Setup

1. **Unpack:** Carefully remove the night light from its packaging.
2. **Inspect:** Check the device for any signs of damage. Do not use if damaged.
3. **Placement:** Select an indoor wall outlet in a location where ambient light detection is optimal. Avoid placing near direct light sources that could interfere with the sensor.
4. **Plug In:** Insert the night light directly into a standard 110V-240V AC wall outlet. The compact design ensures the second outlet remains accessible.

Operation

The myCozyLite LED Night Light features an automatic dusk-to-dawn sensor for convenient, hands-free operation.

- **Automatic Activation:** The integrated photoelectric sensor detects ambient light levels. The night light will automatically turn on when the surrounding area becomes dark.
- **Auto-Dimming:** The light output will adjust its brightness based on the detected ambient light, providing a soft, diffused cool white glow that is easy on the eyes.
- **Automatic Deactivation:** As the ambient light increases (e.g., at dawn or when room lights are turned on), the night light will automatically turn off, conserving energy.
- **Optimal Sensor Performance:** The sensor is centrally placed for accurate light detection. Ensure the sensor is not obstructed for optimal performance.
