## 3. SETUP

### 3.1 Placement

Position the projector on a stable, flat surface or mount it to the ceiling. Ensure adequate ventilation around the unit. The TK860i features a 1.3X big zoom and lens shift, allowing for flexible placement and image adjustment without moving the projector itself. For a 100-inch screen, the projector can be placed approximately 8.2 feet away from the screen.

### 3.2 Power Connection

1. Connect the power cord to the projector's AC IN port.
2. Plug the other end of the power cord into a grounded electrical outlet.

### 3.3 Connecting Devices

The TK860i offers multiple connectivity options:

- **HDMI:** Connect Blu-ray players, gaming consoles, streaming devices, or computers using HDMI cables. The projector features multiple HDMI ports.
- **USB:** Use the USB ports for media playback or to power compatible streaming dongles.
- **Audio Out:** Connect external audio systems if desired.

## 4. OPERATING INSTRUCTIONS

### 4.1 Powering On/Off

1. Press the Power button on the projector or the remote control to turn the unit on.
2. To turn off, press the Power button again. A confirmation message may appear; confirm to shut down.

### 4.2 Initial Setup and Image Adjustment

1. Upon first power-on, follow the on-screen prompts to select your preferred language and projector position (e.g., Front, Rear, Front Ceiling, Rear Ceiling).
2. Use the **Focus** and **Zoom** rings near the lens to adjust the image clarity and size.

3. Utilize the **Lens Shift** feature (if available on your model) to vertically or horizontally adjust the image position without tilting the projector.
4. Apply **2D Keystone** correction via the menu to square the image if the projector is not perfectly perpendicular to the screen.

### 4.3 Input Source Selection

Press the **Source** button on the remote control or the projector's control panel to cycle through available input sources (HDMI1, HDMI2, USB, etc.).

### 4.4 Smart TV Features (Android TV)

The integrated Android TV dongle provides access to a wide range of streaming applications, including Netflix, YouTube, and Prime Video. Use the remote control to navigate the Android TV interface, browse content, and launch apps.

## 5. MAINTENANCE

---

### 5.1 Cleaning the Lens

Gently wipe the projector lens with a soft, lint-free cloth specifically designed for optical surfaces. Avoid using abrasive cleaners or excessive force.

### 5.2 Air Filter Cleaning

Regularly check and clean the air filter to ensure proper ventilation and prevent overheating. Refer to the full user manual for specific instructions on accessing and cleaning the filter.

### 5.3 Lamp Replacement

The projector lamp has a limited lifespan. When the lamp life indicator appears, replace the lamp according to the instructions in the full user manual. Always use genuine BenQ replacement lamps.

## 6. TROUBLESHOOTING

---

### 6.1 No Picture

- Ensure the projector is powered on and the input source is correctly selected.
- Check all cable connections (HDMI, power) to ensure they are secure.
- Verify that the connected source device is powered on and outputting a signal.

### 6.2 Blurry Image

- Adjust the focus ring on the projector lens until the image is sharp.
- Ensure the projector is at the correct distance from the screen for optimal focus.

### 6.3 No Audio

- Check the volume level on both the projector and the connected source device.
- If using external speakers, ensure they are properly connected and powered on.
- Verify audio settings in the projector's menu.
