Key Features

- **Dusk-to-Dawn Lighting:** Utilizes advanced dusk-to-dawn technology, ensuring the night light only illuminates when needed, which helps reduce energy consumption and monthly electricity costs.
- **Integrated Outlet and USB Port:** Features an automatic nightlight with a built-in pass-through electrical outlet and a USB charging port, allowing you to maintain full use of your wall outlet while providing light and charging capabilities.
- **Color Selectable:** Offers three selectable LED light colors: Green, Blue, or White (3000K), allowing you to customize the ambiance to your preference.
- **Automatic Light Sensor:** The night light automatically turns on in low light settings and turns off when sufficient ambient light is detected.
- **Versatile Placement:** Convenient for use in kitchens, hallways, bathrooms, living rooms, dorm rooms, or nurseries. Ideal for installation near stairs to enhance safety.
- **Long Lifespan:** Designed for a lifetime of 50,000 hours, ensuring long-lasting performance.

Setup and Installation

Unpacking

Carefully remove the SYLVANIA LED Night Light from its packaging. Inspect the unit for any signs of damage. If any

damage is observed, do not proceed with installation and contact customer support.

Placement

Select an indoor wall outlet that is clear of obstructions and where the night light's illumination will be most beneficial. Ensure the chosen location allows the dusk-to-dawn sensor to function effectively, avoiding areas with constant bright light during nighttime hours.

Power Connection

Plug the night light directly into a standard 120V AC wall outlet. The unit is designed to fit securely and provide a pass-through outlet for other devices. The night light will automatically activate when the ambient light levels are low enough for the sensor to detect darkness.

Operating Instructions

Dusk-to-Dawn Sensor Operation

The night light is equipped with an automatic dusk-to-dawn sensor. This sensor detects ambient light levels. When the surrounding area becomes dark, the night light will automatically turn on. Conversely, when sufficient light is present, the night light will automatically turn off. No manual intervention is required for this function.

Color Selection

To change the light color, gently tap the touch-sensitive area on the side of the night light. Each tap will cycle through the available colors: Green, Blue, and White. Select the color that best suits your preference or the room's ambiance.

USB Charging Functionality

The integrated USB port provides 5V, 2.1A output for charging compatible electronic devices such as smartphones, tablets, or other USB-powered gadgets. Simply connect your device's USB charging cable to the port on the night light. Ensure your device is compatible with the provided charging specifications.

Maintenance

Cleaning

To clean the night light, first unplug it from the wall outlet. Use a soft, dry cloth to wipe the exterior surfaces. Do not use abrasive cleaners, solvents, or harsh chemicals, as these may damage the finish or internal components. Ensure the unit is completely dry before plugging it back in.

Storage

If storing the night light for an extended period, unplug it and store it in a cool, dry place away from direct sunlight and extreme temperatures. Keeping the original packaging can help protect the unit during storage.

Troubleshooting

Common Issues and Solutions

Problem	Possible Cause	Solution
Night light does not turn on.	No power to the outlet; ambient light is too bright; unit is faulty.	Check if the outlet is live by plugging in another device. Ensure the room is sufficiently dark for the dusk-to-dawn sensor to activate. If issues persist, contact customer support.

Problem	Possible Cause	Solution
Color selection is unresponsive.	Improper touch; temporary malfunction.	Ensure you are gently tapping the designated touch-sensitive area. Unplug the unit for 30 seconds and then plug it back in to reset.
USB charging port is not working.	Device incompatibility; faulty cable; insufficient power.	Verify your device is compatible with 5V, 2.1A USB charging. Try a different USB cable. Ensure the night light is securely plugged into a live outlet.
