BAKAJI 52 Liter Wine Refrigerator Instruction Manual

Model: 8051739528541

INTRODUCTION

Thank you for choosing the BAKAJI 52 Liter Wine Refrigerator. This manual provides essential information for the safe installation, operation, and maintenance of your appliance. Please read these instructions thoroughly before use and retain them for future reference.

SAFETY INFORMATION

To reduce the risk of fire, electric shock, or injury when using your appliance, follow these basic precautions:

- Read all instructions before using the wine refrigerator.
- **Electrical Safety:** Ensure the power outlet matches the voltage requirements of the appliance. Do not use extension cords or ungrounded adapters. Always unplug the appliance before cleaning or performing any maintenance.
- **Placement:** Place the appliance on a firm, level surface. Ensure adequate ventilation around the unit. Do not block ventilation openings.
- **Heat Sources:** Keep the appliance away from direct sunlight, heat sources (stoves, heaters, radiators), and extreme temperatures.
- **Water Exposure:** Do not expose the appliance to rain or excessive moisture. Do not operate with wet hands.
- **Children:** This appliance is not intended for use by persons (including children) with reduced physical, sensory, or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety. Children should be supervised to ensure that they do not play with the appliance.
- **Damage:** Do not operate the appliance if the power cord or plug is damaged, or if the unit malfunctions or has been dropped or damaged in any manner. Contact qualified service personnel for examination, repair, or adjustment.
- **Flammable Materials:** Do not store explosive substances such as aerosol cans with a flammable propellant in this appliance.

PRODUCT OVERVIEW

The BAKAJI 52 Liter Wine Refrigerator is designed to store up to 18 standard wine bottles at optimal temperatures. It features a thermoelectric cooling system, adjustable temperature control, and internal LED lighting.

Components:

- Wine Refrigerator Unit
- 5 Chrome Wire Shelves (each holding 3 bottles)
- Double Tempered Glass Door with Recessed Handle
- Control Panel (for temperature adjustment and LED light)
- Internal LED Light
- Adjustable Leveling Feet

SETUP

1. Unpacking

Carefully remove all packaging materials. Inspect the appliance for any damage during transit. Keep packaging materials out of reach of children.

2. Placement

- Place the wine refrigerator on a flat, stable surface capable of supporting its weight when fully loaded.
- Allow at least 10 cm (4 inches) of space around the back and sides of the unit for proper air circulation.
- Avoid placing the unit near direct sunlight, heat-generating appliances (e.g., oven, dishwasher), or in areas with high humidity.
- This appliance is designed for freestanding installation only.

3. Leveling the Unit

The appliance has adjustable leveling feet. Turn the feet clockwise or counter-clockwise to raise or lower the unit until it is perfectly level. Proper leveling is crucial for efficient operation and to prevent vibrations.

4. Initial Cleaning

Before first use, clean the interior and exterior of the wine refrigerator with a soft cloth and mild detergent. Rinse with clean water and dry thoroughly.

5. Power Connection

Plug the appliance into a dedicated, grounded electrical outlet (Type C/EF - 2 pin EU/FR-DE hybrid). Do not use multi-sockets or extension cords. Allow the unit to stand for at least 2 hours before plugging it in to allow refrigerating fluids to settle.

OPERATING INSTRUCTIONS

1. Turning On/Off

The appliance starts operating automatically once plugged into a power outlet. There is no separate on/off switch for the cooling function. The internal LED light has a dedicated On/Off switch.

2. Loading Bottles

Carefully place wine bottles onto the chrome wire shelves. The unit can accommodate up to 18 standard wine bottles. Ensure bottles are placed securely to prevent rolling or damage.

Figure 4: Wine refrigerator placed in a kitchen environment, showcasing its capacity.

3. Temperature Adjustment

The wine refrigerator features a mechanical temperature control knob, typically located at the back or inside the unit. The temperature can be adjusted from **11°C to 18°C (52°F to 64°F)**. Turn the knob to select your desired temperature. Allow several hours for the internal temperature to stabilize after adjustment.

Figure 5: Diagram illustrating the homogeneous and constant cooling provided by the 70W thermoelectric motor.

4. Internal LED Light

The internal soft LED light can be turned on or off using the dedicated switch, usually located near the control panel. This light is for display purposes and does not affect the cooling performance.

MAINTENANCE

1. Cleaning the Interior

Always unplug the appliance before cleaning.

- Remove all bottles and shelves.
- Wash the interior with a solution of warm water and mild baking soda (2 tablespoons of baking soda to 1 liter of water).
- Rinse thoroughly and wipe dry with a clean, soft cloth.

- Clean shelves with a mild detergent and dry completely before returning them to the unit.

2. Cleaning the Exterior

Wipe the exterior surfaces with a soft cloth dampened with water and a mild detergent. Do not use abrasive cleaners or solvents, as they may damage the finish.

3. Defrosting

This wine refrigerator features an **automatic defrost function**. Frost will melt and evaporate automatically. There is no need for manual defrosting.

4. Power Disconnection for Extended Periods

If the appliance will not be used for an extended period, unplug it, clean the interior, and leave the door slightly ajar to prevent odors and mold growth.

TROUBLESHOOTING

Before contacting customer service, please check the following common issues:

Problem	Possible Cause	Solution
Appliance does not operate.	Not plugged in; circuit breaker tripped; power outage.	Ensure plug is securely in outlet; check circuit breaker; check household power supply.
Temperature is not cold enough.	Temperature setting too high; door not closed properly; excessive door openings; poor ventilation; ambient temperature too high.	Adjust temperature to a lower setting; ensure door is sealed; reduce frequency of door openings; ensure adequate space around unit; move unit to a cooler location.
Excessive noise.	Appliance not level; loose parts; bottles vibrating.	Adjust leveling feet; check for loose components; ensure bottles are stable on shelves.
Internal LED light not working.	Light switch is off; LED bulb failure.	Toggle the LED light switch; contact customer support if bulb needs replacement.

If the problem persists after checking these solutions, please contact qualified service personnel.
