# WAP EXTREME TURBO 2800 High-Pressure Washer User Manual

Model: **EXTREME TURBO 2800** | Brand: **WAP**

## 1. INTRODUCTION

The WAP Extreme Turbo 2800 high-pressure washer is designed for efficient and rapid cleaning of heavy and deep dirt across large areas. It offers significant water savings, up to 80% compared to a common hose. This manual provides essential information for the safe and effective operation, maintenance, and troubleshooting of your WAP Extreme Turbo 2800 high-pressure washer.

**Important Safety Information: Always read the instruction manual thoroughly before operating the appliance to ensure safe use and prevent injury or damage.**

## 2. PRODUCT FEATURES

The WAP Extreme Turbo 2800 is engineered with advanced features to provide powerful and convenient cleaning:

- **Powerful Performance:** Equipped with a 1900W induction motor and a maximum pressure of 2450 PSI, it is excellent for removing heavy and deep dirt quickly and efficiently.
- **Water Efficiency:** Reduces water consumption by up to 80% compared to a common hose, providing effective and sustainable cleaning.
- **Versatile Nozzles:** Includes a turbo nozzle for intense cleaning of difficult dirt and an adjustable nozzle (fan or concentrated), offering versatility for different cleaning tasks.
- **Total Stop System:** Automatic water and power cut-off when the trigger is released helps save energy and extends the motor's lifespan.
- **Durable Construction:** Designed with stainless steel pistons and an induction motor for greater longevity and resistance to continuous use.
- **Integrated Detergent Applicator:** Built-in detergent applicator with control on the lance for easy

application of cleaning solutions.

- **Mobility and Storage:** Features a handle and wheels for easy transport, and an accessory holder to keep components organized.

### 3. SETUP AND ASSEMBLY

---

Follow these steps to set up your WAP Extreme Turbo 2800 high-pressure washer:

1. **Unpacking:** Carefully remove all components from the packaging. Ensure all accessories listed in Section 7 are present.
2. **Handle Assembly:** Attach the handle to the main unit if it is not pre-assembled. Ensure it clicks securely into place.
3. **Accessory Holder:** Utilize the integrated accessory holder to store the high-pressure gun, lances, and other accessories when not in use. This optimizes machine movement and storage.
4. **Water Inlet Connection:** Connect a garden hose to the water inlet of the high-pressure washer. Use the quick connect adapter and ensure the water filter is properly installed to prevent debris from entering the pump.
5. **High-Pressure Hose Connection:** Connect the high-pressure hose to the outlet on the machine and to the high-pressure gun. Ensure all connections are tight to prevent leaks.
6. **Power Connection:** Plug the electric cable into a suitable grounded power outlet (127V).

Figure 3.5: Water filter to protect the pump from impurities.

## 4. OPERATING INSTRUCTIONS

---

Before operating, ensure all connections are secure and the water supply is turned on.

1. **Power On:** Turn on the main power switch located on the unit.
2. **Prime the Pump:** Squeeze the trigger on the high-pressure gun until a steady stream of water emerges, indicating that air has been purged from the system.
3. **Select Nozzle:** Choose the appropriate nozzle for your cleaning task. The adjustable nozzle allows for a fan spray or a concentrated stream. For heavy-duty cleaning, attach the turbo nozzle.
4. **Apply Detergent (Optional):** If using detergent, fill the built-in detergent tank. Adjust the detergent flow control on the lance as needed.
5. **Begin Cleaning:** Aim the nozzle at the surface to be cleaned, maintaining a safe distance. Squeeze the

trigger to start the high-pressure spray.

6. **Total Stop System:** When you release the trigger, the Total Stop System will automatically shut off the motor and water flow, conserving energy and reducing wear.
7. **Gun Safety Lock:** Always engage the safety lock on the high-pressure gun when not actively spraying to prevent accidental operation.

Figure 4.3: Turbo nozzle for concentrated, powerful cleaning.

Figure 4.4: Built-in detergent tank for easy soap application.

## 5. MAINTENANCE AND CARE

---

Proper maintenance ensures the longevity and optimal performance of your high-pressure washer:

- **After Each Use:** Disconnect the water supply and power. Squeeze the gun trigger to release any remaining pressure. Drain all water from the pump and hose to prevent freezing in cold weather.
- **Clean Nozzles:** Regularly check and clean the nozzle openings to remove any blockages that may affect spray pattern or pressure.
- **Water Filter:** Periodically inspect and clean the water inlet filter to ensure a steady flow of clean water to the pump.
- **Detergent Tank:** Rinse the detergent tank thoroughly after each use with detergent to prevent residue buildup.
- **Storage:** Store the unit in a dry, frost-free area. Utilize the integrated accessory and cable holders for neat storage.
- **Stainless Steel Pistons:** The unit is equipped with durable stainless steel pistons, requiring minimal internal maintenance.

## 6. TROUBLESHOOTING COMMON ISSUES

---

This section provides solutions to common problems you might encounter:

Problem	Possible Cause	Solution
Unit does not start	No power supply; Power switch off; Thermal overload.	Check power connection; Turn power switch on; Allow unit to cool down.
Low pressure	Insufficient water supply; Clogged nozzle; Air in pump; Leaking connections.	Ensure adequate water flow; Clean nozzle; Prime pump; Tighten connections.
Motor runs continuously	Air in pump; Leaking connections; Bypass valve issue.	Prime pump; Check and tighten all connections; Contact support if issue persists.
Pulsating pressure	Air in pump; Clogged nozzle; Water supply restriction.	Prime pump; Clean nozzle; Check water inlet filter and hose for kinks.

If the problem persists after attempting these solutions, please contact WAP customer support.

## 7. TECHNICAL SPECIFICATIONS

Specification	Value
Voltage	127V
Color	Yellow with Black
Electric Power	1900W
Maximum Pressure	2450 PSI
Frequency	60 Hz
Motor Type	Induction
Flow Rate	360 L/h
Insulation Class	III
Electric Cable Length	5 M
High-Pressure Hose Length	5 M (Steel Braided)
Net Weight	15.8 kg
Gross Weight	17 kg
Product Dimensions (LxWxH)	29 x 30 x 76 cm
Material Type	Polymers and Metals
Certification	HOUS 2363-001-19

Figure 7.1: Product certification label.

## 8. INCLUDED ACCESSORIES

Your WAP Extreme Turbo 2800 high-pressure washer comes with the following accessories:

- 1 x High-Pressure Gun with Quick Connection
- 1 x Lance with Adjustable Nozzle (concentrated, fan, and shampoo spray options)
- 1 x Turbo Nozzle with Quick Connection
- 1 x 5m Steel Braided High-Pressure Hose
- 1 x Built-in Detergent Applicator
- 1 x Quick Connect Adapter
- 1 x Water Filter
