COLMI SN60 Plus Smart Watch USB Charger Cables User Manual

INTRODUCTION

This manual provides essential instructions for the COLMI SN60 Plus Smart Watch USB Charger Cables. These cables are designed to offer a reliable and safe charging solution specifically for your COLMI SN60 Plus smartwatch. Please read this manual carefully to ensure proper use and maintenance of your charging cables.

PRODUCT OVERVIEW

The COLMI SN60 Plus USB Charger Cables are replacement charging accessories specifically designed for the COLMI SN60 Plus smartwatch. Each package typically contains two charging cables, ensuring you have a spare or can charge in multiple locations.

SETUP INSTRUCTIONS

Follow these steps to set up and begin charging your smartwatch:

1. Connect the USB-A end of the charging cable to a compatible USB power source. This can be a computer's USB port, a USB wall adapter (5V/1A recommended), or a power bank. Ensure the power source provides stable voltage.
2. Align the two magnetic charging pins of the charger base with the corresponding charging contacts located on the back of your COLMI SN60 Plus smartwatch. The charger is designed for a secure, tight connection.
3. Gently place the smartwatch onto the charger base. The magnetic connection should automatically secure the watch in the correct position.
4. Verify that the smartwatch display indicates that it is charging. A charging icon or battery percentage increase should be visible.

OPERATING THE CHARGER

Once properly connected, the charger will automatically begin to supply power to your COLMI SN60 Plus smartwatch.

- **Stable Connection:** The charger features a tight connection design to prevent accidental disconnections during the charging process, ensuring consistent power delivery.
- **Safety Features:** Built-in short-circuit and overload protection mechanisms are integrated into the charger. These features ensure stable and safe charging, protecting both the charger and your smartwatch from potential electrical damage.

Always ensure the smartwatch is correctly seated on the charging pins for optimal performance and to prevent charging interruptions.

MAINTENANCE AND CARE

Proper care will extend the lifespan of your charging cables:

- **Cleaning:** Use a soft, dry, lint-free cloth to gently wipe the charging pins and the cable. Avoid using

liquid cleaners, solvents, or abrasive materials, as these can damage the cable or contacts.

- **Storage:** Store the charging cables in a cool, dry place away from direct sunlight, moisture, and extreme temperatures when not in use. Avoid tangling the cable.
- **Handling:** Avoid bending or twisting the cable excessively, as this can damage the internal wires and insulation. Always grasp the USB plug when connecting or disconnecting from a power source; do not pull directly on the cable cord.

Regularly inspect the cable for any signs of wear, fraying, or damage. Discontinue use immediately if any damage is observed to prevent potential hazards.

TROUBLESHOOTING

If you encounter issues with your charging cables, refer to the table below for common problems and solutions:

Problem	Possible Cause	Solution
Smartwatch not charging.	Loose connection between charger and watch, or charger and power source. Faulty power source.	Ensure the smartwatch is correctly aligned on the charging pins. Check that the USB plug is fully inserted into the power source. Try a different USB port or power adapter.
Charging is intermittent.	Dust or debris on charging contacts. Damaged cable.	Clean the charging pins on both the charger and the smartwatch with a dry cloth. Inspect the cable for any visible damage. If damaged, replace the cable.
Charger feels excessively warm during use.	Normal operation (slight warmth). Potential overload or incompatible power source.	A slight warmth is normal during charging. If it becomes excessively hot, disconnect immediately. Ensure you are using a compatible 5V/1A power source. The charger has built-in overload protection.
