

VAULTEK VLP

VAULTEK LifePod 10 Compact Lockable Case User Manual

Model: VLP

Brand: VAULTEK

1. INTRODUCTION

The VAULTEK LifePod 10 is a compact, lockable, and weather-resistant portable case designed for secure storage. It integrates VAULTEK's precision-engineered safe technology with an anti-impact latch design, offering robust protection for your valuables. The LifePod 10 is easily portable, making it suitable for use in your car, office, on a boat, in backpacks, or within luggage. It is also TSA compliant for travel.

Constructed from advanced non-metal T3 polymer, the LifePod 10 is both lightweight and rugged, engineered for superior strength and drop-tested durability. Its dual side compression latches and inner rubber gasket create an airtight, dustproof seal, allowing it to float in water and protect contents from environmental factors.

2. SETUP

2.1 Battery Installation

The LifePod 10 is powered by a 9V alkaline battery (not included). The battery compartment is located internally. Ensure the battery is inserted with correct polarity. Under normal use, the battery life can last up to one year. The LifePod can also function as a water-resistant case without a battery.

2.2 Setting Up Your Master Code

The Smart Sense Keypad allows for quick entry using a customizable 4–8 digit master code. Refer to the Quick Start Guide included with your product for detailed instructions on programming your master code. This process typically involves pressing a program button (often located inside the safe) and then entering your desired code.

2.3 Attaching the Steel Security Cable

For enhanced security, utilize the included steel security cable. This cable can be looped around a fixed object and then secured within the LifePod 10 when closed, preventing unauthorized removal of the entire case. The case features designated attachment points for the cable.

What's Included

Everything you need including Vaultek's 5-Star Support.

Manual Keys

Steel Security Cable

Lid Organizer

Foam Padding

Figure 2: Included accessories: manual keys, steel security cable, lid organizer, and foam padding.

2.4 Interior Customization

The LifePod 10 comes with interior crate foam padding and a lid organizer. The foam padding can be

customized to fit your items snugly, providing protection against impacts. The lid organizer offers additional storage for smaller items like cards or cash.

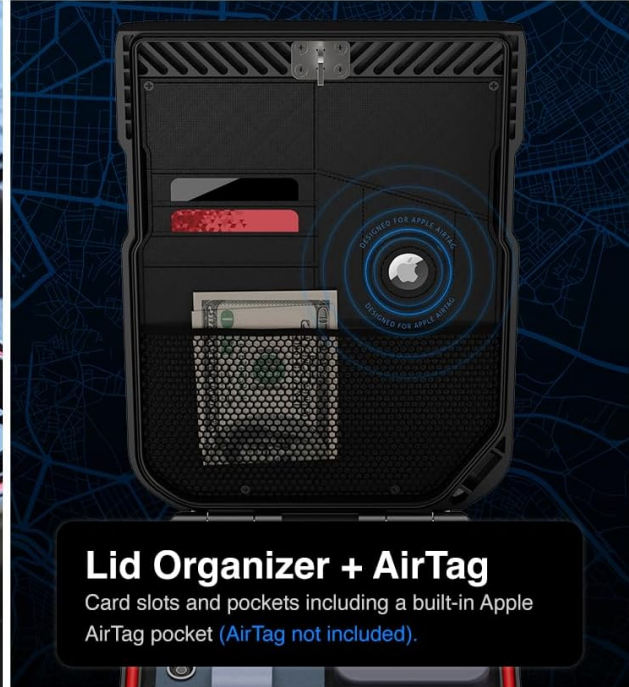

Space for everyday carry.

High Density Foam Interior + Lid Organizer

Spacious Storage

With interior dimensions of 7.75" L x 6" W x 1.75" H to create your perfect everyday carry.

Lid Organizer + AirTag

Card slots and pockets including a built-in Apple AirTag pocket (AirTag not included).

Enough space for everyday carry.
With bottom and Lid Storage.

Fits handguns up to 7.75"

3. OPERATING INSTRUCTIONS

3.1 Unlocking with Smart Sense Keypad

To unlock the LifePod 10 using the Smart Sense Keypad, simply enter your programmed 4-8 digit master code. The keypad is backlit and touch-activated for ease of use in various lighting conditions.

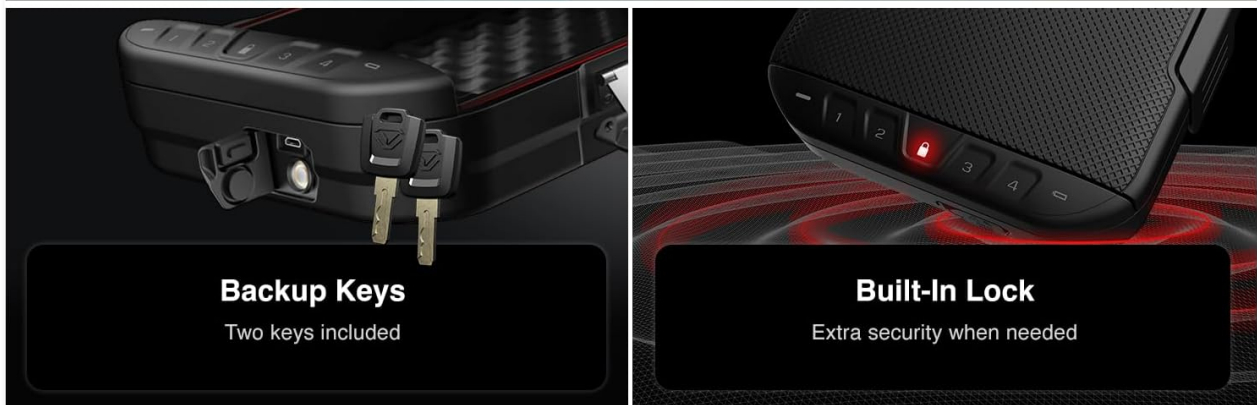

Built-in Lock + Authorized Access

Premium entry methods with anti-impact latch and backlit keys.

Smart Sense™ Keypad

4-Digit backlit keypad and master code can be 4-8 digits long.

Backup Keys

Two keys included

Built-In Lock

Extra security when needed

3.2 Unlocking with Manual Keys

For added assurance or in case of battery depletion, backup manual key entry is available. Insert one of the two provided manual keys into the keyhole located on the front of the LifePod 10 and turn to unlock.

3.3 Locking the LifePod 10

The LifePod 10 features a one-touch lock action for fast securing. Close the lid firmly until the latches engage. The built-in lock system provides immediate security.

3.4 Anti-Picking Feature

A unique anti-picking feature can be enabled from the interior of the safe. This feature disables the front keyway, preventing the lock from being picked open. Consult your Quick Start Guide for instructions on how to enable or disable this feature.

4. MAINTENANCE

4.1 Battery Replacement

The LifePod 10 uses a 9V alkaline battery. Replace the battery annually or when the low battery indicator is displayed. Always use fresh, high-quality alkaline batteries for optimal performance.

4.2 Emergency Power

In the event of a dead battery, the LifePod 10 features an integrated micro-USB port disguised by the front rubber keyhole cover. Connect a micro-USB cable to an external power source to temporarily power the unit and gain access via the keypad.

5. TROUBLESHOOTING

5.1 Unable to Open with Keypad

- Ensure the battery is not depleted. Use the micro-USB port for emergency power if needed.
- Verify you are entering the correct 4-8 digit master code.
- Attempt to use the backup manual keys.

5.2 Case Not Sealing Properly

- Check that the dual side compression latches are fully engaged.
- Inspect the inner rubber gasket for any obstructions or damage. Ensure it is clean and properly seated.
- Ensure no items inside the case are preventing the lid from closing completely.

6. SPECIFICATIONS
