSEMBLY

Follow the included instruction manual for step-by-step guidance on building various marble run configurations. The pieces are designed to interlock securely, allowing for stable and creative structures.

General Assembly Tips:

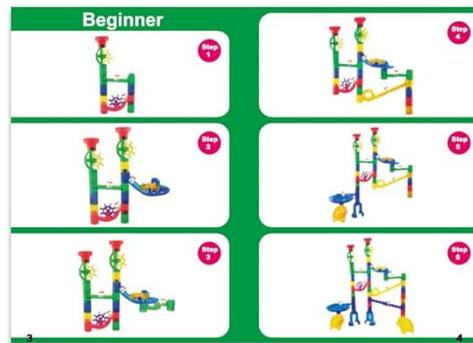

- Begin by identifying the base pieces and ensuring they are placed on a flat, stable surface.
- Connect vertical tubes and horizontal tracks firmly. A slight push may be needed to ensure a secure fit.
- Refer to the instruction booklet for example designs, especially for initial builds.
- Experiment with different piece arrangements to create unique marble paths.

4. OPERATING INSTRUCTIONS

Once your marble run is assembled, place the marbles at the designated starting points (e.g., funnels or top trays) and watch them race through the tracks. The transparent pieces allow for clear observation of the marbles' journey.

Playing with Glow-in-the-Dark Marbles:

- To activate the glow effect, expose the glow-in-the-dark marbles to a bright light source (such as a lamp or sunlight) for a few minutes.
- Turn off the lights or move to a dark room to observe the marbles glowing as they travel down the run.

5. MAINTENANCE

Cleaning:

- Wipe all plastic parts with a soft, damp cloth.
- Avoid using abrasive cleaners or harsh chemicals, as these may damage the plastic.
- Ensure all parts are completely dry before storing.

Storage:

- Disassemble the marble run when not in use to prevent damage and loss of pieces.
- Store all components, including marbles, in the original packaging or a suitable storage container.

6. TROUBLESHOOTING

Common Issues and Solutions:

- **Marbles getting stuck:** Check all track connections to ensure they are properly aligned and securely fitted. Loose or misaligned pieces can obstruct marble flow.
- **Structure instability:** Verify that all base pieces are firmly connected and placed on a flat, level surface. If the structure appears wobbly, gently press down on connections to ensure they are fully engaged. Rebuild sections if necessary to improve stability.
- **Glow-in-the-dark marbles not glowing:** Ensure the marbles have been exposed to a strong light source for an adequate period (typically several minutes) to charge their glow properties.
