

LUXPRO XP-915

LUXPRO XP915 Compact Tactical Rechargeable Flashlight User Manual

Model: XP-915

INTRODUCTION

The LUXPRO XP915 is a high-performance, compact tactical flashlight engineered for reliability and versatility. With its robust aircraft-grade aluminum construction and patented TackGrip, it's built to withstand demanding conditions. This rechargeable flashlight delivers up to 1600 lumens of bright LED light, offering multiple modes to suit various needs, from everyday use to emergency situations.

KEY FEATURES

- **Rugged Construction:** Features LUXPRO's patented TackGrip and durable aircraft-grade aluminum construction for enhanced grip and longevity.
- **Rechargeable:** Conveniently charges via the included micro-USB cable, providing up to 11 hours of continuous use on lower settings.
- **Versatile Lighting:** Adjustable brightness from 120 to 1600 lumens, suitable for camping, emergency lighting,

or general use.

- **Multiple Lighting Modes:** Offers High, Medium, Low, and Hidden Strobe modes for adaptable illumination.
- **Compact Design:** Portable and easy to carry, perfect for various outdoor and indoor activities.

Just Plug It In

Conveniently charge
the flashlight with the
included micro-USB cable.

Figure 3: The flashlight features four distinct lighting modes: High, Medium, Low, and a Hidden Strobe, allowing users to select the appropriate brightness for any situation.

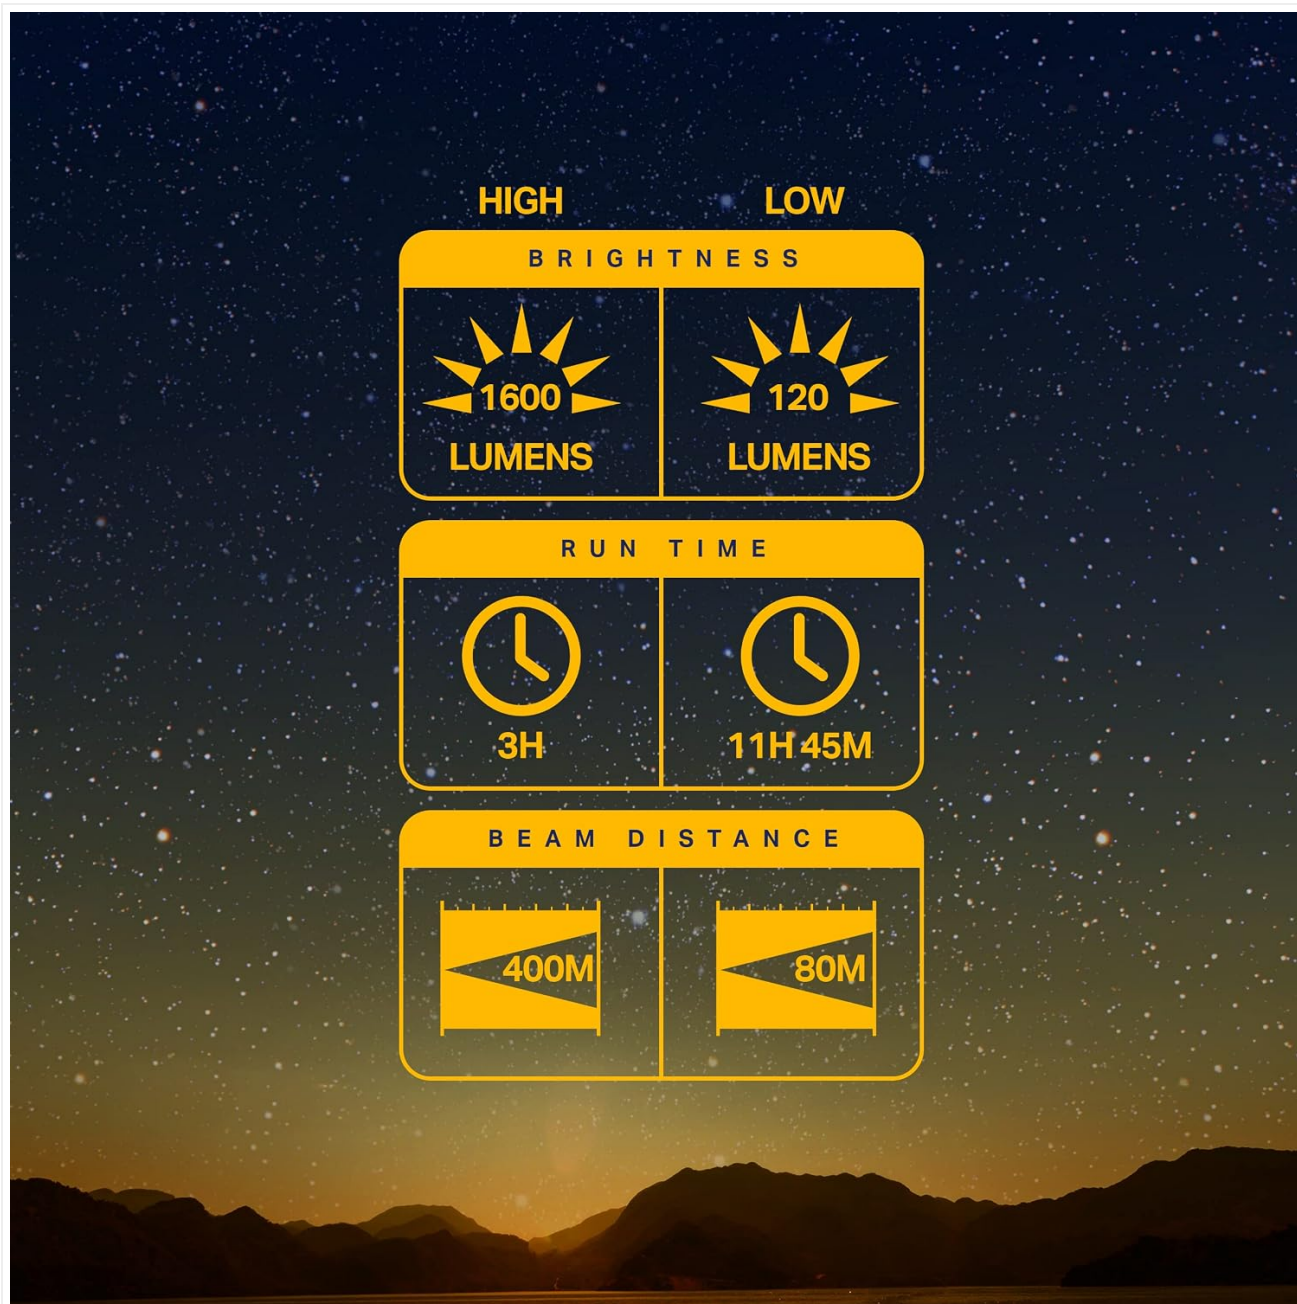

Figure 4: The patented TackGrip design is molded directly into the aluminum body, providing a secure and comfortable hold while enhancing durability.

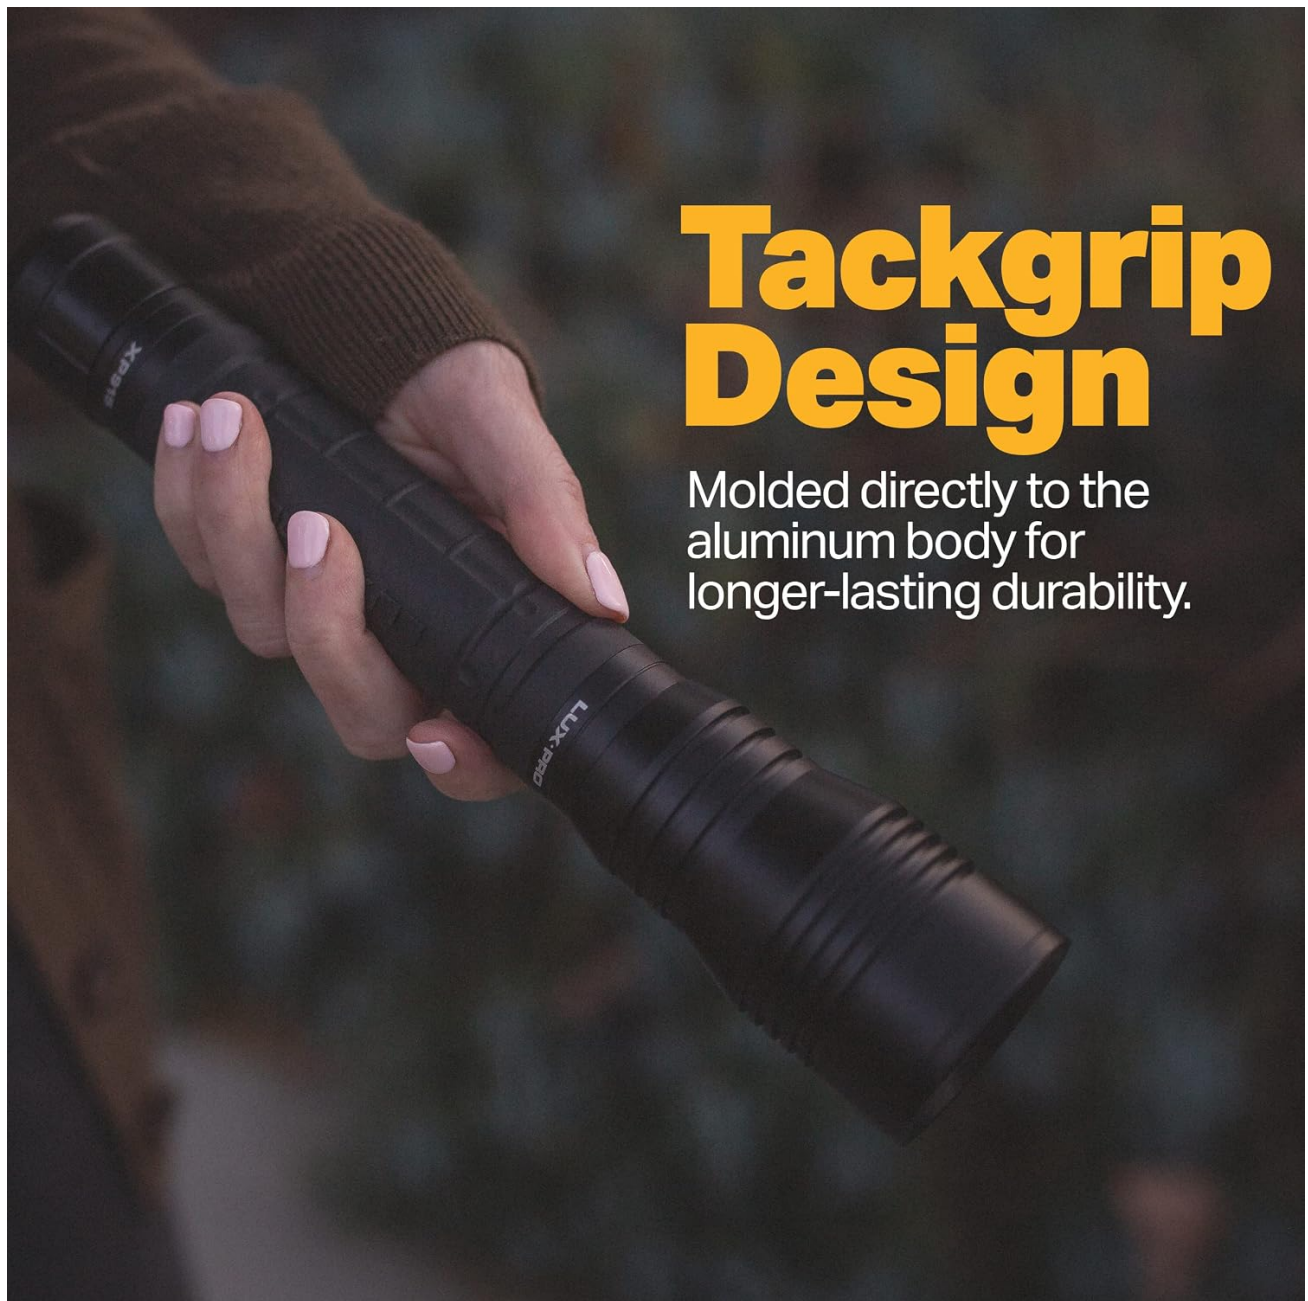

SETUP

Battery Installation and Charging

The LUXPRO XP915 comes with two 18650 Lithium-Ion batteries pre-installed. Before first use, it is recommended to fully charge the flashlight.

1. To charge, locate the micro-USB charging port on the flashlight body. This port is typically protected by a rotating collar or cover.
2. Rotate the collar or open the cover to expose the micro-USB port.
3. Insert the included micro-USB cable into the flashlight's port and connect the other end to a compatible USB power source (e.g., wall adapter, computer USB port).
4. An indicator light will typically show charging status (e.g., red for charging, green for fully charged).
5. Once fully charged, disconnect the cable and securely close the port cover to protect it from dust and

moisture.

Tackgrip Design

Molded directly to the aluminum body for longer-lasting durability.

OPERATING INSTRUCTIONS

Power On/Off and Mode Selection

The XP915 flashlight features a single button for power control and mode cycling.

1. **Power On/Off:** Press the power button located on the tail cap or side of the flashlight to turn it on. Press again to turn it off.
2. **Cycle Modes:** With the flashlight on, lightly press the power button (without fully clicking) to cycle through the different lighting modes: High, Medium, Low, and Strobe.
3. **High Mode:** Provides maximum brightness (1600 lumens) for extensive illumination.

4. **Medium Mode:** Offers a balanced brightness for general tasks.
5. **Low Mode:** Provides minimal brightness (120 lumens) for extended runtime or close-up work.
6. **Strobe Mode:** A flashing light mode, often used for signaling or self-defense.

Figure 6: Performance specifications for High and Low brightness settings, including lumens, runtime, and beam distance.

MAINTENANCE

Cleaning and Storage

- **Cleaning:** Wipe the flashlight body with a soft, damp cloth. Do not use abrasive cleaners or solvents.
- **Battery Care:** If storing the flashlight for an extended period, remove the batteries to prevent leakage. Recharge batteries periodically if not in use to maintain their lifespan.
- **Lubrication:** Periodically apply a thin coat of silicone grease to the O-rings and threads to maintain water resistance and smooth operation.
- **Storage:** Store the flashlight in a cool, dry place away from direct sunlight and extreme temperatures.

TROUBLESHOOTING

Common Issues and Solutions

Issue	Possible Cause	Solution
Flashlight does not turn on.	Low or dead battery; loose battery connection; dirty contacts.	Charge the battery; ensure batteries are inserted correctly; clean battery contacts with a clean cloth.
Light is dim or flickers.	Low battery; loose head/tail cap; dirty contacts.	Recharge the battery; tighten head/tail cap; clean battery contacts.
Flashlight gets hot during use.	Normal operation at high brightness levels; prolonged use.	This is normal for high-lumen flashlights. Reduce brightness or allow to cool if uncomfortable.
Charging indicator not working.	Cable not properly connected; faulty cable/charger.	Ensure cable is fully inserted; try a different USB cable or power source.

SPECIFICATIONS

Feature	Detail
Brand	LUXPRO

Answered questions about this manual

Why is my LUXPRO XP-915 flashlight stuck in strobe mode and how can I change it to other lighting modes?

The LUXPRO XP-915 uses a single button for both power and mode cycling. If your flashlight is stuck in strobe mode, it is likely due to how the button is being pressed or a...
