Heskins LLC AQS36N

Heskins AQS36N Waterproof Aqua Safe Grip Tape

Model: AQS36N | Brand: Heskins LLC

PRODUCT OVERVIEW

The Heskins AQS36N Aqua Safe Grip Tape is a high-performance anti-slip solution specifically engineered for use in wet and damp environments. Its unique, non-abrasive surface provides excellent grip without causing damage to bare skin or delicate materials, making it ideal for areas like showers, bathtubs, swimming pool surrounds, boats, and other marine applications. This tape is designed for durability and long-lasting performance in challenging conditions.

SETUP AND INSTALLATION

Proper installation is crucial for the optimal performance and longevity of the Heskins Aqua Safe Grip Tape. Follow these steps carefully:

- 1. Surface Preparation:** Ensure the application surface is clean, dry, and free from dust, grease, oil, or any other contaminants. For best adhesion, clean the surface thoroughly with an appropriate degreaser or alcohol and allow it to dry completely.
- 2. Temperature:** Apply the tape in an environment where the ambient temperature is between 10°C and 25°C (50°F and 77°F). Extreme temperatures can affect adhesion.
- 3. Cutting:** Measure the desired length of tape and cut it using sharp scissors or a utility knife. For corners or irregular shapes, pre-cut the tape to fit.
- 4. Application:** Peel back approximately 2-3 inches of the release liner from one end of the tape. Carefully position the exposed adhesive onto the prepared surface.
- 5. Adhesion:** Slowly peel away the remaining release liner while firmly pressing the tape down onto the surface, working from the applied end outwards. Use a rubber roller or a firm, flat object to apply even pressure across the entire surface of the tape, ensuring no air bubbles are trapped underneath.
- 6. Curing Time:** Allow the adhesive to cure for at least 24 hours before exposing the tape to heavy traffic or water. This allows the adhesive to form a strong bond with the surface.

OPERATING INSTRUCTIONS

Once installed, the Heskins Aqua Safe Grip Tape requires no specific "operation." Its function is to provide a continuous anti-slip surface. Users should simply walk or stand on the tape as they would on any other safe surface. The textured surface is designed to offer superior grip even when wet, reducing the risk of slips and falls.

- Ensure the tape is fully adhered to the surface before use.
- Avoid dragging heavy or sharp objects across the tape, as this may damage the surface.
- The tape is designed for foot traffic and light wheeled traffic.

MAINTENANCE

Regular maintenance will help preserve the effectiveness and appearance of your Heskins Aqua Safe Grip Tape.

- **Cleaning:** Clean the tape regularly with mild soap and water. Use a soft brush or cloth to remove dirt and debris from the textured surface. Rinse thoroughly with clean water.
- **Avoid Harsh Chemicals:** Do not use abrasive cleaners, strong solvents, or harsh chemicals, as these can degrade the tape's material and adhesive.
- **Inspection:** Periodically inspect the tape for any signs of wear, lifting edges, or damage. Address any issues promptly to maintain safety.
- **Repair/Replacement:** If sections of the tape become damaged or lose adhesion, they should be replaced to ensure continuous anti-slip protection.

TROUBLESHOOTING

Here are some common issues and their solutions:

Problem	Possible Cause	Solution
---------	----------------	----------

Problem	Possible Cause	Solution
Tape is not adhering properly.	Surface was not clean or dry; application temperature was too low/high; insufficient pressure during application.	Re-clean and dry the surface thoroughly. Ensure application is within recommended temperature range. Apply firm, even pressure across the entire tape surface.
Edges are lifting.	Insufficient pressure during application at edges; surface contamination at edges.	Re-apply pressure to the edges. If lifting persists, carefully remove the tape, clean the area, and re-apply a new section.
Tape appears dirty or discolored.	Accumulation of dirt, grime, or mildew.	Clean with mild soap and water using a soft brush. For stubborn stains, a gentle non-abrasive cleaner suitable for plastics may be used, followed by thorough rinsing.

SPECIFICATIONS

Model: AQS36N
Brand: Heskins LLC
Type: Waterproof Aqua Safe Grip Tape
Color: Black
Dimensions: 36 inches x 60 feet
ASIN: B07Y9ZJCPT
UPC: 689788904207
Manufacturer: Heskins
First Available: September 24, 2019

WARRANTY INFORMATION

Heskins LLC products are manufactured to high standards. For specific warranty details regarding the AQS36N Aqua Safe Grip Tape, please refer to the official Heskins LLC website or contact their customer support directly. Warranty coverage typically addresses manufacturing defects and material integrity under normal use conditions.
Note: Warranty terms may vary based on region and purchase location. Always retain your proof of purchase.

CUSTOMER SUPPORT

For further assistance, technical inquiries, or to report any issues with your Heskins AQS36N Aqua Safe Grip Tape, please contact Heskins LLC customer support:

Website: Visit the official Heskins LLC website for contact forms, FAQs, and product information.
Email: Refer to the Heskins LLC website for their customer service email address.
Phone: Refer to the Heskins LLC website for their customer service phone number.

When contacting support, please have your product model (AQS36N) and purchase details ready.

Ask about setup, troubleshooting, compatibility, parts, safety, or missing instructions. Manuals+ will review the question and use this page's manual context to help answer it.
