- Remove the brush head and rinse both the brush head and the handle separately under running water.
- Wipe the handle dry with a clean cloth.
- Store the toothbrush in an upright position to allow it to air dry.

4. TROUBLESHOOTING

If you encounter any issues with your Oral-B Vitality electric toothbrush, refer to the following common troubleshooting tips:

- **Toothbrush not turning on:** Ensure the toothbrush is fully charged. Place it on the charger for at least 30 minutes and try again. Verify the power outlet is functional.
- **Reduced brushing power:** The battery may be low; place the toothbrush on the charger. If the issue

persists after charging, the brush head might be worn and require replacement.

- **Brush head not rotating effectively:** Check if the brush head is securely attached to the handle. If it is, and the power is on, consider replacing the brush head.
- **Unusual noise or vibration:** Ensure the brush head is correctly attached. If the noise persists, the internal mechanism might be affected. Contact customer support if necessary.
