Noma Small

Noma Air Purifier Filter (Small) User Manual

Model: Small | Brand: Noma

Introduction

This manual provides essential information for the proper use and maintenance of your Noma Air Purifier Filter (Small). This filter is designed to work with compatible Noma Air Purifiers, ensuring clean and healthy air by capturing airborne particles.
The Noma Air Purifier Filter features TRUE HEPA air filtration, capable of filtering air down to 0.3 microns, and is built for long-lasting, high-quality performance.

Product Overview

Image: The Noma Air Purifier Filter (Small). This cylindrical filter features pleated white filter material with grey plastic rings at the top and bottom, and a black activated carbon layer visible at the top opening.

Setup and Installation

The Noma Air Purifier Filter is designed for easy replacement. Follow these general steps to install your new filter:

1. **Unplug the Air Purifier:** Before attempting any filter replacement, ensure the air purifier unit is unplugged from the power outlet to prevent accidental operation.
2. **Access the Filter Compartment:** Refer to your specific Noma Air Purifier model's manual for instructions on how to open the filter compartment. This usually involves removing a back panel or base cover.
3. **Remove the Old Filter:** Carefully remove the used filter. It may be dusty, so dispose of it properly.
4. **Insert the New Filter:** Place the new Noma Air Purifier Filter into the compartment, ensuring it is seated correctly. The filter is designed to fit precisely.

5. **Close the Compartment:** Securely close the filter compartment door or panel.
6. **Plug In and Reset:** Plug the air purifier back into the power outlet. Some models may require a filter reset button to be pressed after replacement. Consult your air purifier's manual for specific instructions.

Operating Instructions

Once the filter is correctly installed, the air purifier can be operated according to its own user manual. The Noma Air Purifier Filter works continuously to capture airborne particles as air passes through it.

- **Continuous Filtration:** The filter provides ongoing air purification as long as the air purifier is running.
- **Optimal Performance:** For optimal air quality, ensure the air purifier is placed in an area with good air circulation and that the filter is replaced regularly.

Maintenance

Regular filter replacement is crucial for maintaining the efficiency and effectiveness of your Noma Air Purifier. The filter's lifespan depends on usage and air quality conditions.

- **Replacement Schedule:** For optimal performance, replace the Noma True HEPA Air Filter every**3 to 6 months**, or three to four times per year, depending on usage and environmental factors.
- **Signs of a Clogged Filter:** Indicators that your filter may need replacement include decreased airflow from the purifier, increased noise from the unit, or a noticeable decline in air quality.
- **Cleaning:** This filter is not washable and should not be cleaned with water or vacuumed. Attempting to clean the filter can damage its filtration capabilities.

Troubleshooting

If you experience issues with your air purifier after filter replacement, consider the following:

Problem	Possible Cause	Solution
Reduced Airflow	Filter not seated correctly; Filter is old/clogged; Air purifier intake/output blocked.	Ensure filter is properly installed; Replace filter if due; Check for obstructions around the purifier.
Persistent Odors	Filter is saturated with odors; Source of odor still present.	Replace filter; Identify and remove the source of the odor in the room.
Filter Indicator Light Remains On	Filter reset not performed.	Refer to your air purifier's manual for instructions on how to reset the filter indicator light after replacement.

Specifications

- **Brand:** Noma
- **Model:** Small (Compatible with NOMA True HEPA Small Air Purifier)
- **Filtration Type:** TRUE HEPA
- **Material:** Polyethylene, Polypropylene
- **Item Weight:** 0.48 Kilograms

- **Parcel Dimensions:** 26.16 x 18.29 x 18.03 cm
- **Recommended Replacement:** Every 3-6 months
