6. TROUBLESHOOTING

If you encounter issues with your TV, refer to the following common problems and solutions:

Problem	Possible Solution
No power	Ensure the power cable is securely plugged into the TV and the wall outlet. Check if the wall outlet is working by plugging in another device. Try pressing the power button on the TV itself, not just the remote.
No picture, but sound is present	Check the input source. Press the 'Input' button on the remote to cycle through sources. Ensure all video cables (HDMI, AV) are securely connected. Try restarting the connected device (e.g., cable box, game console).
No sound, but picture is present	Check the volume level and ensure the TV is not muted. Verify audio cables are correctly connected if using external speakers. Check audio settings on the TV and any connected devices.
Remote control not working	Replace the batteries in the remote control. Ensure there are no obstructions between the remote and the TV's IR sensor. Point the remote directly at the TV.
Cannot connect to Wi-Fi	Ensure your Wi-Fi router is on and working correctly. Check the Wi-Fi password. Try restarting your router and the TV. If possible, try a wired (Ethernet) connection to rule out Wi-Fi issues.
