Redragon S108 PT-LIGHT GREEN

Redragon S108 CAMINC ESSENTIALS Gaming Combo User Manual

Model: **S108 PT-LIGHT GREEN** | Brand: **Redragon**

1. Introduction

Welcome to the user manual for your new Redragon S108 CAMINC ESSENTIALS Gaming Combo. This combo includes a high-performance gaming keyboard and a precision gaming mouse, designed to enhance your gaming experience with responsive controls and customizable features. Please read this manual carefully to ensure proper setup, operation, and maintenance of your new devices.

2. Package Contents

Please verify that all items are present in your package:

- Redragon S108 Gaming Keyboard
- Redragon Gaming Mouse
- User Manual (this document)

3. Setup

3.1 Connecting the Keyboard and Mouse

The Redragon S108 combo uses a wired USB connection for reliable performance.

1. Locate an available USB port on your computer.
2. Plug the USB connector of the keyboard into the USB port.
3. Plug the USB connector of the mouse into another available USB port.
4. Your operating system should automatically detect and install the necessary drivers.

Image 3.1: The keyboard and mouse ready for connection.

3.2 Driver Installation

The Redragon S108 combo is plug-and-play compatible with most modern operating systems (Windows, macOS, Linux). No additional driver installation is typically required for basic functionality. For advanced customization, such as macro programming or detailed RGB lighting effects, please visit the official Redragon website to download the dedicated software for your model.

4. Operating Instructions

4.1 Keyboard Features

4.1.1 RGB Backlighting Control

The Redragon S108 keyboard features a renowned Chroma lighting system, offering various lighting modes and brightness levels. Use the following key combinations to adjust the lighting:

- **Fn + [Key]**: Specific function keys (e.g., F1-F12) may control lighting modes, brightness, or speed. Refer to the keycap legends for exact functions.
- **Software Control**: For advanced customization, including per-key lighting and custom effects, download the Redragon software from the official website.

4.1.2 Ultra-Durable Keycaps

The keyboard is equipped with ultra-durable keycaps manufactured using a double-shot injection process. This ensures that the legends on the keycaps will not fade or wear off, even after extensive use, providing long-lasting durability and a consistent typing experience.

Image 4.1: Detail of the double-shot injection keycaps and mechanical switches.

4.2 Mouse Features

4.2.1 DPI Adjustment

The Redragon gaming mouse features a Pixart 3325 sensor with up to 5,000 DPI (Dots Per Inch) and 20G acceleration/100 IPS tracking speed, allowing for precise and responsive cursor control. You can adjust the DPI sensitivity on-the-fly using the dedicated DPI button(s) on the mouse. Each DPI level may correspond to a different LED color indicator.

4.2.2 Programmable Buttons

The mouse may feature additional programmable buttons. These buttons can be customized using the Redragon software to perform various functions, macros, or key combinations, giving you an edge in gaming and productivity. Refer to the software's user interface for detailed instructions on button assignment.

5. Maintenance

5.1 Cleaning

To maintain the performance and appearance of your Redragon S108 combo:

- **Keyboard**: Use a soft, dry cloth to wipe down the keycaps and frame. For deeper cleaning, you can use compressed air to remove dust and debris from between the keys. Avoid using harsh chemicals or abrasive materials.
- **Mouse**: Wipe the surface with a soft, slightly damp cloth. Ensure no liquid enters the mouse. Clean the optical sensor area periodically with a cotton swab to prevent tracking issues.

5.2 Storage

When not in use for extended periods, store the keyboard and mouse in a clean, dry environment away from direct sunlight and extreme temperatures. Avoid placing heavy objects on top of the devices to prevent damage.

6. Troubleshooting

6.1 Keyboard Not Responding

- Ensure the USB cable is securely plugged into the computer's USB port.
- Try plugging the keyboard into a different USB port.
- Restart your computer.
- Test the keyboard on another computer to determine if the issue is with the keyboard or your system.

6.2 Mouse Cursor Jumps/Lag

- Clean the optical sensor on the bottom of the mouse.
- Ensure you are using the mouse on a clean, non-reflective surface (preferably a mouse pad).
- Try plugging the mouse into a different USB port.
- Adjust the DPI settings to see if it resolves the issue.

6.3 Lighting Issues

- Ensure the keyboard is properly connected.
- Check the lighting control key combinations (e.g., Fn + specific keys) to ensure lighting is not turned off or set to minimum brightness.
- If using software, ensure it is running and configured correctly.

7. Specifications

Feature	Description
